

Audits of Less Complex Entities – Proposed ISA for LCE

This agenda item presents revised drafting of the proposed International Standard on Auditing for Audits of Financial Statements of Less Complex Entities (ISA for LCE).

The changes are marked from the Exposure Draft of the ISA for LCE (ED-ISA for LCE) except for Part A, *Authority* which is marked from the drafts presented in the September and December 2022 Board meetings, and the following Parts which are marked from the draft presented to the Board in the March 2023 meeting:

- Part 2, Part 3, Part 4, Part 5 and Part 6
- Sections 1.9, 7.7, 8.9 (Specific Documentation Requirements)
- Paragraphs 7.4.8, 7.4.17-7.4.18E, 7.6.3. (Procedures for Accounting Estimates)

Content shaded in grey is not proposed for discussion with the Board at this time.

Preface–~~[Draft]~~ ISA for LCE

P.1. This ~~[draft]~~ standard (i.e., the ISA for LCE) has been designed to achieve reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, for audits of financial statements of less complex entities (LCEs) in the private and public sectors. The ~~[draft]~~ standard has been developed to reflect the nature and circumstances of an audit of the financial statements of an LCE and result in the consistent performance of a quality audit engagement. A quality audit engagement is achieved by planning and performing the engagement and reporting on it in accordance with professional standards and applicable legal and regulatory requirements. Achieving the objective of this ~~[draft]~~ standard involves exercising professional judgment and professional skepticism.

P.1A. This standard applies to an audit of a complete set of general purpose financial statements of an LCE as contemplated in Part A, and is written in that context. It may also be adapted as necessary in the circumstances of the engagement, to an audit of a complete set of special purpose financial statements, or an audit of a single financial statement or of a specific element, account or item of a financial statement, only if the entity is an LCE as set out in Part A.

P.1B. When an audit engagement is undertaken using this standard, the International Standards on Auditing do not apply to the engagement. They may, however, provide additional guidance in relation to an audit performed in accordance with the ISA for LCE.

P.2. Part A sets out the authority ~~for this [draft] standard and includes specific prohibitions, qualitative characteristics, and quantitative thresholds for determining the appropriate use of the is standard~~ISA for LCE. ~~A clear description of the types of entities for which an audit in accordance with this [draft] standard has been designed – as set out in Part A – is essential so that:~~

~~The IAASB can decide on objectives and requirements for inclusion within the ISA for LCE that are appropriate for an audit of an LCE; and~~

~~Legislative or regulatory authorities or relevant local bodies with standard setting authority (such as national standard setters or professional accountancy organizations), firms, auditors, and others will be informed of the intended scope of the [draft] standard.~~

~~P.3. Decisions about the required or permitted use of this standard, including descriptions of the type of entities for which an audit in accordance with this [draft] standard is permitted appropriate rest with legislative and regulatory authorities or relevant local bodies with standard-setting authority. Such descriptions may or may not align with the limitations for use as set out in Part A. The intended scope of this [draft] standard is consistent with corresponds to the matters description of a typical LCE describing an audit of the financial statements of an LCE as set out in Part A and does not contemplate jurisdictional descriptions.~~ [Combined into paragraph P.2.]

~~P.3A. If this [draft] standard is used for audit engagements other than those contemplated in Part A, the auditor is not permitted to represent compliance with the [draft] ISA for LCE in the auditor's report.~~ [Moved from paragraph P.5.]

P.4. This [draft] standard does not override local law or regulation that governs audits of financial statements in a particular jurisdiction. The ISA for LCE does not address the responsibilities of the auditor that may exist in legislation or regulation. Such responsibilities may differ from those established in this standard and it is the responsibility of the auditor to ensure compliance with all relevant legal, regulatory, or professional obligations.

P.5. [Moved to paragraph P.3A.]

The Applicable Financial Reporting Framework

P.6. The financial statements subject to audit are those of the entity, prepared by management of the entity with oversight from those charged with governance. Law or regulation may establish the responsibilities of management, and those charged with governance, in relation to financial reporting. This [draft] standard does not impose responsibilities on management or those charged with governance and does not override law or regulation that govern their responsibilities. However, an audit in accordance with this [draft] standard is conducted on the premise that management, and where appropriate, those charged with governance have acknowledged certain responsibilities that are fundamental to the conduct of the audit. The audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

Those Charged with Governance and Management's Responsibilities for Preparation of the Financial Statements

The extent of management's responsibilities, or the way that they are described, may differ across jurisdictions. While there may be differences in the extent of those responsibilities or how they are described, an audit in accordance with this [draft] standard is conducted on the premise that management, and where appropriate, those charged with governance, have acknowledged and understood that they have responsibility:

- *For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant, their fair presentation;*

- *For such internal control as management, and where appropriate, those charged with governance determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and*
- *To provide the auditor with unrestricted access to all information of which they are aware that is relevant to the preparation of the financial statements, additional information the auditor may request, and unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.*

- P.7. The applicable financial reporting framework often encompasses financial reporting standards established by an authorized or recognized standard setting organization, or ~~may also encompass~~ legislative or regulatory requirements. In some cases, the financial reporting framework may encompass both ~~financial reporting standards established by an authorized or recognized standard setting organization and legislative or regulatory requirements~~.
- P.8. The requirements of the applicable financial reporting framework determine the form and content of the financial statements. Although the framework may not specify how to account for or disclose all transactions or events, the framework ordinarily embodies sufficiently broad principles that can serve as a basis for developing and applying accounting policies consistent with the framework's concepts underlying the requirements.
- P.9. Some financial reporting frameworks are fair presentation frameworks, while others are compliance frameworks. This ~~[draft]~~ standard covers both frameworks. The term "fair presentation framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework and:
- (i) Acknowledges explicitly or implicitly that, to achieve fair presentation of the financial statements, it may be necessary for management to provide disclosures beyond those specifically required by the framework; or
 - (ii) Acknowledges explicitly that it may be necessary for management to depart from a requirement of the framework to achieve fair presentation of the financial statements. Such departures are expected to be necessary only in extremely rare circumstances.

The term "compliance framework" is used to refer to a financial reporting framework that requires compliance with the requirements of the framework, but does not contain the acknowledgements in (i) or (ii) above.

An Audit of Financial Statements

- P.10. The purpose of an audit is to enhance the degree of confidence of intended users in the financial statements. This is achieved by the expression of an opinion by the auditor on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. As the basis for the auditor's opinion, this ~~[draft]~~ standard requires the auditor to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error.
- P.11. Reasonable assurance is a high level of assurance. It is obtained when the auditor has obtained sufficient appropriate audit evidence to reduce audit risk (that is, the risk that the auditor expresses an inappropriate opinion when the financial statements are materially misstated) to an acceptably low level. However,

reasonable assurance is not an absolute level of assurance, because there are inherent limitations of an audit which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive.

Inherent Limitations of an Audit

Audit risk is a function of the risks of material misstatement and detection risk. The assessment of risks of material misstatement is based on audit procedures to obtain information necessary for that purpose and evidence obtained throughout the audit. The assessment of risks of material misstatement is a matter of professional judgment, rather than a matter capable of precise measurement.

Because of the inherent limitations of an audit, there is an unavoidable risk that some material misstatements of the financial statements may not be detected, even though the audit is properly planned and performed in accordance with this [draft] standard. Accordingly, the subsequent discovery of a material misstatement resulting from fraud or error does not by itself indicate a failure to conduct an audit in accordance with this [draft] standard. However, the inherent limitations of an audit are not a justification for the auditor to be satisfied with less than persuasive audit evidence.

Format of the [Draft] ISA for LCE

P.12. The [draft] ISA for LCE includes:

- The Authority (Part A), which sets out the authority for determining the appropriate use of the ISA for LCE. sets out the circumstances for which the [draft] ISA for LCE is prohibited or not appropriate to use.
- Part 1, which sets out the fundamental concepts, general principles and overarching requirements to be applied throughout the audit.
- Part 2, which sets out the general requirements for audit evidence and documentation, as well as the overall objective of the audit.
- Part 3, which sets out the auditor's and engagement partner's obligations and responsibilities for quality management in an audit of an LCE.
- Parts 4 to 9, which follow the flow of an audit engagement, and set out the detailed requirements for the audit. Each of these Parts also includes specific communication and documentation requirements as necessary.
- Part 10, which sets out the special considerations that apply to an audit of group financial statements.
- Appendices, which include the glossary of terms used in this [draft] standard, assertions, an illustrative engagement letter and an illustrative representation letter, as well as other relevant supporting materials for implementation of the requirements within this [draft] standard.

P.13. The content of each Parts 1-[10] includes:

- Introductory material in a separate box setting out the content and scope of that Part (but does not create any additional obligations for the auditor).
- Objective(s), which link the requirements of that Part and the overall objective of the audit.

- Requirements to be met, except where the requirement is conditional and the condition does not exist. ~~All requirements are numbered relating to the relevant Part, for example A.1., A.2., or 1.1.1., 1.1.2., etc.~~ Requirements are expressed using “shall.”
- Essential explanatory material (EEM), designed to provide further explanation relevant to a sub-section or a specific requirement. All EEM is presented in italics within separate blue boxes. There are two types of EEM: general introductory EEM that explains the context of the section that follows and EEM specific to the requirement directly above it.

Requirements and EEM that are only applicable when there are engagement team members other than the engagement partner are presented in a box.

- P.14. Definitions, describing the meanings attributed to certain terms for the purpose of this ~~[draft]~~ standard, can be found in the Glossary of Terms in Appendix 1.¹ The definitions assist in the consistent application and interpretation of the requirements, and are not intended to override definitions that may be established for other purposes, whether in law or regulation. Unless otherwise indicated, the definitions carry the same meanings throughout this ~~[draft]~~ standard.

~~P.14A For the purposes of this standard, the use of “LCE” or “entity” also refers to a group (i.e., where the audit is an audit of group financial statements).~~

Non-Authoritative Support Materials

- P.15. The IAASB may issue Staff publications or other non-authoritative material to support the implementation of the ~~[draft]~~ ISA for LCE.

Public Sector Entities

- P.16. This ~~[draft]~~ standard is relevant to engagements in the public sector, ~~whenre the considerations if the criteria~~ set out in the Authority in Part A ~~have been met~~ apply. The public sector auditor’s responsibilities, however, may be affected by the audit mandate, or by obligations on public sector entities arising from law, regulation or other authority (such as ministerial directives, government policy requirements, or resolutions of the legislature), which may encompass a broader scope than an audit of financial statements in accordance with this ~~[draft]~~ standard. These additional responsibilities are not dealt with in this ~~[draft]~~ standard. They may be dealt with in the pronouncements of the International Organization of Supreme Audit Institutions or national standard setters, or in guidance developed by public sector audit agencies.
- P.17. The applicable financial reporting framework in a public sector entity is determined by the legislative and regulatory frameworks relevant to each jurisdiction or within each geographical area. Matters that may be considered in the entity’s application of the applicable financial reporting requirements, and how it applies in the context of the nature and circumstances of the entity and its environment, include whether the entity applies a full accrual basis of accounting or a cash basis of accounting in accordance with the International Public Sector Accounting Standards, or a hybrid.

¹ The definitions in this ~~[draft]~~ standard are consistent with the definitions in the International Standards on Auditing (ISAs) (i.e., contained in the IAASB’s Glossary of Terms within the IAASB’s Handbook Volume 1). The Glossary of Terms in Appendix 1 also includes other relevant terms in the IAASB Handbook Glossary of Terms that are not defined but are used in the ISAs.

- P.18. Ownership of a public sector entity may not have the same relevance as in the private sector because decisions related to the entity may be made outside of the entity as a result of political processes. Therefore, management may not have control over certain decisions that are made. Matters that may be relevant include understanding the ability of the entity to make unilateral decisions, and the ability of other public sector entities to control or influence the entity's mandate and strategic direction.
- P.19. When ~~re appropriate~~ relevant, additional considerations specific to public sector entities have been included in EEM.

Maintenance of the ~~[draft]~~ ISA for LCE²

- P.20. The IAASB expects to propose amendments to the ISA for LCE periodically. The IAASB will consider the impact on the ~~[draft]~~ ISA for LCE as part of a project to revise or develop a new ISA, and a determination made as to the urgency for the need for a change to this ~~[draft]~~ standard. In developing the exposure draft of the changes for the ~~[draft]~~ ISA for LCE, the IAASB will consider any specific issues that have been brought to the attention of the IAASB regarding application of the ISA for LCE. The IAASB expects that there will be a period of at least eighteen months between when amendments to the ISA for LCE are issued and the effective date of those amendments.

² [Task Force recommendations on the future maintenance of this standard will be presented to the Board in September 2023.](#)

A. Authority of the ISA for Audits of Financial Statements of Less Complex Entities

Content of this Part

Part A ~~describes when~~ sets out the Authority for determining the appropriate use of the ISA for LCE. ~~the ISA for LCE is appropriate for use in undertaking an audit engagement.~~

The ~~standard~~ ISA for LCE is designed to enable the achievement of the overall objectives of the auditor, given the typical nature and circumstances of an LCE. There are limitations to the use of the ISA for LCE, which ~~are designated into three categories, including~~ include specific prohibitions, qualitative characteristics, and quantitative thresholds. Part A also describes the responsibilities for legislative or regulatory authorities or relevant local bodies with standard-setting authority to support the appropriate use of this ~~ise~~ standard. For the purposes of this Part, the use of “LCE” or “entity” also refers to a group (i.e., where the audit is an audit of group financial statements).³

The requirements in this ISA for LCE have been designed to be proportionate to the typical nature and circumstance of an audit of an LCE (i.e., they do not address complex matters or circumstances). If the ISA for LCE is used for an audit outside the intended scope of this standard, compliance with the requirements of the ISA for LCE will not be sufficient for the auditor to obtain sufficient appropriate audit evidence to support a reasonable assurance opinion.

The Supplemental Guidance for the Authority of the Standard (the Authority Supplemental Guide) provides further guidance for legislative or regulatory authorities or relevant local bodies with standard-setting authority when addressing their respective responsibilities as described in this Part. In addition, the Authority Supplemental Guide further explains matters that may be relevant ~~for firms and auditors~~ in the determination ~~whether the use of the ISA for LCE is appropriate for firms and auditors.~~

Limitations for Using the ISA for LCE

Limitations for using the ISA for LCE are designated into three categories:

- *Specific classes of entities for which the use of the ISA for LCE is prohibited (i.e., specific prohibitions);*
- *Qualitative characteristics that describe an LCE, and if not exhibited by an entity would ordinarily preclude the use of the ISA for LCE for the audit of the financial statements of that entity; and*

³ A “group” is a reporting entity for which group financial statements are prepared and “group financial statements” are financial statements that include the financial information of more than one entity or business unit through a consolidation process. The term “consolidation process” as used in the ISA for LCE is not intended to have the same meaning as “consolidation” or “consolidated financial statements” as defined or described in financial reporting frameworks. Rather, the term “consolidation process” refers more broadly to the process used to prepare group financial statements. The Glossary (**Appendix 1**) describes the meanings attributed to certain terms for the purpose of the ISA for LCE, including the meaning of group and group financial statements.

- Quantitative thresholds to be determined by legislative or regulatory authorities or relevant local bodies with standard-setting authority in each jurisdiction.

In determining the appropriate use of the ISA for LCE, all three categories are to be considered.

Specific Prohibitions

Paragraph A.1. sets out the classes of entities for which the use of this standard is specifically prohibited.

A.1. The ISA for LCE shall not be used if:

- Law or regulation prohibits the use of the ISA for LCE or specifies the use of auditing standards other than the ISA for LCE for an audit of financial statements in that jurisdiction.
- The entity is a listed entity.
- The entity falls into one of the following classes:
 - An entity one of whose main functions is to take deposits from the public;
 - An entity one of whose main functions is to provide insurance to the public;
 - ~~[An entity whose function is to provide post-employment benefits];~~
 - ~~[An entity whose function is to act as a collective investment vehicle and that issues redeemable financial instruments to the public];~~ or
 - ~~(iii)~~ A class of entities where use of the ISA for LCE is prohibited for that specific class of entity by a legislative or regulatory authority or relevant local body with standard-setting authority in the jurisdiction.
- The audit is an audit of group financial statements (group audit) and:
 - Any of the group's individual entities or business units meet the criteria as described in paragraph A.1.(b) or A.1.(c); or
 - Component auditors are involved, except when the component auditor's involvement is limited to circumstances in which a physical presence is needed for a specific audit procedure for the group audit (e.g., attending a physical inventory count or inspecting physical assets).

A single legal entity may be organized with more than one business unit, for example, a company with operations in multiple locations, such as a store with multiple branches. When those business units have characteristics such as separate locations, separate management, separate general ledger and the financial information is aggregated in preparing the single legal entity's financial statements, such financial statements meet the definition of group financial statements because they include the financial information of more than one entity or business unit through a consolidation process.

In some cases, a single legal entity may configure its information system to capture financial information for more than one product or service line for legal or regulatory reporting or other management purposes. In these circumstances, the entity's financial statements are not group financial statements because there is no aggregation of the financial information of more than one

entity or business unit through a consolidation process. Further, capturing separate information (e.g., in a sub-ledger) for legal or regulatory reporting or other management purposes does not create separate entities or business units (e.g., divisions) for purposes of this ISA for LCE.

Component Auditors

A component auditor is an auditor who performs audit work related to a component⁴ for purposes of the group audit. A component auditor is a part of the engagement team for a group audit.

Part 3 contains requirements in relation to engagement quality, including relevant ethical requirements, and the direction and supervision of the members of the engagement team, and the review of their work.

When the auditor responsible for the group audit performs audit procedures related to a component, the auditor is not considered a component auditor.

- A.2. The classes in paragraph A.1.(a) (b) and (d) are outright prohibitions and cannot be modified. Legislative or regulatory authorities or relevant local bodies with standard-setting authority can modify each class described in paragraph A.1.(c) but a class cannot be removed.

A.1.(c) sets out some classes of entities that may exhibit public interest characteristics. Entities that have public interest characteristics could embody a level of complexity in fact or appearance and are specifically prohibited from using the ISA for LCE. Modifications can be made by adding a class of entities to the list of prohibited entities, permitting specific sub-sets within a class to be able to use *this* standard or using quantitative thresholds to prohibit use of *this* standard. Legislative or regulatory authorities or relevant local bodies with standard-setting authority may subsequently remove or amend modifications that they have made.

Qualitative Characteristics

The requirements in this ISA for LCE have been designed to be proportionate to the typical nature and circumstance of an audit of an LCE.

The ISA for LCE has not been designed to address:

- Complex matters or circumstances relating to the nature and extent of the entity's business activities, operations and related transactions and events relevant to the preparation of the financial statements.
- Topics, themes and matters that increase, or indicate the presence of, complexity, such as those relating to ownership, corporate governance arrangements, *or* policies, procedures or processes established by the entity.

Also, the ISA for LCE does not include any requirements addressing:

- ~~(a)~~ Procedures or matters typically relevant to listed entities, including reporting on segment information or key audit matters.

⁴ A component is an entity, business unit, function or business activity, or some combination thereof, determined by the auditor responsible for the group audit for the purposes of planning and performing audit procedures in a group audit.

- ~~(b)~~ — When the auditor intends to use the work of internal auditors, as this would ordinarily not be applicable to an audit of a typical LCE.
- The auditor's use of a report on the description, design, or operating effectiveness of controls at a service organization (i.e., a type 1 or type 2 report), as an auditor of a typical LCE would ordinarily not need to rely on such a report.

A.3. The following list describes characteristics of a typical LCE for the purpose of determining the appropriate use of the ISA for LCE. The list is not exhaustive nor intended to be absolute, and other relevant matters may also need to be considered. Each of the qualitative characteristics may on its own not be sufficient to determine whether the ISA for LCE is appropriate or not in the circumstances. Therefore, the matters described in the list are intended to be considered both individually and in combination. For the purpose of group audits, these considerations shall apply to both the group and each of its individual entities and business units.

Business Activities, Business Model & Industry	The entity's business activities, business model or the industry in which the entity operates do not give rise to significant pervasive business risks. There are no specific laws or regulations that govern the business activities that add complexity (e.g., prudential requirements). The entity's transactions result from few lines of business or revenue streams.
Organizational Structure and Size	The organizational structure is relatively straightforward, with few reporting lines or levels and a small key management team (e.g., 5 individuals or less).
Ownership Structure	The entity's ownership structure is straightforward and there is clear transparency of ownership and control, such that all individual owners and beneficial owners are known.

Nature of Finance Function	The entity has a centralized finance function, including centralized activities related to financial reporting. There are few employees involved in financial reporting roles (e.g., 5 individuals or less).
Information Technology (IT)	The IT environment of the entity, including its IT applications and IT processes, is straightforward. The entity uses commercial software and does not have the ability to make any program changes other than to configure the software (e.g., the chart of accounts, reporting parameters or thresholds). Access to the software is generally limited to one or two designated individuals for the purpose of making the configurations. Few formalized general IT controls are needed in the entity's circumstances.
Application of the Financial Reporting Framework and Accounting Estimates	Few accounts or disclosures in the financial statements of the entity necessitate the use of significant management judgment in applying the requirements of the financial reporting framework. The entity's financial statements ordinarily^{typically} do not include accounting estimates that involve the use of complex methods or models, assumptions or data.

Additional Characteristics Relevant for Group Audits	
For group audits, the following qualitative characteristics are to be considered in addition to those above:	
Group Structure and Activities	The group has few entities or business units (e.g., 5 or less). Group entities or business units are limited to few jurisdictions (e.g., 3 or less).
Access to Information or People	Group management will be able to provide the engagement team with access to information and unrestricted access to persons within the group as determined necessary by the auditor.
Consolidation Process	The group has a simple consolidation process. For example: - Financial information of all entities or business units have been prepared in accordance with the same accounting policies applied to the group financial statements; - All entities or business units have the same financial reporting period-end as that used for group financial reporting; - There are no sub-consolidations; and - Intercompany, or other consolidation adjustments are not complex.

Notwithstanding that professional judgment is applied in determining whether this standard is appropriate to use, if there is uncertainty about whether an audit meets the criteria as set out in this Authority, the use of the ISA for LCE is not appropriate.

Quantitative Thresholds

- A.4. Determining quantitative thresholds assists in the consistent and appropriate use of the ISA for LCE in a jurisdiction. This section anticipates that legislative or regulatory authorities or relevant local bodies with standard setting authority will determine quantitative threshold(s) for use of the ISA for LCE in their respective jurisdictions.

Guidance on setting quantitative thresholds is described further in the Authority Supplemental Guide. Quantitative thresholds may be set, for example, for all applicable entities within the jurisdiction in general, or different thresholds may be set for entities within a specific or certain industry(ies) or for certain classes of entities. In doing so, consideration is to be given to the specific prohibitions for use of the ISA for LCE and the qualitative characteristics of a typical LCE, as set out in this Part, as well as other specific circumstances or needs that may be relevant in the jurisdiction. While complexity is not always directly relative to the size of an entity or its activities, complexity often increases when key quantitative measures (e.g., revenue, total assets, employee numbers etc.) increase.

When determining quantitative thresholds for the use of the ISA for LCE, existing definitions or

thresholds in a jurisdiction-, *which may be developed for different purposes*, may be considered. The IAASB discussed definitions or thresholds used in a broad range of economies, including the:

- European Commission’s definition of a “small enterprise.”⁵ A small enterprise is defined as an enterprise which employs fewer than 50 persons and whose annual turnover or annual balance sheet total does not exceed EUR 10 million.
- National *Entrepreneur and SME Development Council of Malaysia’s* definitions of a “small entity.”⁶ These definitions use different quantitative thresholds depending on the nature of the entity’s business. For example, a small manufacturing entity is defined as an entity with revenues of less than RM 15 million or *having less than* 75 employees, whereas a small entity providing services or operating in other sectors is defined as an entity with revenues of less than RM 3 million or *having less than* 30 employees.

The IAASB discussed that these definitions or thresholds may be appropriate examples for a jurisdiction to consider when determining quantitative thresholds, adjusted for the economic and other circumstances of the jurisdiction.

When the auditor is determining whether the ISA for LCE is appropriate to use, quantitative thresholds are to be considered in addition to the specific prohibitions in paragraph A.1. and the qualitative characteristics in paragraph A.3.

Responsibilities of Legislative or Regulatory Authorities or Relevant Local Bodies

Decisions about the required or permitted use of the IAASB’s International Standards (including the International Standards on Auditing (ISAs) and the ISA for LCE) rest with legislative or regulatory authorities or relevant local bodies with standard-setting authority (such as regulators or oversight bodies, jurisdictional / national auditing standard setters, professional accountancy organizations or others as appropriate) in individual jurisdictions.

As part of the local adoption and implementation process, *it is anticipated that* legislative or regulatory authorities or relevant local bodies with standard-setting authority:

- May add or modify the classes of entities in paragraph A.1.(c) as set out in paragraph A.2.
- ~~Are anticipated to d~~Determine quantitative thresholds described in paragraph A.4.

In doing so, the specific prohibitions, qualitative characteristics and quantitative thresholds should be considered, as well as other specific needs that may be relevant in the jurisdiction. ~~The Authority Supplemental Guide may be helpful when determining the permitted use of the standard for a jurisdiction.~~

1. Fundamental Concepts, General Principles and Overarching Requirements

Content of this Part

Part 1 sets out the:

- Effective date of this [\[draft\]](#) standard.
- The relevant ethical requirements and obligations for firm-level quality management.
- Overall objectives of the auditor. Each Part within this [\[draft\]](#) standard contains an objective for planning and performing the audit and provides a link between the requirements within that Part and the overall objectives of the auditor. The objectives within each Part assist the auditor to understand the intended outcomes of the procedures contained in that Part.
- Fundamental concepts, general principles and overarching requirements applicable to the engagement, including professional skepticism and professional judgment.
- Overarching requirements in relation to fraud, law or regulation, related parties and communications with management and, where appropriate, those charged with governance.
- General communication requirements that apply to all Parts. Within individual Parts there may be additional specific communication requirements.

Scope of this Part

The concepts, principles and overarching requirements in this Part apply throughout the audit engagement.

1.1. Effective Date⁷

1.1.1. This [\[draft\]](#) standard is effective for audits of financial statements for periods beginning on or after [XXX].

The auditor is permitted to apply this [\[draft\]](#) standard, if not prohibited by law or regulation, before the effective date specified.

1.2. Relevant Ethical Requirements and Firm-Level Quality Management

Relevant Ethical Requirements for an Audit of Financial Statements

1.2.1. The auditor shall comply with relevant ethical requirements, including those pertaining to independence, for financial statement audit engagements.

Relevant ethical requirements ordinarily comprise the provisions of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) related to an audit of financial statements, together with national requirements that are more restrictive.

The IESBA Code establishes the fundamental principles of ethics, which are:

⁷ [The effective date of this standard will be discussed by the Board in September 2023.](#)

- Integrity;
- Objectivity;
- Professional competence and due care;
- Confidentiality; and
- Professional behavior.

The fundamental principles of ethics establish the standard of behavior expected of a professional accountant. The IESBA Code provides a conceptual framework that establishes the approach which a professional accountant is required to apply when identifying, evaluating and addressing threats to compliance with the fundamental principles.

Firm-Level Quality Management

Systems of quality management, including the policies or procedures, are the responsibility of the firm. ISQM 1,⁸ applies to all firms that perform audits. This ~~[draft]~~ standard is premised on the basis that the firm is subject to ISQM 1 or to national requirements that are at least as demanding.

If an engagement quality review is required by the firm's policies or procedures established in accordance with ISQM 1, then ISQM 2,⁹ applies. ISQM 2 deals with the appointment and eligibility of the engagement quality reviewer, and the performance and documentation of the engagement quality review.

1.3. Overall Objectives of the Auditor

1.3.1. The overall objectives of the auditor when conducting an audit of financial statements using the ~~[draft]~~ ISA for LCE are to:

- (a) Obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, to enable the auditor to express an opinion on whether the financial statements are prepared, in all material respects in accordance with an applicable financial reporting framework; and
- (b) Report on the financial statements, and communicate as required by this ~~[draft] ISA for LCE~~ standard, in accordance with the auditor's findings.

1.3.2. The auditor shall have an understanding of the entire text of this standard to understand its objectives and to apply its requirements properly. ~~The entire text of this [draft] ISA for LCE is relevant to an understanding of the objectives of this [draft] standard and the proper application of the requirements.~~

1.3.3. To achieve the overall objectives, the auditor shall use the objectives stated in the relevant Parts in planning and performing the audit, to:

⁸ International Standards on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews for Financial Statements, or Other Assurance or Related Services Engagements*

⁹ ISQM 2, *Engagement Quality Reviews*

- (a) Determine whether any audit procedures in addition to those required by the relevant Part are necessary to achieve the objectives stated in this ~~[draft]~~ standard; and
- (b) Evaluate whether sufficient appropriate audit evidence has been obtained.

The auditor is required to use the objectives to evaluate whether sufficient appropriate audit evidence has been obtained in the context of the overall objectives of the auditor. If as a result the auditor concludes that the audit evidence is not sufficient and appropriate, then the auditor may follow one or more of the following approaches:

- *Evaluate whether further relevant audit evidence has been, or will be, obtained as a result of complying with requirements from other Parts;*
- *Extend the work performed in applying one or more requirements; or*
- *Perform other procedures judged by the auditor to be necessary in the circumstances.*

1.3.4. If an objective in a Part cannot be achieved, the auditor shall evaluate whether this prevents the auditor from achieving the overall objectives of the auditor and thereby requires the auditor to:

- (a) Modify the terms of engagement and perform the audit and report in accordance with the International Standards on Auditing; or
- (b) Modify the auditor's opinion or withdraw from the engagement (where withdrawal is possible under applicable law or regulation).

Failure to achieve an objective represents a significant matter requiring documentation.

1.4. Fundamental Concepts and General Principles for Performing the Audit

1.4.1. ~~The auditor shall comply with all relevant requirements unless paragraph 1.4.3. applies. A requirement is relevant when the circumstances of the audit addressed by the requirement exist. The auditor shall comply with all relevant requirements unless, in exceptional circumstances, the auditor may judge it necessary to depart from a relevant requirement. In such circumstances, the auditor shall perform alternative procedures to achieve the aim of that requirement. The need for the auditor to depart from a relevant requirement is expected to arise only where the requirement is for a specific procedure to be performed and, in the specific circumstances of the audit, that procedure would be ineffective in achieving the aim of the requirement.~~ [Moved from paragraph 1.4.3]

A requirement is not relevant only in the cases where the entire Part is not relevant (for example, if the audit is not an audit of group financial statements) or the requirement is conditional and the condition does not exist (for example, the requirement to modify the auditor's opinion where there is an inability to obtain sufficient appropriate audit evidence, and there is no such inability).

1.4.2. The auditor shall not represent compliance with the ~~[draft]~~ ISA for LCE in the auditor's report unless all relevant requirements in this ~~[draft]~~ standard have been met or the circumstances in paragraph 1.4.13. apply.

1.4.3. [Moved to paragraph 1.4.1]

Professional Judgment

1.4.4. The auditor shall exercise professional judgment in planning and performing the audit.

Professional judgment is essential to the proper conduct of an audit. This is because interpretation of relevant ethical requirements and this [draft] standard and the informed decisions required throughout the audit cannot be made without the application of relevant knowledge and experience to the facts and circumstances.

The distinguishing feature of the professional judgment expected of an auditor is that it is exercised by an auditor whose training, knowledge and experience have been sufficiently developed to achieve the necessary competencies for reasonable judgments.

The exercise of professional judgment in any particular case is based on the facts and circumstances that are known to the auditor.

Significant professional judgments made in reaching conclusions on significant matters arising during the audit are required to be documented in accordance with the requirements of Part 2 of this [draft] standard.

Professional Skepticism

1.4.5. The auditor shall plan and perform the audit with professional skepticism recognizing that circumstances may exist that cause the financial statements to be materially misstated.

1.4.6. The auditor shall design and perform procedures in a way that is not biased towards obtaining audit evidence that may be corroborative or towards excluding audit evidence that may be contradictory.

Professional skepticism includes being alert to, for example:

- *Audit evidence that contradicts other audit evidence obtained.*
- *Information that brings into question the reliability of documents and responses to inquiries to be used as audit evidence.*
- *Conditions that may indicate possible fraud.*
- *Circumstances that suggest the need for audit procedures in addition to those required by this [draft] standard.*

Professional skepticism is necessary to the critical assessment of audit evidence. This includes questioning contradictory audit evidence and the reliability of documents and responses to inquiries and other information obtained from management, and where appropriate, those charged with governance. It also includes consideration of the sufficiency and appropriateness of audit evidence obtained in the light of the circumstances.

The auditor cannot be expected to disregard past experience of the honesty and integrity of the entity's management, and where appropriate, those charged with governance. Nevertheless, a belief that management and those charged with governance are honest and have integrity does not relieve the auditor of the need to maintain professional skepticism or allow the auditor to be satisfied with less than persuasive audit evidence when obtaining reasonable assurance.

1.5. Fraud

The primary responsibility for the prevention and detection of fraud rests with both management, and where appropriate, those charged with governance of the entity. Although fraud is a broad legal

concept, for the purposes of this ~~[draft]~~ standard, the auditor is concerned with fraud that causes a material misstatement in the financial statements.

~~An auditor conducting an audit in accordance with this [draft] standard is responsible for obtaining reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error.~~ The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error even though the audit is properly planned and performed in accordance with this ~~[draft]~~ standard. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor.

Misstatements in the financial statements can arise from either fraud or error. The distinguishing factor between fraud and error is whether the underlying action that results in the misstatement of the financial statements is intentional or unintentional. Two types of intentional misstatements are relevant to the auditor – misstatements resulting from fraudulent financial reporting and misstatements resulting from misappropriation of assets. Although the auditor may suspect or, in rare cases, identify the occurrence of fraud, the auditor does not make legal determinations of whether fraud has actually occurred.

When obtaining reasonable assurance, the auditor is responsible for maintaining professional skepticism throughout the audit, considering the potential for management override of controls and recognizing the fact that audit procedures that are effective for detecting error may not be effective in detecting fraud. ~~The requirements in this [draft] standard are designed to assist the auditor in identifying and assessing the risks of material misstatement due to fraud and in designing procedures to detect such misstatements.~~

1.5.1. The auditor shall address the risk of fraud when:

- (a) Identifying and assessing risks of material misstatement, whether due to fraud or error. In doing so, the auditor shall evaluate whether information obtained from the procedures to identify and assess risks and related activities indicates that one or more fraud risk factors are present;¹⁰
- (b) Obtaining sufficient appropriate audit evidence through designing and implementing appropriate responses to assessed risks of material misstatement, including risks of material misstatement due to fraud; and
- (c) Responding appropriately to fraud or suspected fraud identified during the audit.

Considerations Specific to Public Sector Entities

The public sector auditor's responsibilities relating to fraud may be a result of law, regulation or other authority applicable to public sector entities or separately covered by the auditor's mandate. Consequently, the public sector auditor's responsibilities may not be limited to consideration of risks of material misstatement of the financial statements, but may also include a broader responsibility to consider risks of fraud.

¹⁰ Appendix 43 sets out fraud risk factors relevant to less complex entities.

Auditor Unable to Continue the Engagement

- 1.5.2. If, as a result of a misstatement resulting from fraud or suspected fraud, the auditor encounters exceptional circumstances that bring into question the auditor's ability to continue performing the audit, the auditor shall determine the legal and professional responsibilities applicable in the circumstances or consider whether it is appropriate to withdraw, where withdrawal is possible under law or regulation.

Considerations Specific to Public Sector Entities

In many cases in the public sector, the option of withdrawing from the engagement may not be available to the auditor due to the nature of the mandate or public interest considerations.

1.6. Law or Regulation

It is the responsibility of management, with the oversight of those charged with governance where appropriate, to ensure that the entity's operations are conducted in accordance with the provisions of law or regulation, including compliance with the provisions of law or regulation that determine the reported amounts and disclosures in an entity's financial statements.

The requirements in this ~~[draft]~~ standard are designed to assist the auditor in identifying material misstatement of the financial statements due to non-compliance with law or regulation. However, the auditor is not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all law or regulation. The auditor's focus in an audit of the financial statements is on circumstances when non-compliance with law or regulation results in a material misstatement of the financial statements. In this regard, the auditor's responsibilities are in relation to compliance with two different categories of law or regulation and are distinguished as follows:

- ~~(a)~~ — *The provisions of those laws or regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements (e.g., tax and pension law or regulation); and*
- ~~(b)~~ — *Other law or regulation that do not have a direct effect on the determination of the amounts and disclosures in the financial statements, but compliance with which may be fundamental to the operating aspects of the business, to an entity's ability to continue its business, or to avoid material penalties (e.g., compliance with the terms of an operating license, compliance with regulatory solvency requirements, or compliance with environmental regulations), i.e., non-compliance with such law or regulation may therefore have a material effect on the financial statements.*

- 1.6.1. During the audit, the auditor shall remain alert to the possibility that performing audit procedures may bring instances of non-compliance or suspected non-compliance with law or regulation to the auditor's attention.

In the absence of identified or suspected non-compliance with law or regulation, the auditor is not required to perform audit procedures regarding the entity's compliance with law or regulations, other than what is required by this standard. [Moved from paragraph 1.6.2.]

Considerations Specific to Public Sector Entities

In the public sector, there may be additional audit responsibilities with respect to the consideration of law or and regulation which may relate to the audit of financial statements or may extend to other aspects of the entity's operations. [Moved from EEM under paragraph 1.6.2.]

1.6.2. [Moved requirement and EEM to EEM under paragraph 1.6.1.]

Reporting to an Appropriate Authority Outside the Entity

1.6.3. If the auditor has identified or suspects non-compliance with law or regulation, ~~or including~~ fraud, the auditor shall determine whether law, regulation or relevant ethical requirements:

- (a) Require the auditor to report to an appropriate authority outside the entity.
- (b) Establish responsibilities under which reporting to an appropriate authority outside the entity may be appropriate in the circumstances.

Reporting identified or suspected non-compliance with law or regulation, ~~including~~ fraud, to an appropriate authority outside the entity may be required or appropriate in the circumstances because:

- *The auditor has determined reporting is an appropriate action to respond to identified or suspected non-compliance in accordance with relevant ethical requirements; or*
- *Law, regulation or relevant ethical requirements provide the auditor with the right to do so.*

1.7. Related Parties

1.7.1. During the audit, the auditor shall remain alert for:

- (a) Information about the entity's related parties, including circumstances involving a related party with dominant influence; ~~and~~
- ~~(b)~~ (b) Arrangements or other information that may indicate the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor; ~~and~~
- ~~(b)(c)~~ (c) Significant transactions outside the entity's normal course of business.

Many related party transactions occur in the normal course of business. In such circumstances, they may carry no higher risk of material misstatement of the financial statements than similar transactions with unrelated parties. However, the nature of related party relationships and transactions may, in some circumstances, give rise to higher risks of material misstatement of the financial statements than transactions with unrelated parties. Related parties, by virtue of their ability to exert control or significant influence, may be in a position to exert dominant influence over the entity or its management. Consideration of such behavior is relevant when identifying and assessing the risks of material misstatement due to fraud.

Many financial reporting frameworks establish specific accounting and disclosure requirements for related party relationships, transactions and balances to enable users of the financial statements to understand their nature and actual or potential effects on the financial statements. Where the financial reporting framework has established such requirements, the auditor has a responsibility to perform audit procedures to identify, assess and respond to the risks of material misstatement arising from the entity's failure to appropriately account for or disclose related party relationships, transactions or balances in accordance with the requirements of the framework. Even if the applicable financial reporting framework has not established such requirements, the auditor nevertheless needs to obtain

an understanding of the entity's related party relationships and transactions to be able to conclude whether the financial statements achieve fair presentation and are not misleading.

1.8. General Communications with Management and Those Charged with Governance

1.8.1. The auditor shall determine the appropriate person(s) within the entity's governance structure with whom to communicate.

1.8.2. The auditor shall communicate, on a timely basis, with management and, ~~if separate~~where appropriate, those charged with governance.

Governance structures vary by jurisdiction and by entity, reflecting influences such as different cultural and legal backgrounds, and size and ownership characteristics. Governance is the collective responsibility of a governing body, such as a board of directors, a supervisory board, partners, proprietors, a committee of management, a council of governors, trustees or equivalent.

~~*If those charged with governance are separate from management, the communication requirements to those charged with governance also apply to management, and therefore communication with both would be appropriate.*~~

There may be other cases where it is not clear with whom to communicate, for example in some family-owned businesses, some not-for-profit organizations and some government entities (e.g., the governance structure may not be defined). In such cases the auditor may need to discuss and agree with management or the engaging party with whom communications should be made.

1.8.3. Specific matters to be communicated are required throughout this ~~[draft]~~ standard. The auditor shall use professional judgment in determining the appropriate form, timing and general content of the communications with management, and where ~~rea~~appropriate, those charged with governance. When determining the form and timing of communication, the auditor shall consider:

- (a) Legal requirements for communication; and
- (b) The significance of the matters to be communicated.

The appropriate form and timing ~~offer~~ communications will vary with the circumstances of the audit, and may be affected by the significance and nature of the matter, and the actions expected to be taken by management, and where appropriate, those charged with governance.

In audits of LCEs, communication with management and, where appropriate, those charged with governance, often may occur in a less structured manner and matters may be communicated orally. This standard requires that the auditor exercises professional judgement to determine the appropriate form of communication of a matter(s) and certain matters are required to be communicated in writing.

1.8.4. In some cases, all of those charged with governance are involved in managing the entity, for example, an LCE where a single owner manages the entity and no one else has a governance role. In these cases, if matters required by this ~~[draft]~~ standard are communicated with person(s) with management responsibilities, and those person(s) also have governance responsibilities, the matters need not be communicated again with those same person(s) in their governance role. The auditor shall nonetheless be satisfied that communication with person(s) with management responsibilities adequately informs all of those with whom the auditor would otherwise communicate in their governance capacity.

- 1.8.5. Where the responses to inquiries of management, and where appropriate, those charged with governance about a particular matter are inconsistent, the auditor shall investigate the inconsistency.

Specific Communications in Relation to Fraud

- 1.8.6. If the auditor has identified fraud or has obtained information that indicates that fraud may exist, the auditor shall communicate these matters, unless prohibited by law or regulation, on a timely basis to the appropriate level of management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities.

Considerations Specific to Public Sector Entities

In the public sector, requirements for reporting fraud, whether or not discovered through the audit process, may be subject to specific provisions of the audit mandate or related law, regulation or other authority.

Specific Communications to Those Charged with Governance in Relation to Fraud

- 1.8.7. Unless prohibited by law or regulation, the auditor shall communicate ~~with~~ those charged with governance, on a timely basis, if the auditor has identified or suspects fraud involving:

- (a) Management, unless those charged with governance are involved in managing the entity;
- (b) Employees who have significant roles in the entity's internal control system; or
- (c) Others where the fraud results in a material misstatement in the financial statements.

- 1.8.8. If the auditor suspects fraud involving management, the auditor shall discuss with those charged with governance the nature, timing and extent of audit procedures necessary to complete the audit.

1.9. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

- 1.9.1. The auditor shall include in the audit documentation communications about fraud made to management, those charged with governance, regulators and others.

2. Audit Evidence and Documentation

Content of this Part

Part 2 sets out the requirements to be applied throughout the audit for:

- Audit evidence.
- Documentation. Within individual Parts there may also be additional specific documentation requirements.

Scope of this Part

The requirements in this Part apply throughout the audit engagement.

2.1. Objectives

2.1.1. The objectives of the auditor are to:

- (a) Design and perform audit procedures in such a way as to enable the auditor to obtain sufficient appropriate audit evidence to be able to draw reasonable conclusions on which to base the auditor's opinion; and
- (b) Prepare documentation that provides a sufficient and appropriate record of the basis for the auditor's report and provides evidence that the audit was planned and performed in accordance with the ISA for LCE and applicable law or regulation.

2.2. Sufficient Appropriate Audit Evidence

2.2.1. To obtain reasonable assurance, the auditor shall obtain sufficient appropriate audit evidence to reduce audit risk to an acceptably low level thereby enabling the auditor to draw reasonable conclusions on which to base the auditor's opinion.

2.2.2. The auditor shall design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence.

Sufficiency is the measure of the quantity of audit evidence, and is affected by the auditor's assessment of the risks of material misstatement (the higher the assessed risks, the more audit evidence is likely to be required) and also the quality of the audit evidence (the higher the quality, the less may be required). Obtaining more audit evidence, however, may not compensate if it is of poor quality.

Appropriateness is the measure of the quality of the audit evidence, that is its relevance and reliability in providing support for the conclusions on which the auditor's opinion is based.

Most of the auditor's work in forming the auditor's opinion consists of obtaining and evaluating audit evidence. Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level, and thereby enable the auditor to draw reasonable conclusions on which to base the auditor's opinion, is a matter of professional judgment.

2.3. Information to be Used as Audit Evidence

Audit evidence to draw reasonable conclusions on which to base the auditor's opinion is obtained by designing and performing procedures to identify and assess risks of material misstatement (see Part 6)

and ~~further audit procedures responding to assessed risks of material misstatement~~ (see Part 7) as well as procedures in other Parts to comply with the requirements of the ISA for LCE.

Audit procedures to obtain audit evidence can include inspection, observation, confirmation, recalculation, reperformance and analytical procedures, often in some combination, in addition to inquiry. Although inquiry may provide important audit evidence, and may even produce evidence of a misstatement, inquiry alone ordinarily does not provide sufficient audit evidence of the absence of a material misstatement at the assertion level, nor of the operating effectiveness of controls. **[EEM reordered from beginning]**

Audit evidence is cumulative in nature and is primarily obtained from audit procedures performed during the audit, but may also include information from other sources, such as:

- Previous audits (provided that the auditor has confirmed there are no changes);
- Other engagements performed for the client; and
- The firm's quality management procedures for acceptance and continuance.

Audit evidence may come from inside or outside the entity (the entity's accounting records are an important source of audit evidence), the work of management's expert, and includes information that both supports and corroborates management's assertions, as well as contradicts such assertions.

Automated Tools and Techniques (ATT)

ATT, for the purpose of this standard, are IT-enabled processes that involve the automation of methods and procedures, for example the analysis of data using modelling and visualization, or drone technology to observe or inspect assets.

In applying this standard, an auditor may design and perform audit procedures manually or through the use of ATT, and either technique can be effective. Regardless of the tools and techniques used, the auditor is required to comply with the requirements in this standard.

Using ATT can supplement or replace manual or repetitive tasks. In certain circumstances, when obtaining audit evidence, an auditor may determine that the use of ATT to perform certain audit procedures may result in more persuasive audit evidence relative to the assertion being tested. In other circumstances, performing audit procedures may be effective without the use of ATT.

The use of ATT may potentially create biases or a general risk of overreliance on the information or output of the audit procedure performed. As powerful as these tools may be, they are not a substitute for the auditor's knowledge and professional judgment. Further, although the auditor may have access to a wide array of data, including from varying sources (i.e., increased quantity), the exercise of professional skepticism remains necessary to critically assess audit evidence arising from the use of data and from the outputs from using ATT.

- 2.3.1. When designing and performing audit procedures, the auditor shall consider the relevance and reliability of the information to be used as audit evidence, including information from external information sources.

Relevance deals with the logical connection with, or bearing upon, the purpose of the audit procedure and, where appropriate, the assertion under consideration. The relevance of the information may be affected by the direction of testing.

The reliability of information to be used as audit evidence is influenced by its source and nature, as well as the circumstances under which it was obtained, including the controls over its preparation and maintenance where relevant. Generally, the reliability of information is increased when it is obtained from independent sources outside of the entity, by the auditor directly, is an original document rather than a copy and written rather than oral information. However, circumstances may exist that could affect these generalizations.

2.3.2. When using information produced by the entity, the auditor shall evaluate whether the information is sufficiently reliable for the auditor's purposes including, as necessary in the circumstances:

- (a) Obtaining evidence about the accuracy and completeness of the information; and
- (b) Evaluating whether the information is sufficiently precise and detailed for the auditor's purposes.

Obtaining audit evidence about the accuracy and completeness of such information may be performed concurrently with the actual audit procedure applied to the information when obtaining such audit evidence is an integral part of the audit procedure itself. In other situations, the auditor may have obtained audit evidence of the accuracy and completeness of such information by testing controls over the preparation and maintenance of the information. In some situations, however, the auditor may determine that additional audit procedures are needed.

2.3.3. Unless the auditor has reason to believe the contrary, the auditor may accept records and documents as genuine. If conditions identified during the audit cause the auditor to believe that a document may not be authentic or that terms in a document have been modified but not disclosed to the auditor, the auditor shall investigate further and determine the effect on the rest of the audit evidence obtained.

2.3.4. The auditor shall determine what modifications or additions to audit procedures are necessary if:

- (a) Audit evidence obtained from one source is inconsistent with that obtained from another; or
- (b) The auditor has doubts about the reliability of information to be used as audit evidence.

2.5. General Documentation Requirements

[EEM moved to under paragraph 2.5.1]

The ISA for LCE sets out general documentation requirements in this Part and, as appropriate, specific documentation requirements in other Parts. In addition to the general documentation requirements set out in this Part, specific matters to be documented are set out throughout this standard.

2.5.1. The auditor shall prepare audit documentation on a timely basis that is sufficient to enable an experienced auditor, having no previous connection with the audit, to understand:

- (a) The nature, timing and extent of the audit procedures performed in accordance with this standard and applicable legal and regulatory requirements, including recording:
 - (i) The identifying characteristics of the specific items or matters tested;
 - (ii) Who performed the work and the date such work was completed;
 - (iii) Who reviewed the audit work performed and the date and extent of such review.
- (b) The results of the audit procedures performed, and the audit evidence obtained; and

- (c) Significant matters arising during the audit, the conclusions reached thereon, and significant professional judgments made in reaching those conclusions.

Audit documentation provides evidence that the audit complies with the ISA for LCE. The form, content and extent of audit documentation depends on the nature and circumstances of the entity and the procedures being performed. [EEM moved from under paragraph 2.5]

Audit documentation is a record of audit procedures performed, related audit evidence obtained, and conclusions the auditor reached. The auditor obtains audit evidence by designing and performing audit procedures, including risk identification and assessment procedures performed in accordance with Part 6, further audit procedures performed in accordance with Part 7, and procedures in other Parts that are performed to comply with the requirements of the ISA for LCE.

Audit documentation may be in paper or electronic format. Oral explanations, by the auditor on their own, do not adequately support the work performed by the auditor or the conclusions reached, but may be used to explain or clarify information contained in the audit documentation. [EEM moved from under paragraph 2.5]

It is not necessary to include superseded drafts of working papers or financial statements in the audit documentation. [EEM moved from under paragraph 2.5]

~~However, it~~ It is neither not necessary nor practicable for the auditor to document every matter considered, or professional judgment made, in an audit. [EEM moved from under paragraph 2.5] However, the auditor is required to prepare audit documentation that provides a sufficient and appropriate record of the basis for the auditor's report and provides evidence that the audit was planned and performed in accordance with the ISA for LCE and applicable law or regulation. Further, it is unnecessary for the auditor to document separately (as in a checklist, for example) compliance with matters for which compliance is demonstrated by documents included within the audit file.

Significant Matters

Judging the significance of a matter requires professional judgment and the analysis of the facts and circumstances. Examples of significant matters include matters giving rise to significant risks, areas where the financial statements could be materially misstated, circumstances where the auditor has had difficulty in applying the necessary audit procedures, or any findings that could result in a modified opinion.

When The Engagement Partner Performs All the Audit Work

In the case of an audit where the engagement partner performs all the audit work, the documentation will not include matters that might have to be documented solely to inform or instruct members of an engagement team, or to provide evidence of review by other members of the team (e.g., there will be no matters to document relating to team discussions or supervision). Nevertheless, the engagement partner complies with the overriding requirement to prepare audit documentation that can be understood by an experienced auditor, as the audit documentation may be subject to review by external parties for regulatory or other purposes. [EEM reordered].

Automated Tools and Techniques

This standard does not differentiate between different tools and techniques that the auditor may use to design and perform audit procedures, for example using manual or automated ~~audit procedures~~ techniques with respect to what is required to be documented. Regardless of the tools and techniques used, the auditor is required to comply with relevant documentation requirements. [EEM moved from under paragraph 2.5]

- 2.5.3. If the auditor identified information that is inconsistent with the auditor's conclusion regarding a significant matter, the auditor shall document how the inconsistency was addressed.
- 2.5.4. If, in exceptional circumstances, the auditor judges it necessary to depart from a relevant requirement of this standard, the auditor shall document how the alternative audit procedures performed achieve the aim of that requirement, and the reasons for the departure.

A documentation requirement applies only to requirements that are relevant in the circumstances.

- 2.5.6. The auditor shall document discussions of significant matters with management, and where appropriate, those charged with governance, and others, including the nature of the significant matters discussed and when and with whom the discussions took place.

Documentation of Communications

- 2.5.7. Where matters required to be communicated by this standard are communicated orally, the auditor shall include them in the audit documentation, and when and to whom they were communicated.
- 2.5.8. Where matters have been communicated in writing, the auditor shall retain a copy of the communication as part of the audit documentation. Written communications need not include all matters that arose during the audit.

3. Engagement Quality Management

Content of this Part

Part 3 sets out the responsibilities for managing and achieving quality for the audit engagement.

Scope of this Part

In accordance with ISQM 1, the firm is responsible for designing, implementing and operating a system of quality management for audits of financial statements, that provides the firm with reasonable assurance that the firm and its personnel fulfill their responsibilities in accordance with professional standards and applicable legal and regulatory requirements, and conduct engagements in accordance with such standards and requirements, and that engagement reports issued are appropriate in the circumstances. The engagement team, led by the engagement partner, is responsible within the context of the firm's system of quality management for:

- Implementing the firm's responses to quality risks that are applicable to the audit engagement using information communicated by, or obtained from, the firm;
- Determining whether additional responses are needed at the engagement level beyond those in the firm's policies or procedures given the nature and circumstances of the engagement; and
- Communicating to the firm information from the audit engagement that is required to be communicated by the firm's policies or procedures to support the design, implementation and operation of the firm's system of quality management.

The requirements in this Part apply throughout the audit engagement.

3.1. Objective

3.1.1. The objective of the auditor is to manage quality at the engagement level to obtain reasonable assurance that quality has been achieved such that:

- (a) The auditor has fulfilled the auditor's responsibilities, and has conducted the audit, in accordance with this standard, and applicable legal and regulatory requirements; and
- (b) The auditor's report issued is appropriate in the circumstances.

3.2. The Engagement Partner's Responsibilities

Leadership Responsibilities for Managing and Achieving Quality

~~The requirements and essential explanatory material (EEM) included in the boxes are only applicable when there are engagement team members other than the engagement partner.~~

3.2.1. The engagement partner shall take:

- (a) Overall responsibility for managing and achieving quality on the audit engagement; and
- (b) Responsibility for clear, consistent and effective actions being taken that reflect the firm's commitment to quality.

The engagement partner's responsibility for managing and achieving quality is supported by a firm culture that demonstrates a commitment to quality.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

3.2.1A. In taking overall responsibility for managing and achieving quality on the audit engagement, the engagement partner shall:

- (a) Be sufficiently and appropriately involved throughout the audit engagement such that the engagement partner has the basis for determining whether the significant judgments made, and conclusions reached are appropriate in the circumstances.
- (b) ~~Through direction, supervision and review of the work, d~~Determine that the nature, timing and extent of direction, supervision and review is:
 - (i) Responsive to the nature and circumstances of the engagement and the resources assigned; and
 - (ii) Planned and performed in accordance with the firm's policies or procedures, this standard, relevant ethical requirements and regulatory requirements.

Sufficient and Appropriate Involvement

Being sufficiently and appropriately involved throughout the audit engagement when procedures, tasks or actions have been assigned to other members of the engagement team may be demonstrated by the engagement partner in different ways, including:

- *Informing assignees about the nature of their responsibilities and authority, the scope of the work being assigned and the objectives thereof; and to provide any other necessary instructions and relevant information.*
- *Direction and supervision of the assignees.*
- *Review of the assignees' work to evaluate the conclusions reached.*

Direction, Supervision and Review

The approach to direction, supervision and review may be tailored depending on, for example:

- *The engagement team member's previous experience with the entity and the area to be audited.*
- *The assessed risks of material misstatement. A higher assessed risk of material misstatement may require a corresponding increase in the extent and frequency of the direction and supervision of engagement team members and a more detailed review of their work.*
- *The competence and capabilities of the individual engagement team members performing the audit work.*

3.2.2. The engagement partner shall take responsibility for establishing and communicating to the members of the engagement team the expected behavior of the engagement team members, including emphasizing:

- (a) That all engagement team members are responsible for contributing to the management and achievement of quality at the engagement level;
- (b) The importance of professional ethics, values and attitudes;
- (c) The importance of open and robust communication within the engagement team, and supporting the ability of engagement team members to raise concerns without fear of reprisal; and
- (d) The importance of exercising professional skepticism throughout the audit engagement.

In addressing the requirements in paragraphs 3.2.1A. and 3.2.2., the engagement partner may communicate directly to other members of the engagement team and reinforce this communication through conduct and actions (e.g., leading by example).

Relevant Ethical Requirements

3.2.2A. The engagement partner shall have an understanding of the relevant ethical requirements, including those related to independence, that are applicable given the nature and circumstances of the audit engagement.

3.2.6. If matters come to the engagement partner's attention that indicate that a threat to compliance with relevant ethical requirements exists or relevant ethical requirements have been breached, the engagement partner shall take action, including:

- (a) Following the firm's policies or procedures to evaluate the threat; and
- (b) Consulting with others in the firm.

If there are no others in the firm to consult with, the engagement partner may consult with others outside the firm such as experienced practitioners in other firms or the professional accountancy body where the engagement partner is a member.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

3.2.6A. Throughout the audit engagement, the engagement partner shall:

- (a) Take responsibility for other members of the engagement team having been made aware of relevant ethical requirements and the firm's related policies or procedures for identifying, evaluating and addressing threats to compliance with relevant ethical requirements; and
- (b) Remain alert through observation, inspection of audit documentation and making inquiries as necessary, for breaches of relevant ethical requirements by members of the engagement team.

Engagement Resources

3.2.7. Taking into account the nature and circumstances of the audit and the firm's related policies or procedures, the engagement partner shall:

- (a) Determine that:
 - (i) Sufficient and appropriate resources are assigned or made available to the engagement team in a timely manner; and
 - (ii) Members of the engagement team, and any auditor's external experts, collectively have the appropriate competence and capabilities, including sufficient time, to perform the audit engagement.
- (b) If the conditions in (a) are not met, the engagement partner shall take appropriate action including, if relevant, communicating with appropriate individuals about the need to assign or make available additional or alternative resources to the engagement.

Other Engagement Partner Responsibilities

3.2.10. The engagement partner shall:

- (a) Obtain an understanding of the information communicated from the firm's monitoring and remediation process, as communicated by the firm including—and, as if applicable, the information from the other network firms' monitoring and remediation processes of the network and across the network firms, and:
 - (i) Determine the relevance and effect of that information on the audit engagement; and
 - (ii) Take appropriate action; and
- (b) Remain alert for matters that may be relevant to the firm's monitoring and remediation process and communicate to those responsible for the process.

3.2.12. The engagement partner shall:

- (a) Take responsibility for differences of opinion being addressed and resolved in accordance with the firm's policies or procedures;
- (b) Take responsibility for consultations being undertaken in accordance with the firm's related policies or procedures, or where deemed necessary on difficult or contentious matters;
- (c) Determine that conclusions reached with respect to differences of opinion and difficult or contentious matters are documented, agreed with the party consulted and implemented; and
- (d) Not date the auditor's report until any differences of opinion are resolved.

Forming an objective view on the appropriateness of the judgments made in the course of the audit can present practical problems when the same individual also performs the entire audit. If unusual issues are involved, it may be desirable to consult with other suitably- experienced auditors or the auditor's professional body.

Consultation may be appropriate, or required by the firm's policies or procedures, when there are issues that are complex or unfamiliar, significant risks, significant transactions that are outside the

normal course of business, or that otherwise appear to be unusual, limitations imposed by management or non-compliance with law or regulation.

Differences of opinion may arise within the engagement team, or between the engagement team and the engagement quality reviewer, or even with individuals performing activities within the firm's system of quality management such as those responsible for providing consultation.

In considering matters related to differences of opinion, or difficult or contentious matters, the engagement partner may also consider whether the use of the ISA for LCE continues to be appropriate.

3.2.13. For audit engagements for which an engagement quality review is required, the engagement partner shall determine that an engagement quality reviewer has been appointed and:

- (a) Cooperate with the engagement quality reviewer;
- (b) Discuss significant matters and significant judgments arising during the audit with the engagement quality reviewer; and
- (c) Not date the auditor's report before the engagement quality review is complete.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

3.2.13A. The engagement partner shall review audit documentation at appropriate points in time during the audit, including documentation of:

- Significant matters;
- Significant judgments and the conclusions reached; and
- Other matters that, in the engagement partner's professional judgment, are relevant to the engagement partner's responsibilities.

The engagement partner exercises professional judgment in determining matters to review, for example, based on:

- *The nature and circumstances of the audit engagement.*
- *Which engagement team member performed the work.*
- *Matters from recent inspection findings.*
- *The requirements of the firm's policies or procedures.*

3.2.14. The engagement partner shall review, prior to their issuance, formal written communications to management, those charged with governance or regulatory authorities.

3.3. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

- 3.3.1. The auditor shall include in the audit documentation matters identified, relevant discussions, and conclusions reached with respect to fulfillment of responsibilities for relevant ethical requirements, including applicable independence requirements.

4. Acceptance or Continuance of an Audit Engagement and Initial Audit Engagements

Content of this Part

Part 4 sets out the auditor's responsibilities for:

- Agreeing the terms of the audit engagement with management, and where appropriate, those charged with governance. This includes establishing that certain preconditions for an audit are present.
- Determining that use of the ISA for LCE is appropriate for the audit engagement.

Part 4 also addresses activities related to initial audit engagements.

Scope of this Part

Part A of this standard sets out the authority for appropriate use of [the ISA for LCE](#)~~this standard~~. This Part sets out the engagement partner's obligations for use of this standard as part of the firm's acceptance or continuance procedures for an audit engagement of an LCE.

The information and audit evidence gathered during client acceptance and continuance procedures is used to make the determination that the ISA for LCE is appropriate for the audit engagement and also informs the auditor's procedures when planning the audit and for risk identification and assessment.

Part 1.2. sets out that this standard is premised on the basis that the firm is subject to ISQM 1 or to national requirements that are at least as demanding. ISQM 1 requires the firm to establish quality objectives that address the acceptance and continuance of client relationships and specific engagements. In addition, compliance with ISQM 1 may require firms to have policies or procedures to address other matters of relevance to this Part.

Audit engagements may only be accepted when the auditor considers that relevant ethical requirements such as independence and professional competence and due care will be satisfied and the preconditions for an audit are present. In addition, the auditor considers the performance of non-assurance services for the audit client and whether these services are permissible.

If the audit is an initial engagement, this Part also sets out the auditor's responsibilities relating to opening balances.

4.1. Objectives

4.1.1. The objectives of the auditor are:

- (a) To accept or continue an audit engagement only when the basis upon which it is to be performed has been agreed, through:
 - (i) Establishing whether the preconditions for an audit are present; and
 - (ii) Confirming that there is a common understanding between the auditor and management, and where appropriate, those charged with governance, of the terms of the audit engagement.
- (b) For initial audit engagements, to obtain sufficient appropriate audit evidence about whether:

- (i) Opening balances contain misstatements that materially affect the current period's financial statements, and
- (ii) Appropriate accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements, or changes thereto are appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.

~~4.2. Determining that the ISA for LCE is Appropriate for the Audit Engagement~~

~~4.2.1. The engagement partner shall determine, in accordance with Part A of this standard, that the audit engagement can be undertaken using the ISA for LCE.~~

[EEM Moved to under paragraph 4.4.1.]

4.3. Preconditions for an Audit

4.3.1. In order to establish whether the preconditions for an audit are present, the auditor shall:

- (a) Determine whether the financial reporting framework to be applied in the preparation of the financial statements is acceptable;
- (b) Obtain the agreement of management ~~and where appropriate, those charged with governance,~~ that it acknowledges and understands its responsibility:
 - (i) For the preparation of the financial statements in accordance with the applicable financial reporting framework, including where relevant their fair presentation;
 - (ii) For such controls as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
 - (iii) To provide the auditor with:
 - a. Access to all information of which management is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
 - b. Additional information that the auditor may request from management for the purpose of the audit; and
 - c. Unrestricted access to persons within the entity from whom the auditor determines it necessary to obtain audit evidence.

4.3.2. If the preconditions for an audit are not present, the auditor shall discuss the matter with management. Unless required by law or regulation to do so, the auditor shall not accept the proposed audit engagement:

- (a) If the auditor has determined that the financial reporting framework to be applied in the preparation of the financial statements is unacceptable; or
- (b) If the agreement of management that it acknowledges and understands its responsibility has not been obtained.

- 4.3.3. If management or those charged with governance impose a limitation on the scope of the auditor's work such that the auditor believes that the limitation will result in the auditor disclaiming the opinion on the financial statements, the auditor shall not accept such a limited engagement as an audit engagement, unless required by law or regulation to do so.

4.4. **Additional Considerations in Engagement Acceptance or Continuance**

- 4.4.1. The engagement partner shall determine that the firm's policies or procedures regarding acceptance and continuance of the audit engagement have been followed¹¹ and that conclusions reached in this regard are appropriate, including the appropriate use of the ISA for LCE in accordance with Part A of this standard.

Part A sets out the matters relevant to the engagement partner ~~for's determination~~ in determining the appropriate use of the ISA for LCE, in particular in relation to the limitations for using ~~this~~ this standard. ~~This determination is made when the engagement partner is determining that the firm's policies or procedures regarding acceptance and continuance have been followed (see paragraph 4.4.1.).~~

*Information and audit evidence gathered during client acceptance and continuance procedures may be used to make the determination about use of the ISA for LCE. Further information may also be obtained when performing risk identification and assessment procedures that may change the engagement partner's initial determination about use of the ISA for LCE in accordance with this Part. Part 6 (see paragraph 6.5.A) requires the engagement partner to determine whether the ISA for LCE continues to be appropriate for the nature and circumstances of the entity being audited during the risk identification and assessment process. Consideration of further information throughout the audit may change the engagement partner's determination about the appropriateness of the use of the ISA for LCE. **[Moved from EEM under paragraph 4.2.1.]***

- 4.4.2. In some cases, law or regulation of the relevant jurisdiction prescribes the layout or wording of the auditor's report in a form or in terms that are significantly different from the requirements of this standard. In these circumstances, the auditor shall evaluate:
- (a) Whether users may misunderstand the assurance obtained from the audit of the financial statements, and, if so,
 - (b) Whether additional explanation in the auditor's report can mitigate possible misunderstanding.
- 4.4.3. If the auditor concludes that additional explanation in the auditor's report cannot mitigate possible misunderstanding, the auditor shall not accept the audit engagement, unless required by law or regulation to do so. An audit conducted in accordance with such law or regulation does not comply with the ISA for LCE. Accordingly, the auditor shall not include any reference within the auditor's report to the audit having been conducted in accordance with this ISA for LCE.

¹¹ International Standard on Quality Management (ISQM) 1, *Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements*, paragraph 30 sets out the firm's responsibilities for establishing quality objectives for the acceptance of specific engagements, including judgments relating to financial and operating priorities of the firm when deciding to accept or continue specific engagements.

4.5. Terms of the Audit Engagement

Performing acceptance or continuance procedures before planning commences assists the auditor in identifying and evaluating events or circumstances that may adversely affect the auditor's ability to plan and perform the current engagement.

- 4.5.1. The auditor shall agree the terms of the audit engagement with management, or where appropriate, those charged with governance.

If law or regulation prescribes the responsibilities of management that are equivalent in effect to what this standard requires, the auditor may use the wording of the law or regulation to describe them in the written agreement.

[Appendix 2 sets out an illustrative engagement letter.](#)

- 4.5.2. On recurring audits, the auditor shall assess whether circumstances require the terms of the audit engagement to be revised and whether there is a need to remind the entity of the existing terms of the audit engagement.
- 4.5.3. The auditor shall not agree to a change in the terms of the audit engagement where there is no reasonable justification for doing so.
- 4.5.4. If, prior to completing the audit engagement, the auditor is requested to change the audit engagement to an engagement that conveys a lower level of assurance, the auditor shall determine whether there is reasonable justification for doing so.

Before agreeing to change an audit engagement to a review or a related service, the auditor may need to assess any legal or contractual implications of the change.

- 4.5.5. If the terms of the audit engagement are changed, the auditor and management shall agree on and record the new terms of the engagement in an engagement letter or other suitable form of written agreement.
- 4.5.6. If the auditor is unable to agree to a change of the terms of the audit engagement and is not permitted by management to continue the original audit engagement, the auditor shall:
- (a) Withdraw from the audit engagement where possible under applicable law or regulation; and
 - (b) Determine whether there is any obligation, either contractual or otherwise, to report the circumstances to other parties, such as those charged with governance, owners or regulators.

4.6. Initial Audit Engagements

- 4.6.1. If the engagement is an initial audit and there has been a change in auditor, the auditor shall communicate with the predecessor auditor, in compliance with relevant ethical requirements.
- 4.6.2. The auditor shall read the most recent financial statements, if any, and the auditor's report thereon, if any, for information relevant to opening balances, including disclosures.
- 4.6.3. If the prior period's financial statements were audited by a predecessor auditor and there was a modification to the opinion, the auditor shall evaluate the effect of the matter giving rise to the

modification in assessing the risks of material misstatement in the current period's financial statements.¹²

4.6.4. The auditor shall obtain sufficient appropriate audit evidence¹³ about whether the opening balances contain misstatements that materially affect the current period's financial statements by:

- (a) Determining whether the prior period's closing balances have been correctly brought forward to the current period or, when appropriate, have been restated;
- (b) Determining whether the opening balances reflect the application of appropriate accounting policies; and
- (c) Performing one or more of the following:
 - (i) Where the prior year financial statements were audited, inspecting the predecessor auditor's working papers to obtain evidence regarding the opening balances;
 - (ii) Evaluating whether audit procedures performed in the current period provide evidence relevant to the opening balances; or
 - (iii) Performing specific audit procedures to obtain evidence regarding the opening balances.

The nature and extent of audit procedures necessary to obtain sufficient appropriate audit evidence regarding opening balances depend on such matters as:

- *The accounting policies followed by the entity.*
- *The nature of the account balances, classes of transactions and disclosures and the risks of material misstatement in the current period's financial statements.*
- *The significance of the opening balances relative to the current period's financial statements.*
- *Whether the prior period's financial statements were audited and, if so, whether the predecessor auditor's opinion was modified.*

4.6.5. If the auditor obtains audit evidence that the opening balances contain misstatements that could materially affect the current period's financial statements, the auditor shall perform such additional audit procedures as are appropriate in the circumstances to determine the effect on the current period's financial statements.¹⁴

4.6.6. The auditor shall obtain sufficient appropriate audit evidence about whether the accounting policies reflected in the opening balances have been consistently applied in the current period's financial statements, and whether any changes in accounting policies have been appropriately accounted for and adequately presented and disclosed in accordance with the applicable financial reporting framework.¹⁵

¹² For the effect on the auditor's report see Part 9, paragraph 9.5.1.I.

¹³ For the effect on the auditor's report see Part 9, paragraph 9.5.1.F.

¹⁴ For the effect on the auditor's report see Part 9, paragraph 9.5.1.G.

¹⁵ For the effect on the auditor's report see Part 9, paragraph 9.5.1.H.

4.7. Specific Communication Requirements

Communications with Those Charged with Governance

- 4.7.1. The auditor shall communicate with those charged with governance the auditor's responsibilities for forming and expressing an opinion on the financial statements prepared by management, and that the auditor's responsibilities do not relieve management or those charged with governance from their responsibilities for oversight of the preparation of the financial statements.

4.8. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

- 4.8.1. The auditor shall include in the audit documentation matters identified, relevant discussions with personnel, and conclusions reached with respect to the acceptance and continuance of the client relationship and audit engagement.
- 4.8.2. The auditor shall document the basis for the determination made for using the ISA for LCE.
- 4.8.3. The auditor shall document changes, if any, to the determination of the use of the ISA for LCE if further information comes to the auditor's attention during the audit that may change the professional judgment made in this regard.
- 4.8.4. The auditor shall record in an audit engagement letter or other suitable form of written agreement:
- (a) That the audit will be undertaken using the ISA for LCE;
 - ~~(a)~~(b) The objective and scope of the audit of the financial statements;
 - ~~(b)~~(c) The respective responsibilities of the auditor and management;
 - ~~(c)~~(d) Identification of the applicable financial reporting framework for the preparation of the financial statements;
 - ~~(d)~~(e) Reference to the expected form and content of any reports to be issued by the auditor; and
 - (f) A statement that there may be circumstances in which a report may differ from its expected form and content.
- 4.8.5. If law or regulation prescribes in sufficient detail the terms of the audit engagement referred to in this standard, the auditor need not record them in a written agreement, except for the fact that such law or regulation applies, and that management acknowledges and understands its responsibilities.

5. Planning

Content of this Part

Part 5 sets out the auditor's responsibility to plan the audit (including holding an engagement team discussion), and the concept of materiality when planning and performing the audit.

Scope of this Part

Planning is continual and is not a discrete phase of the audit but is iterative, as necessary, throughout the audit. Part 6, identifying and assessing risks of material misstatement, and Part 7, responding to assessed risks of material misstatement, are also relevant to this Part.

Some requirements within this Part are linked to procedures in other Parts and may require the auditor to ~~execute on~~ perform those procedures in order to meet the requirements in this Part.

5.1. Objectives

5.1.1. The objectives of the auditor are to:

- (a) Plan the audit so that it will be performed in an effective manner; and
- (b) Apply the concept of materiality appropriately in planning and performing the audit.

5.2. Planning Activities

The nature, timing and extent of planning activities will vary according to the nature and circumstances of the entity, the size and nature of the engagement team, the engagement team members' previous experience with the entity and any changes in circumstances that occur during the audit engagement.

~~*When an engagement is carried out by a single individual some of the requirements may not be relevant (e.g., the engagement team discussion), however consideration may still be given to the matters within the relevant paragraphs as they may still assist the auditor.*~~

The purpose and objective of planning the audit are the same whether the audit is an initial or recurring engagement. However, for an initial audit, the auditor may need to expand the planning activities because the auditor does not ordinarily have the previous experience with the entity that is considered when planning recurring engagements.

5.2.1. **[Moved to paragraph 5.2.5A.]**

5.2.2. The auditor shall set the scope, timing and direction of the audit and:

- (a) Identify the characteristics of the engagement that define its scope;
- (b) Ascertain the reporting objectives of the engagement to plan the timing of the audit and the nature of the communications required;
- (c) Consider the factors that, in the auditor's professional judgment, are significant in directing the engagement team's efforts;

- (d) Consider the results of preliminary engagement activities and, where applicable, whether knowledge gained on other engagements performed by the engagement partner for this entity is relevant; and
- (e) Ascertain the nature, timing and extent of procedures to be performed and the resources necessary to perform the audit, including determining whether experts are needed; and
- (f) **[Moved to paragraph 5.2.5B.]**

In the audit of an LCE, establishing the scope, timing and direction of the audit need not be a complex or time-consuming exercise. For example, a brief memorandum prepared after the previous audit, based on a review of the working papers and highlighting issues identified in the audit just completed, updated in the current period based on discussions with the owner-manager, can serve as the documented scope, timing and direction for the current audit engagement. Standard audit programs or checklists created based on the assumption of few identified controls, as is likely to be the case in a less complex entity, may be used provided that they are tailored to the circumstances of the engagement, including the auditor's risk assessments.

5.2.3. The engagement partner shall take into account information obtained in the acceptance and continuance process in planning and performing the audit.

5.2.4. When information used to plan and perform the audit has been obtained from the previous experience with the entity, or prior audits, the auditor shall evaluate whether such information remains relevant and reliable as audit evidence in the current period.

5.2.5. The auditor shall update and change the scope, timing and direction as necessary during the audit.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

5.2.5A. The engagement partner and other key members of the engagement team shall be involved in planning the audit. **[Moved from paragraph 5.2.1.]**

5.2.5B. The auditor shall plan the nature, timing and extent of direction and supervision of engagement team members and review of their work. **[Moved from paragraph 5.2.2.(f)]**

Engagement Team Discussion

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

5.2.6. The engagement partner and other key engagement team members shall discuss the susceptibility of the entity's financial statements to material misstatement, including:

- (a) The application of the applicable financial reporting framework to the entity's facts and circumstances.
- (b) How and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud may occur, and how fraud or error could arise from related party relationships or transactions.

Discussions among the engagement team shall occur setting aside beliefs the engagement team may have that management, and where appropriate, those charged with governance are honest and have integrity.

The engagement team discussion may also include other matters related to the audit such as logistical, operational or other matters (such as when risks of material misstatement may have changed from prior years or matters related to relevant ethical requirements including independence) and the timing of the audit and communications that are required.

5.2.7. When there are engagement team members not involved in the discussion, the engagement partner shall determine which matters are to be communicated to those members.

Using the Work of Management's Expert

5.2.8. If information to be used as audit evidence has been prepared using the work of management's expert, the auditor shall, having regard to the significance of that expert's work for the auditor's purpose:

- (a) Evaluate the competence, capabilities and objectivity of that expert; and
- (b) Obtain an understanding of the work of that expert; ~~and~~
- (c) **[Moved to paragraph 7.4.26A.]**

Evaluating the Competence, Capabilities and Objectivity of a Management's Expert

Competence relates to the nature and level of expertise of the management's expert. Capability relates to the ability of the management's expert to exercise that competence in the circumstances. ~~Factors that influence capability may include, for example, geographic location, and the availability of time and resources.~~ Objectivity relates to the possible effects that bias, conflict of interest or the influence of others may have on the professional or business judgment of the management's expert. Matters relevant to evaluating the competence, capabilities and objectivity of a management's expert may include whether that expert's work is subject to technical performance standards or other professional or industry requirements.

Obtaining an Understanding of the Work of the Management's Expert

When obtaining an understanding of the work of the management's expert, evaluating the agreement between the entity and that expert may assist the auditor in determining the appropriateness of the following for the auditor's purposes:

- *The nature, scope and objectives of that expert's work;*
- *The respective roles and responsibilities of management and that expert; and*
- *The nature, timing and extent of communication between management and that expert, including the form of any report to be provided by that expert.*

[Moved to EEM under paragraph 7.4.26A.]

Determining Whether to Use the Work of an Auditor's Expert

- 5.2.9. If expertise in a field other than accounting or auditing is necessary to obtain sufficient appropriate audit evidence, the auditor shall determine whether to use the work of an auditor's expert.

If the preparation of the financial statements involves the use of expertise in a field other than accounting, the auditor, who is skilled in accounting and auditing, may not possess the necessary expertise to audit those financial statements. ~~The engagement partner is required to be satisfied that the engagement team, and any auditor's experts who are not part of the engagement team, collectively have the appropriate competence and capabilities to perform the audit engagement. Further, the auditor is required to ascertain the nature, timing and extent of resources necessary to perform the engagement.~~ The auditor's determination of whether to use the work of an auditor's expert, and if so when and to what extent, assists the auditor in meeting these requirements in paragraphs 3.2.7. and 5.2.2.(e). As the audit progresses, or as circumstances change, the auditor may need to revise earlier decisions about using the work of an auditor's expert.

The auditor has sole responsibility for the audit opinion expressed, and that responsibility is not reduced by the auditor's use of the work of an auditor's expert. Nonetheless, if the auditor using the work of an auditor's expert concludes, based on the audit procedures performed and the evidence obtained, that the work of that expert is adequate for the auditor's purposes, the auditor may accept that expert's findings or conclusions in the expert's field as appropriate audit evidence.

- 5.2.10. The auditor shall consider the following when determining the nature, timing and extent of procedures related to the auditor's expert:

- (a) The nature of the matter to which that expert's work relates;
- (b) The risks of material misstatement in the matter to which that expert's work relates;
- (c) The significance of that expert's work in the context of the audit;
- (d) The auditor's knowledge of and experience with previous work performed by that expert; and
- (e) Whether that expert is subject to the auditor's firm's quality management policies or procedures.

- 5.2.11. If the auditor is using the work of an auditor's expert, the auditor shall:

- (a) Evaluate whether the auditor's expert has the necessary competence, capabilities and objectivity, including inquiry regarding interests and relationships that may create a threat to objectivity, for the auditor's purpose;
- (b) Obtain sufficient understanding of the field of expertise to enable the auditor to determine the nature, scope and objectives of the auditor's expert work and evaluate that work for the auditor's purpose; and
- (c) Agree in writing with the auditor's expert the nature, scope and objectives of the expert's work, the respective roles and responsibilities of the expert and the auditor in relation to that work, the nature, timing and extent of communications and the need for the expert to observe confidentiality requirements.

5.3. Materiality

5.3.1. The auditor shall determine materiality for the financial statements as a whole.

Materiality in the Context of an Audit

The concept of materiality is applied by the auditor in both planning and performing the audit, and in evaluating the effect of identified misstatements on the audit and of uncorrected misstatements if any, on the financial statements and in forming an opinion in the auditor's report.

The auditor's determination of materiality is a matter of professional judgment, and is affected by the auditor's perception of the financial information needs of users of the financial statements.

The auditor's professional judgment about misstatements that will be considered material provides a basis for:

- Determining the nature, timing and extent of procedures to identify and assess risks of material misstatement;*
- Identifying and assessing the risks of material misstatement; and*
- Determining the nature, timing and extent of further audit procedures.*

Use of Benchmarks in Determining Materiality for the Financial Statements as a Whole

A percentage is often applied to a chosen benchmark as a starting point in determining materiality for the financial statements as a whole. Factors that may affect the identification of an appropriate benchmark include the following:

- The elements of the financial statements (for example, assets, liabilities, equity, revenue, expenses)*
- Whether there are ~~elements~~ items of the entity's financial statements on which the attention of the users tends to be focused. ~~For example, assets, liabilities, equity, revenue, expenses;~~*
- The nature of the entity, where the entity is in its life cycle, and the industry and economic environment in which the entity operates;*
- The entity's ownership structure and the way it is financed. For example, if an entity is financed solely by debt rather than equity, users may put more emphasis on assets, and claims on them, than on the entity's earnings; and*
- The relative volatility of the benchmark.*

Examples of benchmarks that may be appropriate, depending on the circumstances of the entity, include categories of reported income such as profit before tax, total revenue, gross profit and total expenses, total equity or net asset value. Profit before tax from continuing operations is often used for profit-oriented entities. When profit before tax from continuing operations is volatile, other benchmarks may be more appropriate, such as gross profit or total revenues.

When an entity's profit before tax from continuing operations is consistently nominal, as might be the case for an owner-managed business where the owner takes much of the profit before tax in the form of remuneration, a benchmark such as profit before remuneration and tax may be more relevant.

~~There is a relationship between the percentage and the chosen benchmark, such that a percentage applied to profit before tax from continuing operations will normally be higher than a percentage applied to total revenue. For example, the auditor may consider five percent of profit before tax from continuing operations to be appropriate for a profit-oriented entity in a manufacturing industry, while the auditor may consider one percent of total revenue or total expenses to be appropriate for a not-for-profit entity. Higher or lower percentages, however, may be deemed appropriate in the circumstances.~~

Considerations Specific to Public Sector Entities

In the case of a public sector entity, legislators and regulators are often the primary users of its financial statements. Furthermore, the financial statements may be used to make decisions other than economic decisions. The determination of materiality for the financial statements as a whole in an audit of the financial statements of a public sector entity is therefore influenced by law, regulation or other authority, and by the financial information needs of legislators and the public in relation to public sector programs.

In an audit of a public sector entity, total cost or net cost (expenses less revenues or expenditure less receipts) may be appropriate benchmarks for program activities. Where a public sector entity has custody of public assets, assets may be an appropriate benchmark.

- 5.3.2. The auditor shall also determine the materiality level or levels to be applied to particular classes of transactions, account balances or disclosures if, in the specific circumstances of the entity, there is one or more particular classes of transactions, account balances or disclosures for which misstatements of lesser amounts than materiality for the financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.
- 5.3.3. The auditor shall determine performance materiality for the purposes of assessing the risks of material misstatement and determining the nature, timing and extent of further audit procedures.

Planning the audit solely to detect individually material misstatements overlooks the fact that the aggregate of individually immaterial misstatements may cause the financial statements to be materially misstated, and leaves no margin for possible undetected misstatements. Performance materiality (which, as defined, is one or more amounts) is set to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

The determination of performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. It is affected by the auditor's understanding of the entity, updated during the performance of the risk assessment procedures; and the nature and extent of misstatements identified in previous audits and thereby the auditor's expectations in relation to misstatements in the current period.

Clearly Trivial Misstatements

Part 7 requires the auditor to accumulate misstatements identified during the audit, other than those that are clearly trivial. During planning, the auditor may designate an amount below which misstatements of amounts in the individual statements would be clearly trivial, and would not need

to be accumulated because the auditor expects that the accumulation of such amounts clearly would not have a material effect on the financial statements.

- 5.3.4. The auditor shall revise materiality for the financial statements as a whole (and, if applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures) if the auditor becomes aware of information during the audit that would have caused the auditor to have determined a different amount (or amounts) initially.
- 5.3.5. If the auditor concludes that a lower materiality for the financial statements as a whole (and, if applicable, materiality level or levels for particular classes of transactions, account balances or disclosures) than that initially determined is appropriate, the auditor shall determine whether it is necessary to revise performance materiality, and whether the nature, timing and extent of the further audit procedures remain appropriate.

5.4. Specific Communication Requirements

- 5.4.1. The auditor shall communicate ~~with~~^{to} management, and where appropriate, those charged with governance an overview of the planned scope, timing and direction of the audit.

5.5. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~^{at} Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

- 5.5.1. The auditor shall include in the audit documentation a description of the scope, timing and direction of the audit, and significant changes made during the audit, together with the reasons for such changes.
- 5.5.3. The auditor shall document ~~the discussion among the engagement team and~~ significant decisions reached including significant decisions regarding the susceptibility of the entity's financial statements to material misstatement due to fraud or error.
- 5.5.4. The auditor shall include in the audit documentation the following amounts and the factors considered in their determination of materiality (including any revisions as applicable):
- (a) Materiality for the financial statements as a whole;
 - (b) If applicable, the materiality level or levels for particular classes of transactions, account balances or disclosures;
 - (c) Performance materiality; and
 - (d) ~~If calculated, t~~^{he} amount below which misstatements would be considered clearly trivial.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

5.5.4A. The auditor shall document the discussion among the engagement team.

6. Risk Identification and Assessment

Content of this Part

Part 6 contains the requirements relevant to the auditor's responsibility to perform procedures and related activities to:

- Understand the entity and its environment, the applicable financial reporting framework, and the entity's system of internal control;
- Identify risks of material misstatement at the financial statement and assertion levels, whether due to fraud or error; and
- Assess inherent risk and control risk.

Appendix [32](#) illustrates the iterative nature of the auditor's risk identification and assessment.

Scope of this Part

This Part deals with the auditor's responsibility to identify and assess the risks of material misstatement in the financial statements, which provides the basis for the audit procedures undertaken to respond to assessed risks in Part 7. Part 5 sets out the auditor's obligations for planning activities, including the requirements for the engagement team discussion.

6.1. Objectives

- 6.1.1. The objectives of the auditor are to identify and assess the risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels, thereby providing a basis for designing and implementing responses to the assessed risks of material misstatement.

Understanding the entity and its environment, the applicable financial reporting framework and the entity's system of internal control enables the auditor to identify and assess the risks of material misstatement. The auditor's risk identification and assessment process is iterative and dynamic.

6.2. Procedures for Identifying and Assessing Risks and Related Activities

- 6.2.1. The auditor shall design and perform procedures to obtain audit evidence that provides an appropriate basis for:

- (a) The identification and assessment of risks of material misstatement, whether due to fraud or error, at the financial statement and assertion levels; and
- (b) The design of further audit procedures.

The auditor uses professional judgment to determine the nature and extent of the procedures to be performed, which may vary with the formality of the entity's policies or procedures.

Some less complex entities, and particularly owner-managed entities, may not have established structured processes and systems or may have established processes or systems with limited documentation or a lack of consistency in how they are undertaken. When such systems and processes lack formality, the procedures described in paragraph 6.2.2. are still required.

Designing and performing procedures to obtain audit evidence in a manner that is not biased towards obtaining audit evidence that may be corroborative or towards excluding audit evidence that may be

contradictory may involve obtaining evidence from multiple sources within and outside the entity. However, the auditor is not required to perform an exhaustive search to identify all possible sources of evidence.

6.2.1A. When obtaining audit evidence to identify and assess risks of material misstatement and design further audit procedures, the auditor shall consider information from:

- (a) The acceptance or continuance procedures; and
- (b) When applicable, other engagements performed by the engagement partner for the entity.

6.2.2. The procedures to identify and assess risks of material misstatement shall include:

- (a) Inquiries of management, and other appropriate individuals within the entity;
- (b) Analytical procedures; and
- (c) Observation and inspection.

The auditor is not required to perform all of these procedures for each aspect of the auditor's understanding required by this Part.

Analytical procedures help to identify inconsistencies, unusual transactions or events, and amounts, ratios, and trends that indicate matters that may have audit implications. Unusual or unexpected relationships that are identified may assist the auditor in identifying risks of material misstatement, especially risks of material misstatement due to fraud, including those relating to revenue accounts.

Analytical procedures performed as a risk assessment procedure may include both financial (e.g., sales price) and non-financial information (e.g., volume of goods sold) and the use of data aggregated at a high level. In the audit of an LCE, the auditor may perform a simple comparison of information, such as the change in interim or monthly account balances from balances in prior periods, to identify potential higher risk areas.

Observation and inspection may support, corroborate or contradict inquiries of management and others, and may also provide information about the entity and its environment. Where policies or procedures are not documented, or the entity's controls lack formality, the auditor may still be able to obtain some audit evidence to support the identification and assessment of the risks of material misstatement through observation or inspection of the performance of the control.

Considerations Specific to Public Sector Entities

When making inquiries of those who may have information that is likely to assist in identifying risks of material misstatement, auditors of public sector entities may obtain information from additional sources such as from the auditors that are involved in performance or other audits related to the entity. Procedures performed by auditors of public sector entities to identify and assess risks of material misstatement may also include observation and inspection of documents prepared by management for the legislature, for example documents related to mandatory performance reporting.

Automated Tools and Techniques

If the auditor uses ATT, the auditor may design and perform [audit](#) procedures to identify and assess risks of material misstatement on relatively large volumes of data (from the general ledger, sub-ledgers or other operational data) including for analysis, observation or inspection.

6.2.3. In designing and performing procedures to identify and assess risks of material misstatement, the auditor shall consider possible risks of material misstatement arising from:

- (a) Fraud or error;
- (b) Related parties; and
- (c) Events or conditions that may cast significant doubt on the entity's ability to continue as a going concern.

Fraud

Fraudulent financial reporting involves intentional misstatements, including omissions of amounts or disclosures in financial statements to deceive financial statement users. Fraudulent financial reporting often involves management override of controls that otherwise may appear to be operating effectively, such as recording fictitious journal entries close to the end of the financial reporting period.

Misappropriation of assets involves the theft of the entity's assets and is often perpetrated by employees in relatively small and immaterial amounts. However, it can also involve management who are usually more able to disguise or conceal misappropriations in ways that are difficult to detect.

Misappropriation of assets is often accompanied by false or misleading records or documents in order to conceal the fact that the assets are missing or have been pledged without proper authorization.

In a an LCE there may be different fraud risk factors than in more complex entities. On one hand, management or the owner-manager may be able to exercise more effective oversight than in a more complex entity which may compensate for more limited opportunities for segregation of duties. On the other hand, less segregation of duties and more direct involvement of management or the owner-manager may provide management or the owner manager ment with a greater opportunity to override controls and commit fraud. LCEs, including owner-managers may also have different pressures or incentives to commit fraud than management in more complex entities. Appendix 43 sets out fraud risk factors relevant to less complex entities.

Related Parties

In some LCEs, related party transactions between owner-managers and close family members may be common, in particular in closely held entities. These transactions may not be conducted under normal market terms and conditions; for example, some related party transactions may be conducted with no exchange of consideration, or for consideration significantly different from fair value.

Going Concern

Events or conditions that may cast significant doubt on the entity's ability to continue as a going concern of particular relevance to an LCE include the risk that banks and other lenders, close family members or owner-managers may cease to support the entity, as well as the possible loss of a principal supplier, major customer, key employee, or the right to operate under a license, franchise or other legal agreement.

6.2.6. If the audit opinion on the prior period's financial statements was modified, the auditor shall evaluate the effect on the current year's financial statements when identifying and assessing risks of material misstatement.

6.3. Understanding Relevant Aspects of the Entity

The auditor's understanding of relevant aspects of the entity, including the entity and its environment, the applicable financial reporting framework and the entity's system of internal control establishes a frame of reference in which the auditor identifies and assesses the risks of material misstatement, and also informs how the auditor plans and performs further audit procedures.

Inquiries of Management and Others within the Entity

6.3.A. The auditor shall inquire of management and, when ~~applicable~~appropriate, those charged with governance, regarding:

- (a) How the entity identifies business risks relevant to the preparation of the financial statements and how they are addressed;
- (b) The risks of fraud in the entity and the controls that management has established to mitigate these risks;
- (c) The nature and extent of management's direct involvement in operations or other activities that may help management to prevent or detect misstatements in accounting information, or identify controls that are not operating as intended.
- (d) The identity of the entity's related parties, including changes from the prior period; the nature of the relationships between the entity and these related parties; and whether the entity entered into any transactions with these related parties during the period and, if so, the type and purpose of the transactions; and
- (e) Whether the entity is in compliance with laws or regulations that may have an effect on the financial statements, and if there has been any correspondence with relevant licensing or regulatory authorities that may be relevant to the financial statements.
- (f) ~~Where applicable, the~~ basis for the intended use of the going concern basis of accounting, whether events or conditions exist that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going concern and, if so, management's plans to address them.

Inquiries of management and, when applicable, those charged with governance, assist the auditor to identify and assess risks of material misstatement and respond to those risks.

Inquiries about how the entity identifies and assesses its business risks relevant to the preparation of the financial statements may assist the auditor in understanding:

- *Where there are identified business risks;*
- *Whether, and how the entity has responded to those risks;*
- *Whether the risks faced by the entity have been identified, assessed and addressed as appropriate to the nature and circumstances of the entity.*

Inquiries about the risks of material misstatement due to fraud in the entity may assist the auditor in understanding:

- *Management's assessment of the risk that the financial statements may be materially misstated due to fraud, including the nature, extent and frequency of such assessments;*

- *Management's process for identifying and responding to the risks of fraud in the entity, including any specific risks of fraud that management has identified or that have been brought to its attention, or classes of transactions, account balances, or disclosures for which a risk of fraud is likely to exist;*
- *Management's communication, if any, to those charged with governance regarding its processes for identifying and responding to the risks of fraud in the entity;*

Inquiring about how management performs activities to prevent or detect misstatements in accounting information and identifies controls that are not operating as intended may include inquiring about what information management uses and the basis upon which management considers the information to be sufficiently reliable, as well as inquiring about how deficiencies are remediated. These inquiries assist the auditor to understand whether the other aspects of the entity's internal control system are present and functioning as appropriate to the entity's circumstances considering the nature and complexity of the entity.

Under the going concern basis of accounting, the financial statements are prepared on the assumption that the entity is a going concern and will continue its operations for the foreseeable future. General purpose financial statements are prepared using the going concern basis of accounting, unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative but to do so. When the use of the going concern basis of accounting is appropriate, assets and liabilities are recorded on the basis that the entity will be able to realize its assets and discharge its liabilities in the normal course of business.

6.3.B. The auditor shall make inquiries of management, ~~and, where appropriate,~~ those charged with governance, and ~~as appropriate~~ others within the entity ~~as appropriate~~, to determine whether they have knowledge of any actual, suspected or alleged fraud affecting the entity.

Understanding the Entity and Its Environment

6.3.1. The auditor shall obtain an understanding of:

- The entity's organizational structure, ownership and governance, and business model.
- The industry and other external factors affecting the entity.
- How the entity's financial performance is measured.
- The legal and regulatory framework applicable to the entity, and how the entity is complying with that framework.
- The entity's transactions and other events and conditions that may give rise to the need for, or changes in, accounting estimates to be recognized or disclosed.
- Agreements or relationships that may result in unrecognized liabilities or future commitments.

Understanding the entity's business model helps the auditor to understand the entity's objectives and strategy, and to understand the business risks the entity takes and faces. Understanding the entity's business risks assists the auditor in identifying risks of material misstatement, since most business risks will eventually have financial consequences and, therefore, an effect on the financial statements. When obtaining an understanding of the entity's business model, the auditor may consider how the entity uses IT.

Relevant industry factors include industry conditions such as the competitive environment, supplier and customer relationships, and technological developments. Other external factors affecting the entity that the auditor may consider include climate-related risks, the general economic conditions, interest rates and availability of financing, and inflation or currency revaluation.

When understanding agreements or relationships that may result in unrecognized liabilities or future commitments the auditor may consider inspecting minutes of meetings and correspondence with legal counsel and inspecting legal expense accounts.

Considerations Specific to Public Sector Entities

Entities operating in the public sector may create and deliver value in different ways to those creating wealth for owners but will still have a 'business model' with a specific objective. Matters public sector auditors may obtain an understanding of that are relevant to the business model of the entity, include:

- Knowledge of relevant government activities, including related programs.*
- Program objectives and strategies, including public policy elements.*

Understanding the Applicable Financial Reporting Framework

6.3.3. The auditor shall obtain an understanding of:

- (a) The applicable financial reporting framework including, for accounting estimates, the recognition criteria, measurement bases, and the related presentation and disclosure requirements and how these apply in the context of the nature and circumstances of the entity and its environment.
- (b) The entity's accounting policies and reasons for any changes thereto.

6.3.4. The auditor shall evaluate whether the entity's accounting policies are appropriate and consistent with the applicable financial reporting framework.

Understanding the Entity's System of Internal Control

In less complex entities, and in particular owner-managed entities, the way in which the entity's system of internal control is designed, implemented and maintained will vary with the entity's size and complexity. When there are no formalized processes or documented policies or procedures, the auditor is still required to obtain an understanding of how management, or where appropriate, those charged with governance prevent and detect fraud and error, and use professional judgment to determine the nature and extent of the procedures to obtain the required understanding.

Considerations Specific to Public Sector Entities

Auditors of public sector entities often have additional responsibilities with respect to internal control, for example, to report on compliance with an established code of practice or reporting on spending against budget. Auditors of public sector entities may also have responsibilities to report on compliance with law, regulation or other authority. As a result, their considerations about the system of internal control may be broader and more detailed.

Understanding the Entity's Control Environment

6.3.6. The auditor shall:

- (a) Obtain an understanding of the control environment relevant to the preparation of the financial statements; and
- (b) Evaluate whether the control environment provides an appropriate foundation for the entity's system of internal control considering the nature and complexity of the entity.

The auditor's understanding may include:

- *How management, and where appropriate, those charged with governance, oversee the entity, demonstrate integrity and ethical values, for example, through communication to employees regarding expectations for business practices and ethical behavior;*
- *The culture of the entity, including whether management supports honesty and ethical behavior;*
- *The entity's assignment of authority and responsibility;*
- *How the entity attracts, develops, and retains competent individuals; and*
- *When applicable, how owner-managers are actively involved in the business and how this may impact the risks arising from management override of controls due to lack of segregation of duties.*

The control environment provides an overall foundation for the operation of the other aspects of the entity's system of internal control, and deficiencies may undermine the rest of the entity's system of internal control. Although it does not directly prevent or detect and correct misstatements, it may influence the effectiveness of other controls in the system of internal control. The control environment includes the governance and management functions and the attitudes, awareness and actions of those charged with governance and management concerning the entity's system of internal control and its importance in the entity.

Because the control environment is foundational to the entity's system of internal control, any deficiencies could have pervasive effects on the preparation of the financial statements. Therefore, the auditor's understanding and evaluation of the control environment affects the auditor's identification and assessment of risks of material misstatement at the financial statement level, and may also affect the identification and assessment of risks of material misstatement at the assertion level, as well as the auditor's responses to the assessed risks.

Some or all aspects of the control environment for an LCE may not be applicable or may be less formalized. For example, an LCE may not have a written code of conduct but, instead, may have developed a culture that emphasizes the importance of integrity and ethical behavior through oral communication and by management example.

Some entities may be dominated by a single individual who may exercise a great deal of discretion. The actions and attitudes of that individual may have a pervasive effect on the culture of the entity, which in turn may have a pervasive effect on the control environment. Domination of management by a single individual in an LCE does not generally, in and of itself, indicate a failure by management to display and communicate an appropriate attitude regarding internal control and the financial

reporting process. In some entities, the need for management authorization can compensate for otherwise deficient controls and reduce the risk of employee fraud. However, domination of management by a single individual can be a potential control deficiency since there is an opportunity for management override of controls.

Understanding the Entity's Process to Prepare its Financial Statements

6.3.9. For significant classes of transactions, account balances and disclosures, The auditor shall obtain an understanding of the entity's process to prepare its financial statements, ~~by understanding including, for significant classes of transactions, account balances and disclosures:~~

- (a) The accounting records and other records that support the classes of transactions, account balances and disclosures in the financial statements;
- (b) How transactions are initiated, and how information about them is recorded, processed, corrected as necessary, transferred to the general ledger and reported in the financial statements;
- (c) How information about events and conditions, other than transactions are identified, processed and disclosed; and
- (d) The entity's resources, including the IT environment, relevant to (a) to (c) above.

Matters the auditor may consider when obtaining an understanding of the entity's process to prepare its financial statements relating to significant classes of transactions, account balances and disclosures include how:

- The data or information relating to transactions, other events and conditions are processed;
- The integrity of that data or information is maintained; and
- The information processes, personnel and other resources are used.

The auditor's understanding may be obtained in various ways and may include:

- *Inquiries of relevant personnel about the procedures used to initiate, record, process and report transactions or about the entity's financial reporting process;*
- *Inspection of policy or process manuals or other documentation of the entity's process to prepare the financial statements;*
- *Observation of the performance of the policies or procedures by entity's personnel; or*
- *Selecting transactions and tracing them through the applicable process to prepare the financial statements (i.e., performing a walk-through).*

Less complex entities with direct management involvement may not need extensive descriptions of accounting procedures, sophisticated accounting records, or written policies.

Automated Tools and Techniques

The auditor may also use ATT to obtain direct access to, or a digital download from, the databases in the entity's information system that store accounting records of transactions. By applying ATT to this information, the auditor may confirm the understanding obtained about how transactions flow

through the information system by tracing journal entries, or other digital records related to a particular transaction, or an entire population of transactions, from initiation in the accounting records through to recording in the general ledger. Analysis of complete or large sets of transactions may also result in the identification of variations from the normal, or expected processing procedures for these transactions, which may result in the identification of risks of material misstatement.

6.3.12. For accounting estimates and related disclosures for significant classes of transactions, account balances or disclosures, the auditor shall obtain an understanding of how management:

- (a) Identifies, selects and applies relevant methods, assumptions and data that are appropriate in the context of the applicable financial reporting framework, including identification of significant assumptions;
- (b) Understands the degree of estimation uncertainty and addresses such uncertainty, including selecting a point estimate and related disclosures for inclusion in the financial statements; and
- (c) Reviews the outcome(s) of previous accounting estimates and responds to the results of that review.

6.3.12A. The auditor shall evaluate whether the entity's process to prepare its financial statements, including for accounting estimates, appropriately supports the preparation of its financial statements in accordance with the applicable financial reporting framework.

Understanding the Services Provided by a Service Organization

6.3.12B. If the entity uses the services of a service organization and those services are relevant to the entity's process to prepare its financial statements, the auditor's understanding in accordance with paragraph 6.3.9. shall ~~shall obtain an understanding of~~ include:

- (a) The nature of the services provided by the service organization and the significance of those services to the entity including the effect thereof on the user entity's system of internal control;
- (b) The nature and materiality of the transactions processed or accounts or financial reporting processes affected by the service organization; ~~and~~
- ~~(c)~~ The degree of interaction between the activities of the service organization and those of the user entity; and
- ~~(d)~~ The relevant contractual terms for the activities undertaken by the service organization.

The auditor's understanding should be sufficient to provide an appropriate basis for the identification and assessment of the risks of material misstatement.

Less complex entities may often use external bookkeeping services ranging from the processing of certain transactions (for example, processing of payroll and payment of payroll taxes) and maintenance of their accounting records to the preparation of their financial statements. The use of such a service organization for the preparation of its financial statements does not relieve management of the less complex entity and, where appropriate, those charged with governance of their responsibilities for the financial statements [EEM moved from under paragraph 7.4.26].

The services of a service organization are relevant to the entity's process to prepare its financial statements when those services, and the controls over them, are part of, or affect the process described ~~in~~ paragraph 6.3.9. ~~Where the services of a service organization are relevant to an~~

~~entity's process to prepare its financial statements, an understanding of the matters above are obtained in addition to the understanding obtained at paragraph 6.3.9.~~

~~The auditor's understanding will inform the auditor about the nature and significance of the services provided by the service organization and their effect on the entity's system of internal control at the user entity, which affect the nature and extent of work to be performed by the auditor regarding the services provided by a service organization. The significance of the controls of the service organization relative to those of the entity, which may also be demonstrated by depends on the degree of interaction between the service organization's activities and those of the entity. For example, the service organization may process and account for transactions that are still required to be authorized by the entity, alternatively the entity may rely on such controls being affected at the service organization. The nature and extent of work to be performed by the auditor regarding the services provided by a service organization depend on the nature and significance of those services to the entity and the relevance of those services to the audit.~~

Understanding the Entity's Control Activities

6.3.14. The auditor shall obtain an understanding of the entity's control activities by identifying controls that address risks of material misstatement at the assertion level as set out below. For each control identified in (a)–(e) below, the auditor shall perform procedures, beyond inquiry, to evaluate whether the control is designed effectively and has been implemented:

- (a) Controls that address risks determined to be significant risks;
- (b) Controls over journal entries including to record non-recurring, unusual transactions or adjustments;
- (c) Controls, if any, for which the auditor plans to test the operating effectiveness of controls in determining the nature, timing and extent of substantive testing, including those controls that address risks for which substantive procedures alone are not enough to obtain sufficient appropriate audit evidence; and
- (d) Controls, if any, related to significant transactions and relationships with related parties and significant transactions and arrangements outside the normal course of business.

~~(e) If the entity uses the services of a service organization and those services are relevant to the entity's process to prepare its financial statements, cControls in (a) to (d) at the user entity related to the services provided by the service organization, including those that are applied to the transactions processed by the service organization.~~

The auditor's required understanding of the entity's control activities involves identifying specific controls, as appropriate in the entity's circumstances, and evaluating their design and determining whether the controls have been implemented. Evaluating the design and implementation of controls includes the evaluation of whether the control is designed effectively to address the risk of material misstatement at the assertion level, or effectively designed to support the operation of other controls, and the determination whether the control has been implemented.

This assists the auditor's understanding of management's approach to addressing certain risks, and therefore provides a basis for the design and performance of further audit procedures responsive to

these risks even when the auditor does not plan to test the operating effectiveness of identified controls.

~~If the entity's use of the services of a service organization and those services are relevant to the entity's process to prepare its financial statements (see paragraph 6.3.12B), controls (a) to (d) may include those at the user entity related to the services provided by the service organization, including those that are applied to the transactions processed by the service organization.~~

Journal Entries

Controls over journal entries are expected to be identified for all audits because the manner in which an entity incorporates information from transaction processing into the general ledger ordinarily involves the use of journal entries, whether standard or non-standard, or automated or manual. The extent to which other controls are identified may vary based on the nature of the entity and the auditor's planned approach to further audit procedures. For example, in an audit of an LCE, the entity's information system may not be complex and the auditor may not intend to test the operating effectiveness of controls. Further, the auditor may not have identified any significant risks or any other risks of material misstatement for which it is necessary for the auditor to evaluate the design of controls and determine that they have been implemented. In such an audit, the auditor may determine that there are no identified controls other than the entity's controls over journal entries.

Related Parties

Controls in less complex entities are likely to be less formal and such entities may have no documented processes for dealing with related party relationships and transactions. An owner-manager may mitigate some of the risks arising from related party transactions, or potentially increase those risks, through active involvement in all the main aspects of the transactions. For such entities, the auditor may obtain an understanding of the related party relationships and transactions, and any controls that may exist over these, through inquiry of management combined with other procedures, such as observation of management's oversight and review activities, and inspection of available relevant documentation.

6.3.15. For the controls identified in paragraph 6.3.14, the auditor shall:

- (a) Identify the IT applications and other aspects of the IT environment that are subject to risks arising from the use of IT and what those related risks are;
- (b) Identify the entity's general IT controls that respond to those identified risks; and
- (c) By performing procedures in addition to inquiries, evaluate whether the identified general IT controls are designed effectively and have been implemented.

The auditor's understanding of the entity's process to prepare the financial statements (which may be done by performing walk-through procedures) includes the IT environment relevant to the flows of transactions and processing of information. This is because the entity's use of IT applications or other aspects of the IT environment may give rise to risks arising from the use of IT (i.e., the susceptibility of information processing controls to ineffective design or operation, or risks to the integrity of information).

The extent of the auditor's understanding of the IT processes, including the extent to which the entity has general IT controls in place, will vary with the nature and the circumstances of the entity and its IT environment, as well as based on the nature and extent of controls identified by the auditor. The number of IT applications that are subject to risks arising from the use of IT also will vary based on these factors. General IT controls support the continued proper operation of the IT environment, including the continued effective functioning of information processing controls and the integrity of information.

Deficiencies Within the Entity's System of Internal Control

- 6.3.18. The auditor shall determine whether one or more deficiencies have been identified in the entity's system of internal control and if so, if they individually or in combination, constitute significant deficiencies.

In understanding the entity's system of internal control, the auditor may determine that certain of the entity's policies or procedures are not appropriate to the nature and circumstances of the entity. Such a determination may be an indicator that assists the auditor in identifying deficiencies in internal control. If the auditor has identified one or more deficiencies, the auditor may consider the effect of those deficiencies on the identification and assessment of risks of material misstatement and on the design of further audit procedures.

The auditor uses professional judgment in determining whether a deficiency represents a significant deficiency in internal control.

6.4. Identifying and Assessing the Risks of Material Misstatement

Risks of material misstatement are identified and assessed by the auditor to determine the nature, timing and extent of further audit procedures necessary to obtain sufficient appropriate audit evidence. This evidence enables the auditor to express an opinion on the financial statements at an acceptably low level of audit risk.

- 6.4.1. The auditor shall identify and assess the risks of material misstatement, due to fraud or error, at:

- (a) The financial statement level. In doing so, the auditor shall determine whether they affect risks at the assertion level and consider the nature and extent of the pervasive effect of identified risks on the financial statements; ~~and determine whether they affect risks at the assertion level;~~ and
- (b) The assertion level for classes of transactions, account balances, and disclosures. In doing so, the auditor shall:
 - (i) Determine the relevant assertions and related significant classes of transactions, account balances and disclosures; and
 - (ii) Assess inherent risk for identified risks of material misstatement at the assertion level by assessing the likelihood and magnitude of misstatement.

Financial Statement Level Risks

Risks of material misstatement at the financial statement level refer to risks that relate pervasively to the financial statements as a whole, and potentially affect many assertions. Risks of this nature are

not necessarily risks related to specific assertions at the class of transactions, account balance or disclosure level (e.g., risk of management override of controls).

Assertion Level Risks

In identifying and assessing the risks of material misstatement, the auditor uses assertions to consider the different types of potential misstatements that may occur. Appendix 54 sets out assertions that may be used by the auditor in considering different types of misstatements at the assertion level.

An assertion about a class of transactions, account balance or disclosure is a relevant assertion when it has an identified risk of material misstatement. The determination of whether an assertion is a relevant assertion is made before consideration of any related controls (i.e., the inherent risk) and is based on the auditor's consideration of misstatements that have a reasonable possibility of both occurring (i.e., likelihood), and being material if they were to occur (i.e., magnitude). Significant classes of transactions, account balances and disclosures are those for which there is one or more relevant assertions. Determining relevant assertions and the significant classes of transactions, account balances and disclosures provides a basis for the identification and assessment of risks of material misstatement.

Assessing Inherent Risk

The assessed inherent risk for a particular risk of material misstatement at the assertion level represents a judgment within a range, from lower to higher, on the spectrum of inherent risk.

In assessing inherent risk, the auditor uses professional judgment in determining the significance of the combination of the likelihood and magnitude of a misstatement on the spectrum of inherent risk. The judgment about where in the range inherent risk is assessed may vary based on the nature, size or circumstances of the entity, and takes into account the assessed likelihood and magnitude of the misstatement.

In considering the likelihood of a misstatement, the auditor considers the possibility that a misstatement may occur. In considering the magnitude of a misstatement, the auditor considers the qualitative and quantitative aspects of the possible misstatement (i.e., misstatements in assertions about classes of transactions, account balances or disclosures may be judged to be material due to nature, size or circumstances).

When assessing inherent risk, factors relating to the preparation of information required by the applicable financial reporting framework that affect the susceptibility of assertions to misstatement may include:

- Complexity;*
- Subjectivity;*
- Change;*
- Uncertainty (for accounting estimates this is estimation uncertainty); or*
- Susceptibility to misstatement due to management bias or other fraud risk factors insofar as they affect inherent risk.*

The presence of these factors may give rise to higher inherent risk and may be an indication that the ISA for LCE is not appropriate for the audit.

When risks of material misstatement relate more pervasively to the financial statements as a whole, and potentially affect many assertions, the risks of material misstatement are assessed at the financial statement level. When assessing risk at the assertion level, the auditor ~~then~~ takes into account the degree to which the risks of material misstatement at the financial statement level affects the assessment of inherent risks for risks of material misstatement at the assertion level.

In identifying and assessing risks of material misstatement, the results of the engagement team discussion and any inquiries relating to fraud and going concern are relevant.

Considerations Specific to Public Sector Entities

In exercising professional judgment as to the assessment of the risk of material misstatement, public sector auditors may consider the complexity of the regulations and directives, and the risks of non-compliance with authorities.

- 6.4.2. In identifying and assessing the risks of material misstatement due to fraud, the auditor shall, based on a presumption that there are risks of fraud in revenue recognition, evaluate which types of revenue, revenue transactions or assertions give rise to such risks.

When identifying and assessing risks of material misstatement due to fraud, the auditor may consider whether unusual or unexpected relationships have been identified in performing analytical procedures, including those related to revenue accounts.

The presumption that there are risks of fraud in revenue recognition may be rebutted. For example, the auditor may conclude, based on the audit evidence obtained, that there is no risk of material misstatement due to fraud relating to revenue recognition in the case where there is a single type of simple revenue transaction, for example, leasehold revenue from a single unit rental property.

- 6.4.3A. In identifying and assessing risks of material misstatement relating to an accounting estimate and related disclosure at the assertion level, the auditor shall take into account the degree to which the accounting estimate is subject to estimation uncertainty, and the degree to which the following are affected by complexity, subjectivity, change or management bias:

- (a) The selection and application of the method, the assumptions and data used; and
- (b) The selection of management's point estimate and related disclosures.

Significant Risks

- 6.4.3B. The auditor shall determine whether any of the assessed risks of material misstatement are, in the auditor's professional judgment, a significant risk.

The determination of which of the assessed risks of material misstatement are close to the upper end of the spectrum of inherent risk, and are therefore significant risks, is a matter of professional judgment, unless the risk is of a type specified to be treated as a significant risk as set out in paragraph 6.4.3D. Being close to the upper end of the spectrum of inherent risk will differ from entity to entity, and will not necessarily be the same for an entity period on period. It may depend on the nature and circumstances of the entity for which the risk is being assessed.

6.4.3C. The auditor shall determine whether the assessed risks associated with related party relationships and transactions, and assessed risks relating to accounting estimates are significant risks.

6.4.3D. The auditor shall treat the following as significant risks:

- (a) Risk of material misstatement from management override of controls;
- (b) Any other risks identified fraud risks of material misstatement due to fraud, including risks that the auditor identified in accordance with paragraph 6.4.2.;
- (c) Identified significant related party transactions outside the entity's normal course of business.

Although the level of risk of management override of controls will vary from entity to entity, the risk is nevertheless present in all entities. Due to the unpredictable way in which such override could occur, it is a risk of material misstatement due to fraud and therefore a significant risk.

Assessing Control Risk

6.4.3E. The auditor shall assess control risk if:

- (a) The auditor has determined that substantive procedures alone cannot provide sufficient appropriate audit evidence for any of the risks of material misstatement at the assertion level; or

- (b) The auditor otherwise plans to test the operating effectiveness of controls,

otherwise, the assessed risk of material misstatement is the same as the assessment of inherent risk.

The auditor's plans to test the operating effectiveness of controls is based on the expectation that controls are operating effectively, and this will form the basis of the auditor's assessment of control risk.

The initial expectation of the operating effectiveness of controls is based on the auditor's evaluation of the design, and the determination of implementation, of the controls identified in paragraphs 6.3.14. and 6.3.15. (b). Once the auditor has tested the operating effectiveness of the controls in accordance with Part 7, the auditor will be able to confirm the initial expectation about the operating effectiveness of controls. If the controls are not operating effectively as expected, then the auditor will need to revise the control risk assessment.

The auditor's assessment of control risk may be performed in different ways depending on preferred audit techniques or methodologies, and may be expressed in different ways. The control risk assessment may be expressed using qualitative categories (for example, control risk assessed as maximum, moderate, minimum) or in terms of the auditor's expectation of how effective the control(s) is in addressing the identified risk, that is, the planned reliance on the effective operation of controls. For example, if control risk is assessed as maximum, the auditor contemplates no reliance on the effective operation of controls. If control risk is assessed at less than maximum, the auditor contemplates reliance on the effective operation of controls.

Where routine business transactions are subject to highly automated processing with little or no manual intervention, it may not be possible to perform only substantive procedures in relation to the risk. This may be the case in circumstances where a significant amount of an entity's information is initiated, recorded, processed, or reported only in electronic form. In such cases:

- *The sufficiency and appropriateness of audit evidence usually depend on the effectiveness of controls over its accuracy and completeness.*
- *The potential for improper initiation or alteration of information to occur and not be detected may be greater if appropriate controls are not operating effectively.*

Evaluation of the Procedures to Identify and Assess Risks of Material Misstatement and Revision of Risk Assessment

6.4.3F. The auditor shall evaluate whether the audit evidence obtained from procedures to identify and assess the risks of material misstatement provides an appropriate basis for the identification and assessment of the risks of material misstatement. If not, the auditor shall perform additional procedures until audit evidence has been obtained to provide such a basis. In identifying and assessing the risks of material misstatement, the auditor shall take into account all audit evidence obtained from the procedures to identify and assess the risks of material misstatement, whether corroborative or contradictory to assertions made by management.

6.4.3G. The auditor's assessment of the risks of material misstatement at the assertion level may change during the course of the audit as additional audit evidence is obtained. In circumstances where the auditor obtains audit evidence from performing further audit procedures, or if new information is obtained, either of which is inconsistent with the audit evidence on which the auditor originally based the assessment, the auditor shall revise the assessment and modify the further planned audit procedures accordingly.

6.4.3H. The auditor shall remain alert throughout the audit for audit evidence of events or conditions that may cast significant doubt on the entity's ability to continue as a going concern.

If events or conditions that may cast significant doubt on the entity's ability to continue as a going concern are identified after the auditor's risk assessments are made, the auditor's assessment of the risks of material misstatement may need to be revised.

6.5. Evaluation of the Appropriateness of Using the ISA for LCE

6.5.A. Based on the procedures performed to identify and assess the risks of material misstatement, the engagement partner shall evaluate whether the ISA for LCE continues to be appropriate for the nature and circumstances of the entity being audited.

The auditor's original determination to use the ISA for LCE may change as new information or additional audit evidence is obtained when performing procedures to identify and assess risks of material misstatement. In circumstances where audit evidence, or new information, is obtained, which is inconsistent with the auditor's original determination for using the ISA for LCE, the auditor may need to change the original determination to use the ISA for LCE, and transition to using the ISAs or other standard as appropriate.

6.7. Specific Communication Requirements

6.7.1. The auditor shall communicate ~~with~~^{to} management, and where appropriate, those charged with governance, the significant risks identified by the auditor.

6.8. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

The form and extent of documentation for the identification and assessment of the risks of material misstatement may be simple and relatively brief, and is influenced by:

- *The nature, size and complexity of the entity and its system of internal control.*
- *Availability of information from the entity.*
- *The audit methodology and technology used in the course of the audit.*

It is not necessary to document the entirety of the auditor's understanding of the entity and matters related to it, but rather apply the principles in Part 2.5 and the matters noted below.

6.8.1. The auditor shall include the following in the audit documentation:

- (a) Key elements of the understanding obtained regarding each of the aspects of the entity and its environment, the applicable financial reporting framework and the entity's system of internal control;

Key elements of understanding documented by the auditor include those on which the auditor based the assessment of risks of material misstatement.

- (b) The names of the identified related parties (including changes from prior period) and the nature of the related party relationships;
- (c) The identified and assessed risks of material misstatement, including risks due to fraud, at the financial statement level and at the assertion level, including significant risks and risks for which substantive procedures alone cannot provide sufficient appropriate audit evidence, and the rationale for the significant judgments made;
- (d) If applicable, the reasons for the conclusion that there is not a risk of material misstatement due to fraud related to revenue recognition;
- (e) The controls set out in paragraphs 6.3.14. and 6.3.15 and the evaluation whether the control is designed effectively and determination whether the control has been implemented; and
- (f) For accounting estimates, key elements of the auditor's understanding of the accounting estimates, including controls as appropriate, the linkage of the assessed risks of material misstatements to the auditor's further procedures, and any indicators of management bias and how those were addressed.

6.8.2. The auditor shall document the basis for the evaluation about whether the ISA for LCE continues to be appropriate for the nature and circumstances of the entity being audited.

7. Responding to Assessed Risks of Material Misstatement

Content of this Part

Part 7 contains content related to the:

- Design and implementation of overall responses to assessed risks of material misstatement at the financial statement level;
- Design and implementation of responses to the assessed risks of material misstatement at the assertion level (i.e., design and performance of further audit procedures). Further procedures include substantive procedures (tests of detail and substantive analytical procedures) and tests of controls (as appropriate), and [are](#) expanded on in this Part; and
- Procedures for specific topics when responding to assessed risks of material misstatement.

Scope of this Part

This Part sets out the specific requirements for obtaining audit evidence through responding to assessed risks of material misstatement. Part 2 also sets out the broad requirements for audit evidence. In complying with the requirements in this Part, the auditor may find it useful to refer to the following that set out relevant matters:

- Fraud – see Part 1.5.
- Law or regulation – see Part 1.6.
- Related parties – see Part 1.7.
- Information to be used as audit evidence – see Part 2.3.
- Procedures for obtaining audit evidence – see Part 2.4.

7.1. Objectives

7.1.12. The objectives of the auditor are to:

- (a) Obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement (the assessed risks), through designing and implementing responses to those risks;
- (b) Respond appropriately to risks of material misstatement arising from fraud or suspected fraud;
- (c) Obtain sufficient appropriate audit evidence regarding management's use of the going concern assumption and related disclosures; and
- (d) Respond appropriately to identified or suspected non-compliance with law or regulation that have been identified during the audit.

7.2. Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Financial Statement Level

7.2.1. The auditor shall design and implement overall responses to address the assessed risks of material misstatement at the financial statement level, whether due to fraud or error.

The auditor's overall responses at the financial statement level, for example, making general changes to the nature, timing or extent of audit procedures, or adjustments to resources assigned or using experts, are based on those risks that relate pervasively to the financial statements as a whole. These may include, for example, risks arising from industry, regulatory and other external factors, or matters related broadly to the entity's basis of accounting or accounting policies.

In particular, the auditor's overall responses also are influenced by the auditor's understanding of the control environment. The control environment provides a foundation for the operation of the other components of the entity's internal control system. The control environment does not directly prevent, or detect and correct, misstatements. It may, however, influence the effectiveness of controls in the other components of the entity's internal control system. Therefore, an effective control environment may allow the auditor to have more confidence in internal control and the reliability of audit evidence generated internally within the entity.

Deficiencies that have been identified in the control environment when obtaining an understanding of the entity's internal control system, however, have the opposite effect and may result in the need for more extensive audit evidence from substantive procedures. A weak control environment also impacts the work that may be undertaken at an interim period.

7.2.2. In determining overall responses to address the assessed risks of material misstatement, due to fraud ~~or error~~, at the financial statement level, the auditor shall:

- ~~(a) Assign and supervise personnel taking account of the knowledge, skill and ability of the individuals to be given significant engagement responsibilities and the auditor's assessment of the risks of material misstatement due to fraud or error for the engagement;~~
- (ab) Evaluate whether the selection and application of accounting policies by the entity, particularly those related to subjective measurements, may be indicative of ~~errors or~~ fraudulent financial reporting resulting from management's effort to manage earnings; and
- (be) Incorporate an element of unpredictability in the selection of the nature, timing and extent of audit procedures.

Incorporating an element of unpredictability may be achieved by, for example:

- Performing substantive procedures on selected account balances and assertions not otherwise tested due to their materiality or risk.
- Adjusting the timing of audit procedures from that otherwise expected.
- Using different sampling methods.
- Performing audit procedures at different locations or at locations on an unannounced basis.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

7.2.2A. In determining overall responses to address the assessed risks of material misstatement, due to fraud, at the financial statement level, the auditor shall assign and supervise personnel taking account of the knowledge, skill and ability of the individuals to be given significant engagement responsibilities and the auditor's assessment of the risks of material misstatement due to fraud for the engagement

7.3. Audit Procedures Responsive to the Assessed Risks of Material Misstatement at the Assertion Level

7.3.1. The auditor shall design and perform further audit procedures whose nature, timing and extent are based on, and responsive to, assessed risks, whether due to fraud or error, at the assertion level.

Further audit procedures comprise tests of controls and substantive procedures. The auditor may choose to perform tests of controls or they may be required in specific circumstances (see paragraph 7.3.2.(d)). Substantive procedures include tests of details and substantive analytical procedures.

Further audit procedures are responsive to the assessed risk of material misstatement at the assertion level, and provide a clear linkage between the auditor's further procedures and the risk assessment. If the assessed risks of material misstatement are due to fraud risks at the assertion level, the nature, timing and extent of audit procedures may need to be changed to obtain audit evidence that is more relevant and reliable or to obtain additional corroborative information.

7.3.2. In designing the further audit procedures, the auditor shall:

- (a) Consider the reasons for the assessment given to the risk of material misstatement at the assertion level for each significant class of transactions, account balance, or disclosure, including:
 - (i) The likelihood and magnitude of misstatement due to the characteristics of the significant class of transactions, account balance, or disclosure (that is, the inherent risk); and
 - (ii) Whether the risk assessment takes account of controls that address the risk of material misstatements (that is, the control risk), thereby requiring the auditor to obtain audit evidence to determine whether the controls are operating effectively (where the auditor plans to test the operating effectiveness of controls in determining the nature, timing and extent of substantive procedures);
- (b) Obtain more persuasive audit evidence the higher the auditor's assessment of risk;
- (c) In designing and performing tests of controls, obtain more persuasive audit evidence the greater the reliance the auditor places on the operating effectiveness of controls; and
- (d) ~~Design and perform tests of controls, to obtain sufficient appropriate audit evidence as to the operating effectiveness of such controls, if~~ the auditor intends to test the operating effectiveness of controls or when substantive procedures alone cannot provide sufficient appropriate audit evidence at the assertion level, design and perform tests of controls, to obtain sufficient appropriate audit evidence as to the operating effectiveness of such controls,-

In an audit of an LCE, the auditor may not be able to identify many controls, or the extent of documentation prepared by the entity to which they exist or operate may be limited. In such cases, it may be more efficient for the auditor to perform further audit procedures that are primarily substantive procedures.

When obtaining more persuasive audit evidence because of a higher assessment of risk, the auditor may increase the quantity of the evidence, or obtain evidence that is more relevant or reliable, for example, by placing more emphasis on obtaining third party evidence or by obtaining corroborating evidence from a number of independent sources.

Considerations Specific to Public Sector Entities

For the audits of public sector entities, the audit mandate and any other special auditing requirements may affect the auditor's consideration of the nature, timing and extent of further audit procedures.

- 7.3.3. When designing tests of controls and tests of details, the auditor shall determine the means of selecting items for testing that are effective in meeting the purpose of the audit procedure.

In selecting items for testing, the auditor is required by paragraph 2.3.1 to determine the relevance and reliability of information to be used as audit evidence; the other aspect of effectiveness (sufficiency) is an important consideration in selecting items to test. The means available to the auditor for selecting items for testing are: selecting all items (100% examination), selecting specific items and audit sampling.

Substantive Analytical Procedures

- 7.3.4. [Moved to paragraph 7.3.19A.]

[EEM moved to EEM under paragraph 7.3.19A.]

Audit Sampling

- 7.3.5. [Moved to paragraph 7.3.19B.]

- 7.3.6. [Moved to paragraph 7.3.19C.]

[EEM moved to EEM under paragraph 7.3.19C.]

- 7.3.7. [Moved to paragraph 7.3.19D.]

[EEM moved to EEM under paragraph 7.3.19C.]

Tests of Controls

- 7.3.8. In designing and performing tests of controls, the auditor shall perform audit procedures in combination with inquiry to obtain audit evidence about the operating effectiveness of controls, including:

- (a) How the controls were applied at relevant times during the period;
- (b) The consistency with which they were applied; and
- (c) By whom or by what means they were applied.

- 7.3.9. The auditor shall determine whether the controls to be tested depend on other controls (indirect controls), and if so, consider whether it is necessary to obtain evidence about the effective operation of the indirect controls.
- 7.3.10. The auditor shall test controls for the period of time, or throughout the period, for which the auditor intends to rely on those controls in order to provide an appropriate basis for the auditor's reliance.
- 7.3.11. If the auditor obtains audit evidence about the operating effectiveness of controls in the interim period, the auditor shall obtain additional audit evidence about any subsequent significant changes and determine the additional audit evidence to be obtained for the remaining period.
- 7.3.12. If the auditor intends to use audit evidence about the operating effectiveness of controls obtained in previous periods, the auditor shall:
- (a) Consider:
 - (i) ~~T~~the effectiveness of the components of the internal control system,
 - (ii) ~~T~~the risks from the characteristics of the control (e.g., manual or automated),
 - (iii) ~~T~~the effectiveness of general IT controls,
 - (iv) ~~T~~the effectiveness of the control and its application by the entity,
 - (v) ~~W~~whether the lack of a change in a particular control poses a risk due to changing circumstances; and
 - (vi) ~~T~~the risk of material misstatement and the extent of reliance on the control planned; and
 - (b) Establish the continuing relevance of that evidence by obtaining audit evidence about whether significant changes in those controls have occurred subsequent to the previous audit. If there have been significant changes the auditor shall test the control in the current period, otherwise at least once every third audit.
- 7.3.13. If the auditor intends to rely on a control that is a control over a significant risk, the auditor shall test the control in the current period.
- 7.3.14. When evaluating the operating effectiveness of controls upon which the auditor intends to rely, the auditor shall evaluate whether misstatements that have been detected by substantive procedures indicate that controls are not operating effectively. The absence of misstatements detected by substantive procedures, however, does not provide audit evidence that controls related to the assertion being tested are effective.
- 7.3.15. If deviations from controls, upon which the auditor intends to rely, are detected, the auditor shall make specific inquiries to understand ~~these matters~~~~deviations~~ and their potential consequences, ~~and shall determine~~~~including~~ whether:
- (a) The tests of controls provide an appropriate basis for reliance on the controls;
 - (b) Additional tests of control are necessary; or
 - (c) The risks of material misstatement need to be addressed using substantive procedures.

Substantive Procedures

7.3.16. [Moved to paragraph 7.3.18A.]

7.3.17. [Moved to paragraph 7.3.18B.]

7.3.18. The auditor's substantive procedures shall include substantive procedures specifically responsive to significant risks. When the response to a significant risk consists only of substantive procedures, those procedures shall include tests of details.

7.3.18A. The auditor's substantive procedures shall include audit procedures related to the financial statement closing process, including:

- (a) Agreeing or reconciling information in the financial statements with the underlying accounting records, including agreeing or reconciling information in disclosures, whether such information is obtained from within or outside of the general and subsidiary ledgers; and
- (b) Examining material journal entries and other adjustments made during the course of preparing the financial statements. [Previously paragraph 7.3.17]

7.3.18B. Irrespective of the assessed risks, substantive procedures shall be performed for each material class of transactions, account balance, and disclosure. [Previously paragraph 7.3.16]

For significant classes of transactions, account balances and disclosures, substantive procedures may have already been performed because paragraph 7.3.1 requires the auditor to design and perform further audit procedures whose nature, timing and extent are based on, and responsive to, assessed risks of material misstatement at the assertion level.

Not all assertions within a material class of transactions, account balance or disclosure are required to be tested. Rather, in designing the substantive procedures to be performed, the auditor's consideration of the assertion(s) in which, if a misstatement were to occur, there is a reasonable possibility of the misstatement being material, may assist in identifying the appropriate nature, timing and extent of the procedures to be performed.

7.3.19. If the auditor performed substantive procedures at an interim date, the auditor shall cover the remaining period by performing:

- (a) Substantive procedures, combined with tests of controls for the intervening period; or
- (b) If the auditor determines that it is sufficient, further substantive procedures only, that provide a reasonable basis for extending the audit conclusions from the interim date to the period end.

Substantive Analytical Procedures

7.3.19A. If the auditor uses substantive analytical procedures to obtain audit evidence, the auditor shall:

- (a) Determine the suitability of the substantive analytical procedure for the purpose of the test and for the given assertion(s);
- (b) Evaluate the reliability of data from which the auditor's expectation of recorded amounts or ratios is developed, taking account of source, comparability, and nature and relevance of information available, and controls over its preparation;

- (c) Develop an expectation of recorded amounts or ratios and evaluate whether the expectation is sufficiently precise to identify material misstatements;
- (d) Determine the amount of any difference of recorded amounts from expected values that is acceptable without further investigation being required; and
- (e) Investigate fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount by inquiring of management and obtaining appropriate audit evidence relevant to management's responses and performing additional audit procedures as necessary in the circumstances. [Previously paragraph 7.3.4.]

Substantive analytical procedures are generally more applicable to large volumes of transactions that tend to be predictable over time. The application of planned analytical procedures is based on the expectation that relationships among data exist and continue in the absence of known conditions to the contrary. However, the suitability of a particular analytical procedure will depend upon the auditor's assessment of how effective it will be in detecting a misstatement that, individually or when aggregated with other misstatements, may cause the financial statements to be materially misstated.

Automated Tools and Techniques

Analytical procedures can be performed using a number of tools or techniques, which may also be automated. The evolution of technology, coupled with the increase in number and variety of sources of data, may create more opportunities for the auditor to use ATT in performing substantive analytical procedures. [Previously EEM under paragraph 7.3.4.]

There are countless information sources available (e.g., social media, free access information sources) to the auditor, and some are more reliable than others. The use of ATT to perform substantive analytical procedures allows the auditor to incorporate information from more sources both internal and external to the entity and also to use much greater volumes of data in the analyses. Nonetheless, the auditor's responsibility for addressing the reliability of data used in substantive analytical procedures is unchanged. [Previously EEM under paragraph 7.3.4.]

Audit Sampling

7.3.19B. If the auditor uses audit sampling when responding to assessed risks of material misstatement as a means for selecting items for testing, the auditor shall:

- (a) Consider the purpose of the audit procedures and the characteristics of the population from which the sample will be drawn.
- (b) Determine a sample size sufficient to reduce sampling risk to an acceptably low level.
- (c) Select items in a way that each sampling unit in the population has a chance of selection.
- (d) Perform audit procedures, appropriate to the purpose, on each item selected, unless the procedure is not applicable to the selected item in which case the auditor shall select a replacement item ~~or perform a suitable alternative procedure~~. If the auditor is unable to apply the designed audit procedures, or suitable alternative procedures, to ~~the~~ selected item, ~~the auditor -unless it is not applicable, that item- shall be treated that item~~ as a deviation ~~from the prescribed control~~ (in the case of tests of controls) or a misstatement (in the case of tests of details).

- (e) Investigate the nature and cause of any deviations or misstatements identified ~~in the sample as to their nature and cause~~, and evaluate their possible effect on the purpose of the audit procedure and on other areas of the audit. [Previously paragraph 7.3.5]

Sample Design

When designing an audit sample, the auditor's considerations may include:

- The purpose of the test, the combination of audit procedures that is likely to best achieve the purpose, what items to select to meet the purpose and the assertion being addressed.
- The possible deviation or misstatement conditions or other characteristics relating to that audit evidence will assist the auditor in defining what constitutes a deviation or misstatement and what population to use for sampling.

The auditor's considerations of the characteristics of a population may include:

- Whether the population of items to be tested is appropriate to achieve the test objectives. Sampling will not identify or test items that are not already included within the population. For example, a sample of receivable balances may be used to test the existence of receivables, but such a population would not be appropriate for testing the completeness of receivables.
- The size of the population. In some cases, a statistical conclusion may not be drawn if the population to be tested is too small to sample.

Audit sampling can be applied using either non-statistical or statistical sampling approaches. Statistical conclusions can be drawn from statistical samples. -Non-statistical samples are often used in combination with other audit procedures that address the same assertion.

Sample Size

The level of sampling risk that the auditor is willing to accept affects the sample size required. The lower the risk the auditor is willing to accept, the greater the sample size will need to be. Appendix 64A includes examples of factors influencing the sample size for tests of controls and test of details.

Selection of Items for Testing

With statistical sampling, sample items are selected in a way that each sampling unit has a known probability of being selected. With non-statistical sampling, judgment is used to select sample items. It is important that the auditor selects a representative sample, so that bias is avoided, by choosing sample items which have characteristics typical of the population.

The principal methods of selecting samples are the use of random selection, systematic selection and haphazard selection.

- 7.3.19C. In the extremely rare circumstances when the auditor considers a misstatement or deviation discovered in a sample to be an anomaly, the auditor shall obtain a high degree of certainty that such misstatement or deviation is not representative of the population. The auditor shall obtain this degree of certainty by performing additional audit procedures to obtain sufficient appropriate audit evidence that the misstatement or deviation does not affect the remainder of the population.

7.3.19D. For tests of details, the auditor shall project misstatements found in the sample to the population. In the extremely rare circumstances when the auditor considers a misstatement or deviation discovered in a sample to be an anomaly, the auditor shall obtain a high degree of certainty that such misstatement or deviation is not representative of the population. The auditor shall obtain this degree of certainty by performing additional audit procedures to obtain sufficient appropriate audit evidence that the misstatement or deviation does not affect the remainder of the population. [Previously paragraph 7.3.6]

A misstatement that has been established to be an anomaly need not be projected across the remaining population. [Previously EEM under paragraph 7.3.6.]

7.3.19E. The auditor shall evaluate:

- (a) The results of the sample; and
- (b) Whether the use of audit sampling has provided a reasonable basis for conclusions about the population that has been tested. [Previously paragraph 7.3.7]

For tests of controls, an unexpectedly high sample deviation rate may lead to an increase in the assessed risk of material misstatement, unless further audit evidence substantiating the initial assessment is obtained. For tests of details, an unexpectedly high misstatement amount in a sample may cause the auditor to believe that a class of transactions or account balance is materially misstated, in the absence of further audit evidence that no material misstatement exists. Also, in the case of tests of details, the projected misstatement plus anomalous misstatement, if any, is the auditor's best estimate of misstatement in the population.

If the auditor concludes that audit sampling has not provided a reasonable basis for conclusions about the population that has been tested, the auditor may:

- *Request management to investigate misstatements that have been identified and the potential for further misstatements and to make any necessary adjustments; or*
- *Tailor the nature, timing and extent of those further audit procedures to best achieve the required assurance. For example, in the case of tests of controls, the auditor might extend the sample size, test an alternative control or modify related substantive procedures.*

External Confirmations

7.3.20. The auditor shall consider whether external confirmation procedures are to be performed as substantive procedures.

External confirmation procedures frequently are relevant when addressing assertions associated with account balances and their elements, but need not be restricted to these items. For example, the auditor may request external confirmation of the terms of agreements, contracts, or transactions between an entity and other parties. External confirmation procedures also may be performed to obtain audit evidence about the absence of certain conditions.

7.3.21. When using external confirmation procedures, the auditor shall maintain control over:

- (a) Determining the information to be confirmed or requested and selecting the appropriate confirming party;

- (b) Designing the confirmation requests, including determining that requests are properly addressed and contain return information for responses to be sent directly to the auditor; and
- (c) Sending the requests, including follow-up requests when applicable, to the confirming party.

7.3.22. If management refuses to allow the auditor to send a confirmation request, the auditor shall:

- (a) Inquire as to management's reasons for the refusal, and seek audit evidence as to their validity and reasonableness;
- (b) Evaluate the implications of management's refusal on the auditor's assessment of the relevant risks of material misstatement, including the risk of fraud, and on the nature, timing and extent of other audit procedures; and
- (c) Perform alternative audit procedures designed to obtain relevant and reliable audit evidence.

7.3.23. If the auditor concludes that management's refusal to allow the auditor to send a confirmation request is unreasonable, or the auditor is unable to obtain relevant and reliable audit evidence from alternative audit procedures, the auditor shall communicate with those charged with governance. The auditor also shall determine the implications for the audit and the auditor's opinion.

7.3.24. If the auditor identifies factors that give rise to doubts about the reliability of the response to a confirmation request, the auditor shall obtain further audit evidence to resolve those doubts. If the auditor determines that a response to a confirmation request is not reliable, the auditor shall evaluate the implications on the assessment of the relevant risks of material misstatement, including the risk of fraud, and on the related nature, timing and extent of other audit procedures.

7.3.25. In the case of each non-response, the auditor shall perform alternative audit procedures to obtain relevant and reliable audit evidence.

7.3.26. The auditor shall investigate exceptions to determine whether or not they are indicative of misstatements.

7.3.27. The auditor shall evaluate whether the results of the external confirmation procedures, if any, provide relevant and reliable audit evidence, or whether further audit evidence is necessary.

7.4. Specific Focus Areas

Going Concern

The auditor's responsibilities are to obtain sufficient appropriate audit evidence regarding, and conclude on, the appropriateness of management's use of the going concern basis of accounting in the preparation of the financial statements, and to conclude, based on the audit evidence obtained, whether a material uncertainty exists about the entity's ability to continue as a going concern. These responsibilities exist even if the financial reporting framework used in the preparation of the financial statements does not include an explicit requirement for management to make a specific assessment of the entity's ability to continue as a going concern. [Previously EEM to paragraph 5.2.12]

7.4.1. The auditor shall evaluate management's assessment of the entity's ability to continue as a going concern.

In accordance with the requirements of this Part, the auditor needs to evaluate management's assessment of the entity's ability to continue as a going concern. In many cases, the management of

less complex entities may not have prepared a detailed assessment of the entity's ability to continue as a going concern, but instead may rely on in-depth knowledge of the business and anticipated future prospects. In such cases, it may be appropriate to discuss the medium- and long-term financing of the entity with management, provided that management's plans can be corroborated by sufficient documentary evidence and are consistent with the auditor's understanding of the entity. Therefore, the auditor's evaluation of going concern, for example, may be satisfied by discussion, inquiry and inspection of supporting documentation.

Continued support by owner-managers is often important to less complex entity's ability to continue as a going concern. Where a less complex entity is largely financed by a loan from the owner-manager, it may be important that these funds are not withdrawn. Where an entity is dependent on additional support from the owner-manager, the auditor may evaluate the owner-manager's ability to meet the obligation under the support arrangement. In addition, the auditor may request written confirmation of the terms and conditions attaching to such support and the owner-manager's intention or understanding.

7.4.2. In evaluating management's assessment of the entity's ability to continue as a going concern, the auditor shall:

- (a) Ceover the same period as used by management, as required by the applicable financial reporting framework. If that period is less than twelve months from the date of the financial statements, the auditor shall ask management to extend the period. If management does not make or extend its assessment, the auditor shall consider the implications for the auditor's report.¹⁶
- (b) Consider whether management's assessment includes all relevant information of which the auditor is aware of as a result of the audit.

The auditor also remains alert to the possibility that there are known events, scheduled or otherwise, or conditions that will occur beyond the period of assessment used by management that may bring into question management's use of the going concern basis of accounting in preparing the financial statements. The further into the future the events or conditions are, the more significant the going concern issues need to be before the auditor takes further action. ~~If events or conditions that may cast significant doubt on the entity's ability to continue as a going concern are identified after the auditor's risk assessments are made, the auditor's assessment of the risks of material misstatement may need to be revised.~~

~~7.4.3. In evaluating management's assessment, the auditor shall consider whether management's assessment includes all relevant information of which the auditor is aware of as a result of the audit.~~

7.4.4. The auditor shall inquire of management as to its knowledge of events or conditions beyond the period of management's assessment that may cast significant doubt on the entity's ability to continue as a going concern.

7.4.5. If events or conditions have been identified that may cast significant doubt on the entity's ability to continue as a going concern, the auditor shall obtain sufficient appropriate audit evidence to

¹⁶ For the effect on the auditor's report see Part 9, paragraph 9.5.1.S.

determine whether or not a material uncertainty exists through performing additional procedures, including consideration of mitigating factors ~~(a “material uncertainty” related to events or conditions that may cast significant doubt on the entity’s ability to continue as a going concern)~~. These procedures shall include:

- (a) Where management has not yet performed an assessment of the entity’s ability to continue as a going concern, requesting management to make its assessment.
- (b) Evaluating management’s plans for future actions in relation to its going concern assessment, whether the outcome of these plans is likely to improve the situation and whether management’s plans are feasible in the circumstances.
- (c) Where the entity has prepared a cash flow forecast, and analysis of the forecast is a significant factor in considering the future outcome of events or conditions in the evaluation of management’s plans for future actions:
 - (i) Evaluating the reliability of the underlying data generated to prepare the forecast; and
 - (ii) Determining whether there is adequate support for the assumptions underlying the forecast.
- (d) Considering whether any additional facts or information have become available since the date on which management made its assessment.

A material uncertainty exists when the magnitude of its potential impact and likelihood of occurrence is such that, in the auditor’s judgment, appropriate disclosure of the nature and implications of the uncertainty is, for a fair presentation framework, necessary for the fair presentation of the financial statements or, for a compliance framework, necessary for the financial statements not to be misleading.

7.4.6. If there is significant delay in the approval of the financial statements by management or those charged with governance after the date of the financial statements, the auditor shall inquire as to the reasons for the delay. If the auditor believes that the delay could be related to events or conditions relating to the going concern assessment, the auditor shall perform additional audit procedures as necessary, as well as consider the effect on the auditor’s conclusion regarding the existence of a material uncertainty.

Management Override of Controls

~~7.4.7.~~ [Moved as EEM under paragraph 7.4.8]

7.4.8. The auditor shall design and perform audit procedures to:

- (a) Test the appropriateness of manual and automated journal entries recorded in the general ledger and other adjustments, made in the preparation of the financial statements, including:
 - (i) Making inquiries of individuals involved in the financial reporting process about inappropriate or unusual activity relating to the processing of journal entries and other adjustments;
 - (ii) Selecting journal entries and other adjustments made at the end of a reporting period; and

- (iii) Considering the need to test journal entries and other adjustments throughout the period.
- (b) Review accounting estimates for biases and evaluate whether the circumstances producing the bias, if any, represent a risk of material misstatement due to fraud. In performing the review, the auditor shall, including:
 - (i) Evaluate whether the judgments and decisions made by management indicate a possible bias on the part of the entity's management, even if they are individually reasonable, that may represent a risk of material misstatement due to fraud. If so, the auditor shall reevaluate the accounting estimates taken as a whole; and
 - (ii) Perform a retrospective review of management judgments and assumptions related to significant accounting estimates reflected in the financial statements of the prior year.
- (c) For significant unusual transactions outside the normal course of business for the entity or that otherwise appear to be unusual, evaluate whether the business rationale (or the lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets.
- (d) Respond to the identified risks of management override of controls to the extent not already addressed by (a) to (c).

Although the level of risk of management override of controls will vary from entity to entity, the risk is nevertheless present in all entities. Due to the unpredictable way in which such override could occur, it is a risk of material misstatement due to fraud and therefore a significant risk. [Previously paragraph 7.4.7]

Material misstatement of financial statements due to fraud often involves the manipulation of the financial reporting process by recording inappropriate or unauthorized journal entries. This may occur throughout the year or at period end, or both, or by management making adjustments to amounts reported in the financial statements that are not reflected in journal entries, such as through reclassifications.

Automated Tools and Techniques

In manual general ledger systems, non-standard journal entries may be identified through inspection of ledgers, journals, and supporting documentation. When automated procedures are used to maintain the general ledger and prepare financial statements, such entries may exist only in electronic form and may therefore be more easily identified through the use of ATT.

Related Parties

7.4.9. The auditor shall design and perform further audit procedures to obtain sufficient appropriate audit evidence about the assessed risks of material misstatement associated with related party relationships and transactions, including inspecting:

- (a) Bank and legal confirmations obtained as part of the auditor's procedures;
- (b) Minutes of meetings of shareholders and of those charged with governance; and
- (c) Such other records or documents as the auditor considers necessary in the circumstances of the entity.

7.4.10. **[Moved to paragraph 7.4.15A]**

7.4.11. For identified arrangements or information that suggests the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor, the auditor shall:

(a) Determine whether the underlying circumstances confirm the existence of those relationships or transactions;

~~(b) Promptly communicate the relevant information to the other members of the engagement team;~~

~~(c)~~(b) Where the applicable financial reporting framework establishes related party requirements:

(i) Request management to identify all transactions with the newly identified related parties for the auditor's further evaluation;

(ii) Inquire as to why the entity's controls over related party relationships and transactions failed to enable the identification or disclosure of the related party relationships or transactions;

~~(d)~~(c) Perform appropriate substantive audit procedures for such newly identified related parties or significant related party transactions;

~~(e)~~(d) Reconsider the risk that other related parties or significant related party transactions may exist that management has not previously identified or disclosed to the auditor, and perform additional audit procedures as necessary; and

~~(f)~~(e) If the non-disclosure by management appears intentional (and therefore indicative of a risk of material misstatement due to fraud), evaluate the implications for the audit.

7.4.12. For identified significant related party transactions outside of the entity's normal course of business the auditor shall:

(a) ~~I-~~Inspect the underlying contracts or agreements, if any, and evaluate whether:

(i) The business rationale (or lack thereof) of the transactions suggests that they may have been entered into to engage in fraudulent financial reporting or to conceal misappropriation of assets;

(ii) The terms of transactions are consistent with management's explanations; and

(iii) The transactions have been appropriately accounted for, presented and disclosed in accordance with the applicable financial reporting framework.

~~7.4.13.(b) - The auditor shall obtain audit evidence that identified significant related party transactions outside the entity's normal course of business have been appropriately authorized and approved.~~

7.4.14. If the auditor identifies significant transactions outside the entity's normal course of business, the auditor shall inquire of management about the nature of these transactions and whether related parties could be involved.

7.4.15. If management has made an assertion in the financial statements to the effect that a related party transaction was conducted on terms equivalent to those prevailing in an arm's length transaction, the auditor shall obtain sufficient appropriate audit evidence about the assertion.

Considerations When There Are Members of the Engagement Team Other Than the Engagement Partner

7.4.15A. The auditor shall share relevant information obtained about the entity's related parties with other members of the engagement team, including the existence of related party relationships or transactions that management has not previously identified or disclosed to the auditor. [Previously paragraph 7.4.10]

Accounting Estimates

7.4.16. The auditor shall design and perform further audit procedures related to accounting estimates to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement at the assertion level, including for disclosures.

7.4.18. The auditor's further audit procedures to respond to assessed risks of material misstatement at the assertion level relating to an accounting estimate shall include one or more of the following approaches:

- (a) Obtaining audit evidence from events occurring up to the date of the auditor's report (see paragraph 7.4.18B).
- (b) Testing how management made the accounting estimate (see paragraphs 7.4.18C–7.4.18D).
- (c) Developing an auditor's point estimate or range (see paragraph 7.4.18E).

Given the nature of many accounting estimates for an LCE, the final outcome of an accounting estimate may be known before the date of the auditor's report. In these circumstances, audit evidence obtained from events occurring up to the date of the auditor's report may provide sufficient appropriate audit evidence to address the assessed risks of material misstatement. For some accounting estimates, however, events occurring up to the date of the auditor's report may not provide sufficient appropriate audit evidence about whether the accounting estimate is reasonable or misstated (e.g., when events or conditions develop only over an extended period). In these circumstances, the auditor's further audit procedures include the approaches in (b) or (c).

~~7.4.18A. The auditor shall design and perform further audit procedures to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement at the assertion level for disclosures related to an accounting estimate.~~

Obtaining Audit Evidence from Events Occurring Up to the Date of the Auditor's Report.

7.4.18B. When the auditor's further audit procedures include obtaining audit evidence from events occurring up to the date of the auditor's report, the auditor shall evaluate whether the audit evidence is sufficient and appropriate, taking into account any changes in circumstances and other relevant conditions between the event and the measurement date that may affect the relevance of such evidence.

Testing How Management Made the Accounting Estimate

7.4.18C. When testing how management made the accounting estimate, the auditor's further audit procedures shall address whether:

- (a) The method selected is appropriate, including any changes from the prior period;

- (b) The significant assumptions and data are consistent and appropriate, and their integrity maintained in applying the method;
- (c) Management has the intent to carry out specific courses of actions;
- (d) The judgments made in selecting the method, significant assumptions and data, give rise to indicators of possible management bias and, if possible indicators of bias are identified, evaluate the implications for the audit, including determining whether there is an intention to mislead such that it is fraudulent in nature;
- (e) Changes from prior periods are appropriate;
- (f) The data is relevant and reliable in the circumstances; and
- (g) Calculations are mathematically accurate and whether judgements have been applied consistently.

Method, Significant Assumptions and Data

Relevant considerations for the auditor regarding the appropriateness of the method, significant assumptions and data in the context of the applicable financial reporting framework, and, if applicable, the appropriateness of changes from the prior period may include:

- *Management's rationale for the selection of the method, assumption and data;*
- *Whether the method, assumption and data are appropriate in the circumstances given the nature of the accounting estimate, the requirements of the applicable financial reporting framework, and the business, industry and environment in which the entity operates;*
- *Whether a change from prior periods in selecting a method, assumption or data is based on new circumstances or new information. When it is not, the change may not be reasonable nor in compliance with the applicable financial reporting framework. Arbitrary changes in an accounting estimate may give rise to material misstatements of the financial statements or may be an indicator of possible management bias.*
- *When management has determined that different methods result in a range of significantly different estimates, how management has investigated the reasons for these differences.*
- *Whether the significant assumptions are inconsistent with each other and with those used in other accounting estimates.*

7.4.18D. The auditor's further audit procedures also shall address whether, in the context of the applicable financial reporting framework, management has taken appropriate steps to understand and address estimation uncertainty by selecting appropriate point estimates and developing related disclosures. If management has not undertaken such steps, the auditor shall:

- (a) Request management to perform additional procedures to address estimation uncertainty by reconsidering the selection of point estimates or providing additional disclosures related to the estimation uncertainty; and-
- (b) If the auditor determines that management's response to the auditor's request does not sufficiently address estimation uncertainty, to the extent practicable, develop an auditor's point estimate or range.

When the applicable financial reporting framework does not specify how to select a point estimate from among reasonably possible outcomes or does not require specific disclosures, the exercise of judgment by management is an important consideration for the auditor regarding the appropriateness of the point estimate selected and the related disclosures.

Matters that may be relevant for the auditor regarding management's disclosures about estimation uncertainty include the requirements of the applicable financial reporting framework, which may require disclosures:

- *That describe the amount as an accounting estimate and explain the nature and limitations of the process for making it; and*
- *About material accounting policy information related to accounting estimates, which may include significant or critical management judgments as well as significant forward-looking assumptions or other sources of estimation uncertainty.*

Developing an Auditor's Point Estimate or Range

7.4.18E. When the auditor develops a point estimate or range to evaluate management's point estimate, the auditor's further audit procedures shall include audit procedures to:

- (a) Evaluate whether the methods, assumptions or data used are appropriate in the context of the applicable financial reporting framework; and
- (b) Determine that the range includes only amounts that are supported by sufficient appropriate audit evidence.

The auditor's decision as to whether to develop a point estimate rather than a range may depend on the nature of the accounting estimate and the auditor's judgment in the circumstances. For example, the nature of the accounting estimate may be such that there is expected to be less variability in the reasonably possible outcomes. In these circumstances, developing a point estimate may be an effective approach, particularly when it can be developed with a higher degree of precision.

The requirement for the auditor to determine that the range includes only amounts that are supported by sufficient appropriate audit evidence does not mean that the auditor is expected to obtain audit evidence to support each possible outcome in the range individually. Rather, the auditor is likely to obtain evidence to determine that the points at both ends of the range are reasonable in the circumstances, thereby supporting that amounts falling between those two points also are reasonable.

Inventory

7.4.19. If inventory is material to the financial statements, the auditor shall obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by:

- (a) Attendance at physical inventory counting, unless impracticable, to:
 - (i) Evaluate management's instructions and procedures for recording and controlling the results of the entity's physical inventory counting;
 - (ii) Observe the performance of management's count procedures;
 - (iii) Inspect the inventory; and

- (iv) Perform test counts;
- (b) Performing audit procedures over the entity's final inventory records to determine whether they accurately reflect actual inventory count results; and
- (c) If the physical inventory counting is at a date other than the date of the financial statements,
~~p~~Performing audit procedures to obtain audit evidence about whether changes in inventory between the count date and the date of the financial statements are have been properly ~~recorded~~reflected if the physical inventory counting is at a date other than the date of the financial statements.

7.4.20. If the auditor has not attended the inventory count due to unforeseen circumstances, the auditor shall make or observe some physical counts on an alternative date, and perform audit procedures on intervening transactions. If attendance at physical inventory counting is impracticable, the auditor shall perform alternative audit procedures to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory, or if not possible, determine the effect on the auditor's report.¹⁷

In some cases, attendance at physical inventory counting may be impracticable. This may be due to factors such as the nature and location of the inventory, for example, where inventory is held in a location that may pose threats to the safety of the auditor. The matter of general inconvenience, difficulty, time, or cost involved, however, are not sufficient to support a decision by the auditor that attendance is impracticable. In some cases where attendance is impracticable, alternative audit procedures, for example, inspection of documentation of the subsequent sale of specific inventory items acquired or purchased prior to the physical inventory counting, may provide sufficient appropriate audit evidence about the existence and condition of inventory. In other cases, however, it may not be possible to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory by performing alternative audit procedures. In such cases, the auditor is required to modify the opinion in the auditor's report as a result of the scope limitation.

7.4.21. If inventory under the custody and control of a third party is material to the financial statements, the auditor shall obtain sufficient appropriate audit evidence regarding the existence and condition of that inventory, either through confirmation as to the quantities and condition or performing inspection or other audit procedures appropriate in the circumstances.

Litigation and Claims

7.4.22. The auditor shall design and perform further audit procedures in order to identify litigation and claims involving the entity which may give rise to a risk of material misstatement, including:

- (a) Inquiry of management and, where applicable, others within the entity, including in-house legal counsel;
- (b) Inspecting minutes of meetings of those charged with governance and correspondence between the entity and its external legal counsel; and
- (c) Inspecting legal expense accounts.

¹⁷ For the effect on the auditor's report see Part 9, paragraph 9.5.1.O.

7.4.23. If the auditor assesses~~identifies~~ a risk of material misstatement regarding litigation or claims that have been identified, or when audit procedures performed indicate that other material litigation or claims may exist, the auditor shall, in addition to the procedures required by this ~~[draft]~~ standard, seek direct communication with the entity's external legal counsel. The auditor shall do so through a letter of inquiry, prepared by management and sent by the auditor, requesting the entity's external legal counsel to communicate directly with the auditor.¹⁸

7.4.23A. If:

(a) management refuses to give the auditor permission to communicate or meet with the entity's external legal counsel, or the entity's external legal counsel refuses to respond appropriately to the letter of inquiry, or is prohibited from responding; and

(b) the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures,

the auditor shall modify the opinion in the auditor's report.¹⁹

Audit Procedures When Non-Compliance with Law or Regulation is Identified or Suspected

7.4.24. The auditor shall obtain sufficient appropriate audit evidence regarding compliance with the provisions of those laws or regulations generally recognized to have a direct effect on the determination of material amounts and disclosures in the financial statements.²⁰

7.4.25. If the auditor becomes aware of information concerning an instance of non-compliance or suspected non-compliance with law or regulation, the auditor shall:

- (a) Understand the nature and circumstances, and obtain further information necessary to evaluate the possible effect on the financial statements;
- (b) Discuss the non-compliance with management, and where appropriate, those charged with governance, unless prohibited to do so by law or regulation;
- (c) If sufficient information about suspected non-compliance cannot be obtained, evaluate the effect of the lack of sufficient appropriate audit evidence on the auditor's opinion; and
- (d) Evaluate the implications on other aspects of the audit, including the auditor's risk assessment and the reliability of written representations and take appropriate action.²¹

Using the Services of a Service Organization

7.4.26. If the entity is using the services of a service organization, the auditor shall:

- (a) Determine whether sufficient appropriate audit evidence concerning the relevant financial statement assertions is available at the entity; and, if not,

¹⁸ For the effect on the auditor's report see Part 9, paragraph 9.5.1.N.

¹⁹ For the effect on the auditor's report see Part 9, paragraph 9.5.1.OO.

²⁰ For the effect on the auditor's report see Part 9, paragraph 9.5.1.J.

²¹ For the effect on the auditor's report see Part 9, paragraphs 9.5.1.K., 9.5.1.L. and 9.5.1.M.

- (b) Perform further audit procedures to obtain sufficient appropriate audit evidence or use another auditor to perform those procedures at the service organization on the auditor's behalf.

[EEM Moved to EEM under 6.3.12B]

Using the Work of Management's Expert

7.4.26A. If information to be used as audit evidence has been prepared using the work of management's expert, the auditor shall, having regard to the significance of that expert's work for the auditor's purpose, evaluate the appropriateness of the expert's work as audit evidence for the relevant assertion. [Moved from 5.2.8. (c)]

Evaluating the Appropriateness of the Management's Expert's Work

Considerations when evaluating the appropriateness of the management's expert's work may include:

- *The relevance and reasonableness of that expert's findings or conclusions, their consistency with other audit evidence, and whether they have been appropriately reflected in the financial statements;*
- *If that expert's work involves use of significant assumptions and methods, the relevance and reasonableness of those assumptions and methods;*
- *If that expert's work involves significant use of source data, the relevance, completeness, and accuracy of that source data; and*
- *If that expert's work involves the use of information from an external information source, the relevance and reliability of that information. [Moved from EEM under 5.2.8.]*

Using the Work of an Auditor's Expert

7.4.27. When the auditor has determined to use the work of an auditor's expert, the auditor shall evaluate the adequacy of the auditor's expert's work, including:

- (a) The relevance and reasonableness of that expert's findings or conclusions, and their consistency with other audit evidence;
- (b) If that expert's work involves use of significant assumptions and methods, the relevance and reasonableness of those assumptions and methods in the circumstances; and
- (c) If that expert's work involves the use of source data that is significant to that expert's work, the relevance, completeness, and accuracy of that source data.

7.4.28. If the auditor determines that the work of the auditor's expert is not adequate for the auditor's purposes, the auditor shall agree on further work to be done by that expert or perform additional audit procedures appropriate to the circumstances.

7.5. Accumulation of Misstatements

7.5.1. The auditor shall accumulate misstatements identified during the audit, other than those that are clearly trivial.

Misstatements that are clearly trivial will be of a wholly different (smaller) order of magnitude, or of a wholly different nature than those that would be determined to be material, and will be misstatements that are clearly inconsequential, whether taken individually or in aggregate and whether judged by any criteria of nature, size or circumstances. When there is any uncertainty about whether one or more items are clearly trivial, the misstatement is considered not to be clearly trivial.

7.5.2. The auditor shall request management to correct all misstatements accumulated during the audit.

The auditor may request management to examine a class of transactions, account balance or disclosure in order for management to understand the cause of a misstatement identified by the auditor, perform procedures to determine the amount of the actual misstatement in the class of transactions, account balance or disclosure, and to make appropriate adjustments to the financial statements. Such a request may be made, for example, based on the auditor's projection of misstatements identified in an audit sample to the entire population from which it was drawn.

7.5.3. If the auditor identifies a misstatement during the audit, the auditor shall evaluate whether the misstatement is indicative of fraud. If there is such an indication, the auditor shall determine the implications on other aspects of the audit, including on the identified and assessed risks of material misstatement and the reliability of management representations.

Since fraud involves incentive or pressure to commit fraud, a perceived opportunity to do so or some rationalization of the act, an instance of fraud is unlikely to be an isolated occurrence. Accordingly, misstatements, such as numerous misstatements even though the cumulative effect is not material, may be indicative of a risk of material misstatement due to fraud.

7.5.4. If the auditor identifies a misstatement that may be the result of fraud, and suspects that management is involved, the auditor shall:

- (a) Reevaluate the risks of material misstatement due to fraud and the auditor's responses thereto; or
- (b) Consider whether circumstances or conditions indicate possible collusion involving employees, management or third parties when reconsidering the reliability of evidence previously obtained.

The implications of identified or suspected fraud depends on the circumstances. For example, an otherwise insignificant fraud may be significant if it involves senior management. In such circumstances, the reliability of evidence previously obtained may be called into question, since there may be doubts about the completeness and truthfulness of representations made and about the genuineness of accounting records and documentation. There may also be a possibility of collusion involving employees, management or third parties.

7.5.5. The auditor shall determine whether the scope, timing and direction of the audit ~~plan~~ needs to be revised if:

- (a) The nature of identified misstatements and the circumstances of their occurrence indicate that other misstatements may exist that, when aggregated with misstatements accumulated during the audit, could be material; and
- (b) The aggregate of misstatements accumulated during the audit approaches materiality.

7.6. Specific Communication Requirements

7.6.1. The auditor shall communicate:

- (a) Significant deficiencies in the entity's internal control system identified during the audit to those charged with governance in writing and on a timely basis.
- (b) With management, in writing and on a timely basis, matters that have been communicated to those charged with governance (unless it would be inappropriate to communicate directly with management in the circumstances) and other deficiencies in internal control identified that have not been communicated but are of sufficient importance to merit management's attention.

The communication of other deficiencies in internal control that merit management's attention need not be in writing but may be oral.

7.6.2. For communication of significant deficiencies to those charged with governance, the auditor shall include a description and explanation of the potential impact of the deficiencies, and sufficient information to understand the context of the communication.

In describing the context of the auditor's communication, the auditor may explain that:

- *The purpose of the audit was for the auditor to express an opinion on the financial statements;*
- *The audit included consideration of internal control relevant to the preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of internal control; and*
- *The matters being reported are limited to those deficiencies that the auditor has identified during the audit and that the auditor has concluded are of sufficient importance to merit being reported to those charged with governance.*

7.6.3. In communicating with management and, where appropriate, those charged with governance, the auditor shall consider if there are any matters to communicate regarding accounting estimates. In doing so, the auditor takes into account whether the reasons given to the risks of material misstatement relate to estimation uncertainty, or the effects of complexity, subjectivity, change or management bias in making accounting estimates and related disclosures.

7.7. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

7.7.1. The auditor shall include the following in the audit documentation:

- (a) The overall responses to the assessed risks of material misstatement at the financial statement level;
- (b) The linkage between the procedures performed and the assessed risks at the assertion level;
- (c) The results of the audit procedures, including the conclusions where these are not otherwise clear;
- (d) The results of audit procedures designed to address the risk of management override of controls; and

(f) All misstatements accumulated during the audit and whether they have been corrected.

(g) If the auditor plans to use audit evidence about the operating effectiveness of controls obtained in previous audits, the conclusions reached about relying on such controls that were tested in a previous audit.

7.7.2. Where the assessed risk of material misstatement is due to fraud, the auditor's documentation shall include the specific fraud response.

7.7.3. Where the auditor has identified or suspected non-compliance with law or regulation, the auditor shall document:

- (a) The results of discussion with management, and where appropriate, those charged with governance and others; including how the matter has been responded to; and
- (b) The audit procedures performed, the significant professional judgments made, and the conclusions reached thereon.

7.7.4. For accounting estimates, the auditor shall document significant judgments relating to the auditor's determination of whether the accounting estimates and related disclosures are reasonable in the context of the applicable financial reporting framework, or are misstated.

8. Concluding

Content of this Part

Part 8 sets out the requirements for:

- Evaluating corrected and uncorrected misstatements identified during the audit.
- Subsequent events.
- Concluding activities, including the related evaluations.
- Concluding on going concern and related disclosures.
- Written representations and performing concluding analytical procedures.

Scope of this Part

The evaluations performed and the conclusions reached will form the basis for the auditor's opinion in Part 9.

8.1. Objectives

8.1.1. The objectives of the auditor are to:

- (a) Evaluate, ~~when applicable~~, the effect of identified misstatements on the audit and the effect of any uncorrected misstatements on the financial statements;
- (b) Conclude, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern; and
- (c) Conclude on whether sufficient appropriate audit evidence has been obtained on which to base the auditor's opinion.

8.2. Evaluation of Misstatements Identified During the Audit

8.2.1. If management refuses to correct some or all of the misstatements communicated by the auditor, the auditor shall obtain an understanding of management's reasons for not making the corrections and shall take that understanding into account when evaluating whether the financial statements as a whole are free from material misstatement.

8.2.2. Prior to evaluating the effect of uncorrected misstatements, the auditor shall reassess materiality to confirm whether it remains appropriate in the context of the entity's actual financial results.

8.2.3. The auditor shall determine whether uncorrected misstatements are material, individually or in aggregate, by considering the:

- (a) Nature and size of the misstatements, both in relation to particular classes of transactions, account balances or disclosures and the financial statements as a whole, and the particular circumstances of their occurrence; and
- (b) Effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole.

8.3. Analytical Procedures that Assist When Forming an Overall Conclusion

- 8.3.1. The auditor shall design and perform analytical procedures near the end of the audit that assist the auditor when forming an overall conclusion as to whether the financial statements are consistent with the auditor's understanding of the entity, and to identify any indications of a previously unidentified risk of material misstatement due to fraud ~~or error~~.
- 8.3.2. The auditor shall investigate fluctuations or relationships that are inconsistent with other relevant information obtained during the course of the audit, by inquiring of management and performing other audit procedures as necessary in the circumstances.

8.4. Subsequent Events

Financial statements may be affected by certain events that occur after the date of the financial statements. Many financial reporting frameworks specifically refer to such events. Such financial reporting frameworks ordinarily identify two types of events:

- ~~(a)~~ Those that provide evidence of conditions that existed at the date of the financial statements; and
- ~~(b)~~ Those that provide evidence of conditions that arose after the date of the financial statements.

The auditor is not, however, expected to perform additional procedures on matters to which previously applied audit procedures have provided satisfactory conclusions.

Events Occurring between the Date of the Financial Statements and the Date of the Auditor's Report

- 8.4.1. The auditor shall perform audit procedures designed to obtain sufficient appropriate audit evidence that all events occurring between the date of the financial statements and the date of the auditor's report that require adjustment of, or disclosure in, the financial statements have been identified.
- 8.4.2. The auditor shall perform those procedures in accordance with paragraph 8.4.1. for the period from the date of the financial statements to the date of the auditor's report, or as near as practicable thereto, including:
- (a) Obtaining an understanding of any procedures management has established to ensure that subsequent events are identified.
 - (b) Inquiring of management, and where appropriate, those charged with governance, as to whether any subsequent events have occurred that may affect the financial statements.
 - (c) Reading minutes of meetings of the owners, those charged with governance and management held after the balance sheet date and inquiring about matters discussed at any such meetings for which minutes are not yet available.
 - (d) Reading the entity's monthly or quarterly information, if available.
- 8.4.3. If the auditor has identified events that require adjustment to the financial statements or disclosures therein to comply with the entity's applicable financial reporting framework when performing the procedures in paragraphs 8.4.1. and 8.4.2, the auditor shall determine whether each such event is appropriately reflected in the financial statements.

Facts Which Become Known to the Auditor after the Date of the Auditor's Report but before the Date the Financial Statements Are Issued

8.4.4. The auditor has no obligation to perform any audit procedures regarding the financial statements after the date of the auditor's report. However, if the auditor becomes aware of facts or events that, had it been known to the auditor at the date of the auditor's report but before the financial statements are issued, may have caused the auditor to amend the auditor's report, the auditor shall discuss with management, and where appropriate, those charged with governance, and determine whether the financial statements need amendment and if so, inquire how management intends to address the matter.

8.4.5. If management amends the financial statements, the auditor shall carry out the audit procedures necessary in the circumstances on the amendment, including extending the audit procedures performed to the date of the new auditor's report and providing a new auditor's report on the amended financial statements.

8.4.5A. If management does not amend the financial statements in circumstances where the auditor believes they need to be amended, then:

(a) If the auditor's report has not yet been provided to the entity, the auditor shall modify the opinion and then provide the auditor's report;²² or

(b) If the auditor's report has already been provided to the entity, the auditor shall take appropriate action to seek to prevent reliance on the auditor's report.

In some jurisdictions, management may not be required by law, regulation or the financial reporting framework to issue amended financial statements and, accordingly, the auditor need not provide an amended or new auditor's report.

Facts Which Become Known to the Auditor after the Financial Statements Have Been Issued

8.4.6. After the financial statements have been issued, the auditor has no obligation to perform any audit procedures regarding such financial statements. However, if, after the financial statements have been issued, a fact becomes known to the auditor that, had it been known to the auditor at the date of the auditor's report, may have caused the auditor to amend the auditor's report, the auditor shall:

(a) Discuss the matter with management and, where appropriate, those charged with governance;

(b)___—Determine whether the financial statements need amendment; and, if so,

(c)___—Inquire how management intends to address the matter in the financial statements.

8.4.6A. If management amends the financial statements, the auditor shall:

(a) Carry out the audit procedures necessary in the circumstances on the amendment, including extending the audit procedures performed to the date of the new auditor's report and providing a new auditor's report on the amended financial statements; and;

²² For the effect on the auditor's report see Part 9, paragraph 9.5.1.SS.

(b) Review the steps taken by management to ensure that anyone in receipt of the previously issued financial statements together with the auditor's report thereon is informed of the situation.

8.4.6B. If management does not take the necessary steps to ensure that anyone in receipt of the previously issued financial statements is informed of the situation and does not amend the financial statements in circumstances where the auditor believes they need to be amended, the auditor shall take appropriate action to seek to prevent reliance on the auditor's report.

8.5 The Auditor's Evaluations and Other Activities to Support the Auditor's Conclusion

Evaluations Required

8.5.1. Based on the audit procedures performed and the audit evidence obtained, the auditor shall evaluate whether the assessments of the risks of material misstatement at the financial statement and assertion levels remain appropriate.

An audit of financial statements is a cumulative and iterative process. As the auditor performs planned audit procedures, the audit evidence obtained may cause the auditor to modify the nature, timing or extent of planned audit procedures. Information may come to the auditor's attention that differs significantly from the information on which the risk assessment was based. In such circumstances, the auditor may need to reevaluate the planned audit procedures, based on the revised consideration of assessed risks for all or some of the classes of transactions, account balances, or disclosures and related assertions.

The auditor may also consider whether such information changes the auditor's determination about the appropriateness of use of the ISA for LCE for the audit, which may necessitate a modification to the terms of engagement.

8.5.2. For accounting estimates, the auditor shall evaluate, based on the audit procedures performed and audit evidence obtained, whether:

- (a) The assessments of the risks of material misstatement at the assertion level remain appropriate, including when indicators of possible management bias have been identified; and
- (b) Management's decisions about the recognition, measurement, presentation and disclosure of accounting estimates in the financial statements are reasonable in the context of the applicable financial reporting framework; and

(c) Sufficient appropriate audit evidence has been obtained.

8.5.3. The auditor shall evaluate whether two-way communication between the auditor and those charged with governance has been adequate for the purpose of the audit. If it has not, the auditor shall evaluate the effect, if any, on the audit and take action as appropriate.

For example, the original risk assessments may need to be revised, the auditor's opinion may need to be modified on the basis of a scope limitation or other actions may need to be taken as appropriate.

8.5.4. The auditor shall perform audit procedures to evaluate whether the overall presentation of the financial statements is in accordance with the applicable financial reporting framework. In making this evaluation, the auditor shall consider whether the financial statements are presented in a manner that reflects the appropriate:

- (a) Classification and description of financial information and the underlying transactions, events and conditions; and
- (b) Presentation, structure and content of the financial statements

Concluding

8.5.5. The auditor shall conclude whether sufficient appropriate audit evidence has been obtained. In forming an opinion, the auditor shall consider all relevant audit evidence, regardless of whether it appears to be corroborative or contradictory.

8.5.6. If the auditor has not obtained sufficient appropriate audit evidence as to a relevant assertion, the auditor shall attempt to obtain additional audit evidence. If the auditor is unable to obtain sufficient appropriate audit evidence, the auditor shall express a qualified opinion or disclaim an opinion on the financial statements.²³

8.5.7. The auditor shall evaluate whether sufficient appropriate audit evidence has been obtained regarding, and shall conclude on, the appropriateness of management's use of the going concern basis of accounting in the preparation of the financial statements.²⁴

8.5.8. The auditor shall conclude, based on the audit evidence obtained, whether in the auditor's professional judgment, a material uncertainty exists related to events or conditions that, individually or collectively, may cast significant doubt on the entity's ability to continue as a going concern.²⁵

8.5.9. If the auditor concludes, ~~based on the audit evidence obtained,~~ that management's use of the going concern basis of accounting is appropriate in the circumstances but a material uncertainty exists, the auditor shall determine whether ~~adequate disclosure about a material uncertainty related to going concern has been made in~~ the financial statements, ~~including:~~

- (a) Adequately disclose the principal events or conditions that may cast significant doubt on the entity's ability to continue as a going concern and management's plans to deal with these events or conditions; and
- (b) Disclosing clearly that there is a material uncertainty related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business.

In such cases, the auditor shall express an unmodified opinion and the auditor's report shall include a separate section under the heading "Material Uncertainty Relating to Going Concern"

8.5.10. If events or conditions have been identified that may cast significant doubt on the entity's ability to continue as a going concern but, based on the audit evidence obtained the auditor concludes that no material uncertainty exists, the auditor shall evaluate whether, in view of the requirements of the

²³ For the effect on the auditor's report see Part 9, paragraph 9.5.1.W.

²⁴ For the effect on the auditor's report see Part 9, paragraph 9.5.1.P.

²⁵ For the effect on the auditor's report see Part 9, paragraph 9.5.1.q.

applicable financial reporting framework, the financial statements provide adequate disclosures about these events or conditions.

- 8.5.11. If the auditor confirms that, or is unable to conclude whether, the financial statements are materially misstated as a result of fraud, the auditor shall evaluate the implications on the audit including on the assessed risks of material misstatement and the auditor's report.

8.6. Written Representations ~~from Management and Those Charged with Governance~~

Written representations are necessary information that the auditor requests in connection with the audit of the entity's financial statements. Accordingly, similar to responses to inquiries, written representations are audit evidence. However, although written representations provide necessary audit evidence, they do not provide sufficient appropriate audit evidence on their own about any of the matters with which they deal. Furthermore, the fact that management has provided reliable written representations does not affect the nature or extent of other audit evidence that the auditor obtains about the fulfillment of management's responsibilities, or about specific assertions.

- 8.6.1. The auditor shall obtain written representations from management ~~for all periods referred to in the auditor's opinion~~, who have appropriate knowledge of the matters concerned and responsibility for the financial statements, and where appropriate, those charged with governance about the following matters:

- (a) That they have fulfilled their responsibility for the preparation of the financial statement in accordance with the applicable financial reporting framework, including where relevant their fair presentation;
- (b) That they have provided the auditor with all relevant information and access as agreed in the terms of the audit engagement;²⁶
- (c) That all transactions are recorded and are reflected in the financial statements;
- (d) That they acknowledge their responsibility for the design, implementation and maintenance of controls to prevent and detect fraud;
- (e) That they have disclosed to the auditor the result of its assessment of the risk that the financial statements may be materially misstated because of fraud;
- (f) That their knowledge of fraud, or suspected fraud, or allegations of fraud or suspected fraud has been disclosed to the auditor;
- (g) That they have disclosed to the auditor the identity of the entity's related parties and all the related party relationships and transactions of which they are aware;
- (h) That they have appropriately accounted for and disclosed related party relationships and transactions in accordance with the requirements of the financial reporting framework;

²⁶ The management ~~responsibilities representation~~ shall be described in the same way ~~in the representation~~ as described in the terms of engagement.

- (i) That all known instances of non-compliance or suspected non-compliance with law or regulation whose effects should be considered when preparing financial statements have been disclosed to the auditor;
- (j) That all known actual or possible litigation and claims whose effects should be considered when preparing the financial statements have been disclosed to the auditor and accounted for and disclosed in accordance with the applicable financial reporting framework;
- (k) With regard to accounting estimates, whether the methods, significant assumptions and data used in making the accounting estimates and disclosures are appropriate to achieve recognition, measurement or disclosure is in accordance with the applicable financial reporting framework;
- (l) That all events occurring subsequent to date of the financial statements and for which the applicable financial reporting framework requires adjustment or disclosure have been adjusted or disclosed;
- (m) With regard to going concern, if a material uncertainty exists, information about their plans for future actions and the feasibility of these plans;
- (n) Regarding any restatement made to correct a material misstatement in prior period financial statements that affect the comparative information; and
- (o) Other representations the auditor determines necessary to support other audit evidence relevant to the financial statements or one or more specific assertions in the financial statements, including where necessary to support oral representations.

8.6.2. The auditor shall consider the need to obtain representations about specific accounting estimates.

8.6.3. The written representation shall be in the form of a representation letter addressed to the auditor.

Appendix ~~76~~ sets out an ~~illustrative example management~~ representation letter.

If law or regulation requires management to make written public statements about its responsibilities, and the auditor determines that such statements provide some or all of the representations required by this ~~[draft]~~ standard, the relevant matters covered by such statements need not be included in the representation letter.

8.6.4. The auditor shall request a written representation from management, and where appropriate, those charged with governance, whether they believe the effects of uncorrected misstatements are immaterial, individually or in aggregate, to the financial statements as a whole. A summary of such items shall be included in or attached to the written representation.

8.6.5. If the auditor has concerns about the competence, integrity, ethical values, or diligence of management, or about its commitment to or enforcement of these, or representations received are inconsistent with other audit evidence, the auditor shall determine the effect on audit evidence more generally and take appropriate actions, including considering the possible effect on the opinion in the auditor's report.²⁷

²⁷ For the effect on the auditor's report see Part 9, paragraph 9.5.1.T. [and 9.5.1.TT.](#)

8.6.6. If management does not provide one or more of the requested written representations, the auditor shall:

- (a) Discuss the matter with management;
- (b) Reevaluate the integrity of management and evaluate the effect this may have on the reliability of oral and written representations and audit evidence in general; and
- (c) Take appropriate actions, including determining the possible effect on the opinion in the auditor's report~~disclaiming an opinion on the financial statements when management refuses to provide one or more required written representations or there is sufficient doubt about management's integrity.~~²⁸

8.6.7. The date of the written representations shall be as near as practicable to, but not after, the date of the auditor's report on the financial statements. The written representations shall be for all financial statements and period(s) referred to in the auditor's report.

8.7. Taking Overall Responsibility for Managing and Achieving Quality

8.7.1. Prior to dating the auditor's report, the engagement partner shall determine that the engagement partner has taken overall responsibility for managing and achieving quality on the audit engagement. In doing so, the engagement partner shall determine that:

- (a) The engagement partner's involvement has been sufficient and appropriate throughout the audit engagement such that the engagement partner has the basis for determining that the significant judgments made and the conclusions reached are appropriate given the nature and circumstances of the engagement; and
- (b) The nature and circumstances of the audit engagement, any changes thereto, and the firm's related policies or procedures have been taken into account.

8.7.2. On or before the date of the auditor's report, the engagement partner shall determine that sufficient appropriate audit evidence has been obtained to support the conclusions reached and for the auditor's report to be issued.

8.7.3. Prior to dating the auditor's report, the engagement partner shall review the financial statements and the auditor's report to determine that the auditor's report being issued is appropriate in the circumstances.

8.8. Specific Communication Requirements

8.8.1. The auditor shall communicate, on a timely basis, all misstatements accumulated during the audit with the appropriate level of management, ~~and as appropriate, those charged with governance,~~ unless prohibited by law or regulation.

8.8.2. The auditor shall communicate ~~to~~with those charged with governance:

²⁸ For the effect on the auditor's report see Part 9, paragraph 9.5.1.U. and 9.5.1.UU.

- (a) Uncorrected misstatements and the effect that they, individually or in aggregate, may have on the auditor's opinion, unless prohibited by law or regulation. The auditor's communication shall identify the material uncorrected misstatement individually.
- (b) The effect of uncorrected misstatements from prior periods on the current year financial statements.
- (ca) The auditor's views about significant qualitative aspects of the entity's accounting practices, including accounting policies, accounting estimates and financial statement disclosures.
- (db) Significant difficulties, if any, encountered during the audit.
- (ee) Significant matters arising during the audit, including in connection to the entity's related parties, that were discussed, or subject to correspondence, with management.
- (fd) Significant findings from the audit. If, in the auditor's professional judgment, oral communications would not be adequate this communication shall be in writing.
- (ge) Other matters, not already reported, related to fraud that may be relevant to the responsibilities of those charged with governance, unless prohibited by law or regulation.
- (hf) Circumstances, if any, that affect the form and content of the auditor's report.
- (ig) Written representations the auditor is requesting.
- (jh) Other significant matters, if any, arising from the audit that, in the auditor's professional judgment, are relevant to the oversight of the financial reporting process.
- (ki) The expectation thereof and the wording if the auditor expects to include an Emphasis of Matter or Other Matter Paragraph in the auditor's report.

~~8.8.3. The auditor shall communicate to those charged with governance significant matters arising during the audit in connection with the entity's related parties.~~

~~8.8.4. In regard to uncorrected misstatements, the auditor shall communicate with those charged with governance:~~

- ~~(a) Uncorrected material misstatements (identified individually) and the effect that they, individually or in aggregate, may have on the auditor's opinion, unless prohibited by law or regulation; and~~
- ~~(b) The effect of uncorrected misstatements from prior periods on the current year financial statements.~~

8.8.5. Unless all those charged with governance are involved in managing the entity, the auditor shall communicate with those charged with governance events or conditions identified that may cast significant doubt on the entity's ability to continue as a going concern, including:

- (a) Whether the events or conditions constitute a material uncertainty;
- (b) Whether management's use of the going concern basis of accounting is appropriate in the preparation of the financial statements;
- (c) The adequacy of related disclosures in the financial statements; and
- (d) Where applicable, the implications for the auditor's report.

8.9. Specific Documentation Requirements

In addition to the general documentation requirements ~~in~~ Part 2.5 which apply throughout the audit engagement, specific matters to be documented relevant to this Part are described below.

8.9.1. The auditor shall include the following in the audit documentation:

- (a) All misstatements accumulated during the audit and whether they have been corrected, and the auditor's conclusion as to whether the uncorrected misstatements are material, individually or in aggregate, and the basis for that conclusion; and
- (b) The nature and scope of, and conclusions from, consultations undertaken during the audit, including how such conclusions were implemented.

8.9.2. The auditor's documentation shall demonstrate that information in the financial statements agrees or reconciles with the underlying accounting records, including agreeing or reconciling disclosures, whether such information is obtained from within or outside of the general and subsidiary ledgers.

8.9.3. The auditor shall assemble the audit documentation in an audit file and complete the administrative process of assembling the final audit file on a timely basis after the date of the auditor's report.

8.9.4. After assembly of the final audit file is complete, the auditor shall not delete or discard audit documentation of any nature before the end of its retention period.

8.9.5. If applicable, the auditor shall document the failure to meet an objective of any Part of the ~~ISA~~ for LCE, and the resulting action (such as the effect on the auditor's opinion or withdrawal from the engagement if the overall objective of the auditor cannot be met).

8.9.6. If the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the assembly of the final audit file has been completed, the auditor shall, regardless of the nature of the modifications or additions, document:

- (a) The specific reasons for making them; and
- (b) When and by whom they were made and reviewed.

9. Forming an Opinion and Reporting

Content of this Part

Part 9 sets out the requirements for:

- Forming an opinion;
- The types of audit opinions; and
- The content of the auditor's report.
- Other Information and Comparative Information.

Scope of this Part

This Part explains the content of the auditor's report, and sets out the auditor's determination of modifications, as well as when other adjustments to the auditor's report are needed. It also sets out the auditor's required procedures in relation to corresponding figures and comparative financial statements, and other information (if applicable).

Examples of modified opinions, material uncertainty related to going concern, emphasis of matter and other matter paragraphs, [and related guidance on auditor reports](#), can be found in the *Auditor Reporting Supplemental Guide* (~~which can be found on the ISA for LCE Exposure Draft webpage~~).

9.1. Objectives

9.1.1. The objectives of the auditor are to:

- (a) Form an opinion on the financial statements based on an evaluation of the conclusions drawn from the audit evidence obtained and to express clearly that opinion through a written report; and
- (b) Consider whether there is a material inconsistency between the other information, if any, and the:
 - (i) Financial statements; and
 - (ii) Auditor's knowledge obtained in the audit.

9.2. Forming an Opinion on the Financial Statements

9.2.1. The auditor shall form an opinion on whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

9.2.2. In order to form that opinion, the auditor shall conclude as to whether the auditor has obtained reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error. That conclusion shall take into account:

- (a) Whether sufficient appropriate audit evidence has been obtained;
- (b) Whether uncorrected misstatements, individually or in aggregate are material; and
- (c) The evaluations required by paragraphs 9.2.3. to 9.2.6.

- 9.2.3. The auditor shall evaluate whether the financial statements are prepared, in all material respects, in accordance with the requirements of the applicable financial reporting framework. This evaluation shall include consideration of the qualitative aspects of the entity's accounting practices, including indicators of possible bias in management's judgments.
- 9.2.4. In performing the evaluation in paragraph 9.2.3., the auditor shall evaluate, in view of the applicable financial reporting framework, whether:
- (a) The financial statements appropriately disclose the entity's significant accounting policies, and whether they have been presented in an understandable way;
 - (b) The entity's accounting policies selected and applied are consistent with the applicable financial reporting framework and are appropriate;
 - (c) The accounting estimates and related disclosures made by management are reasonable;
 - (d) The identified related party relationships and transactions have been appropriately accounted for, presented and disclosed in accordance with the applicable financial reporting framework;
 - (e) The information presented in the financial statements is relevant, reliable, comparable and understandable including whether:
 - (i) The information that should have been included has been included;
 - (ii) Such information is appropriately classified, aggregated or disaggregated, and characterized; and
 - (iii) The overall presentation of the financial statements has been undermined by including information that is not relevant or that obscures a proper understanding of the matters disclosed;
 - (f) The financial statements provide adequate disclosures to enable intended users to understand the effect of material transactions and events on the information conveyed in the financial statements; and
 - (g) The terminology used in the financial statements, including the title of each financial statement, is appropriate.
- 9.2.5. When the financial statements are prepared in accordance with a fair presentation framework, the auditor shall also evaluate whether the financial statements achieve fair presentation. This evaluation shall include consideration of:
- (a) The overall presentation, structure and content of the financial statements; and
 - (b) Whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

The auditor's evaluation about whether the financial statements achieve fair presentation, both in respect of presentation and the disclosures necessary to achieve it, is a matter of professional judgment.

- 9.2.6. The auditor shall evaluate whether the financial statements adequately refer to or describe the applicable financial reporting framework.

9.3. Form of Opinion

- 9.3.1. The auditor shall express an unmodified opinion when the auditor concludes that the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

Where the financial reporting framework is a fair presentation framework, as is generally the case for general purpose financial statements, the opinion required is on whether the financial statements are presented fairly, in all material respects, or give a true and fair view. Where the financial reporting framework is a compliance framework, the opinion required is on whether the financial statements are prepared, in all material respects, in accordance with the framework.

- 9.3.2. If financial statements prepared in accordance with the requirements of a fair presentation framework do not achieve fair presentation, the auditor shall discuss the matter with management and, depending on the requirements of the applicable financial reporting framework and how the matter is resolved, determine whether to modify the opinion.²⁹
- 9.3.3. When the financial statements are prepared in accordance with a compliance framework, the auditor is not required to evaluate whether the financial statements achieve fair presentation. However, if in extremely rare circumstances the auditor concludes, based on the audit evidence obtained, that such financial statements are misleading, the auditor shall discuss the matter with management and, depending on how it is resolved, shall determine whether, and how, to communicate it in the auditor's report.³⁰

9.4. Auditor's Report

- 9.4.1. The auditor shall report in accordance with the specified format and content below unless:

- (a) Amendment to the auditor's report is required for compliance with law or regulation, including when ~~law or regulation~~ a legislative or regulatory authority in the jurisdiction prescribes the layout or wording of the auditor's report or if prescribed by a relevant local body with standard-setting authority. When the layout or wording of the auditor's report is prescribed, the auditor's report shall refer to this ~~[draft]~~ ISA for LCE only if all significant elements of the specified format and content are included; or
- (b) The auditor's report includes a modified opinion, emphasis of matter paragraph, other matter paragraph, material uncertainty related to going concern, other reporting responsibilities, or a separate section dealing with Other Information, in which case the auditor shall modify the auditor's opinion (according to Part 9.5.) or amend the auditor's report (according to Part 9.8.).

²⁹ For the effect on the auditor's report see Part 9, paragraph 9.5.1.X.

³⁰ For the effect on the auditor's report see Part 9, paragraph 9.5.1.Y.

INDEPENDENT AUDITOR'S REPORT

To the [Shareholders of ABC Company or Other Appropriate Addressee]³¹

Opinion

We have audited³² the financial statements of [ABC Company (the CompanyEntity), which comprise the statement of financial position as at December 31, 20X1, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies (replace these report names with the appropriate titles)].³³

In our opinion, the accompanying financial statements ["present fairly, in all material respects" or "give a true and fair view of"]³⁴ the financial position of the CompanyEntity as at [December 31, 20X1], and [of] its financial performance and its cash flows for the year then ended in accordance with [applicable financial reporting framework].³⁵

Basis for Opinion

We conducted our audit in accordance with the [International Standard ~~for on~~ Auditing ~~foren~~ Audits of Financial Statements of Less Complex Entities (the ISA for LCE)]. Our responsibilities under the ISA for LCE are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.³⁶ We are independent of the CompanyEntity in accordance with the ethical requirements that are relevant to our audit of the financial statements in [jurisdiction], and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.³⁷

Responsibilities of [Management] for the Financial Statements³⁸

[Management] is responsible for the preparation [and fair presentation of] the financial statements in accordance with [applicable financial reporting framework],³⁹ and for such internal control as [management] determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, [management] is responsible for assessing the EntityCompany's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless [management] either intends to liquidate the EntityCompany or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements⁴⁰⁴¹

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the ISA for LCE will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the ISA for LCE, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Understand internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the [EntityCompany's] internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

³¹ Matters reflected in the specified format and content of the auditor's report in square brackets (e.g. []) are to be tailored accordingly.

³² When disclaiming an opinion, the statement which indicates that the financial statements have been audited is amended to state that the auditor was engaged to audit the financial statements.

³³ Identify the entity whose financial statements have been audited; identify each financial statement and its date and period, and refer to the notes and significant accounting policies or use another appropriate description in accordance with the applicable financial reporting framework.; ~~refer to the notes and significant accounting policies and the date and period of each financial statement covered.~~

³⁴ See also 9.4.2 below. When the financial statements are prepared in accordance with a compliance framework, the opinion and description of the auditor's responsibilities refer instead to whether the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework.

³⁵ Identify the jurisdiction of origin of the financial reporting framework if it is not International Financial Reporting Standards or International Public Sector Accounting Standards as issued by the International Public Sector Accounting Standards Board.

³⁶ When the auditor disclaims an opinion on the financial statements, this statement is not included in the auditor's report.

³⁷ When the auditor expresses a qualified or adverse opinion, the statement about whether the audit evidence obtained is sufficient and appropriate to provide a basis for the auditor's opinion is amended to include the word "qualified" or "adverse", as appropriate. When the auditor disclaims an opinion on the financial statements, this statement is not included in the auditor's report.

³⁸ Or other terms that are appropriate in the context of the legal framework of the particular jurisdiction.

³⁹ Where management's responsibility is to prepare financial statements that give a true and fair view, this may read: "Management is responsible for the preparation of financial statements that give a true and fair view in accordance with [applicable financial reporting framework], and for such ..."

⁴⁰ The description of the auditor's responsibilities may also be included within an appendix, or where law, regulation or national auditing standards expressly permit, as a description on a website of an appropriate authority when the description addresses, and is not inconsistent with, this ISA for LCE. In such cases, a reference to the location of appendix or description shall be included within the auditor's report. When the auditor disclaims an opinion on the financial statements, the description of the auditor's responsibilities only includes the matters required by paragraph 9.5.4.

⁴¹ When Part 10 applies, further describe the auditor's responsibilities in a group audit engagement by stating that;

- (i) The auditor's responsibilities are to plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the group as a basis for forming an opinion on the group financial statements;
- (ii) The auditor is responsible for the direction, supervision and review of the audit work performed for purposes of the group audit; and
- (iii) The auditor remains solely responsible for the auditor's opinion.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the *[EntityCompany's]* ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the *[EntityCompany]* to cease to continue as a going concern.
- *[Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.]*⁴²

We communicate with *[management, and where appropriate, those charged with governance]* regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

[Signature in the name of the audit firm, the personal name of the auditor, or both, as appropriate for the particular jurisdiction]

[Auditor Address: name the location in the jurisdiction where the auditor practices]

[Date: No earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the auditor's opinion on the financial statements, including evidence that (i) All the statements and disclosures that comprise the financial statements have been prepared; and (ii) Those with the recognized authority have asserted that they have taken responsibility for those financial statements.]

9.4.2. When the financial statements are prepared in accordance with a fair presentation framework, the auditor shall refer to "the preparation and fair presentation of these financial statements" or "the preparation of financial statements that give a true and fair view," as appropriate in the circumstances, in the description of responsibilities for the financial statements in the auditor's report.

9.4.3. The auditor shall not refer to the work of an auditor's expert in an auditor's report containing an unmodified opinion unless required by law or regulation to do so. If such reference is required by law or regulation, the auditor shall indicate in the auditor's report that the reference does not reduce the auditor's responsibility for the auditor's opinion.

9.5. Modifications to the Opinion

Tables A to C below set out the requirements for which a modified opinion is to be used in different situations, and the form and content of a modified opinion.

9.5.1.A. The auditor shall modify the opinion in the auditor's report according to Tables A ~~to~~ C below when:

- (a) The auditor concludes that, based on the audit evidence obtained, the financial statements as a whole are not free from material misstatement; or

⁴² Relevant when the financial statements are prepared in accordance with a fair presentation framework.

- (b) The auditor is unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement.

9.5.1.B. When the auditor modifies the audit opinion, the auditor shall:

- (a) Amend the heading “Basis for Opinion” to “Basis for Qualified Opinion,” “Basis for Adverse Opinion,” or “Basis for Disclaimer of Opinion” as set out in tables A–C; and
- (b) Within the basis for opinion section, include a description of the matter giving rise to the modification.

Table A below specifies how the auditor’s judgment about the nature of the matter giving rise to the modification, and the pervasiveness of its effects or possible effects on the financial statements, affects the type of opinion to be expressed.

TABLE A <i>Nature of Matter Giving Rise to the Modification</i>	<i>Auditor’s Judgment about the Pervasiveness of the Effects or Possible Effects on the Financial Statements</i>	
	<i>Material but Not Pervasive</i>	<i>Material and Pervasive</i>
Financial statements are materially misstated	Qualified opinion	Adverse opinion
Inability to obtain sufficient appropriate audit evidence	Qualified opinion	Disclaimer of opinion

Table B below specifies the modification to be made to the opinion for each type of opinion in Table A.

TABLE B Form of opinion	Fair Presentation Framework	Compliance Framework
<u>9.5.1.C. Qualified opinion</u> Auditor’s Report–Heading for opinion: “Qualified Opinion” Auditor’s Report–Heading for Basis for Opinion: “Basis for Qualified Opinion”	“In our opinion, except for the [effects or possible effects]⁴³ of the matter(s) described in the Basis for Qualified Opinion section, the accompanying financial statements present fairly, in all material respects (or give a true and fair view of) [...] in accordance with [the applicable financial reporting framework]”	“...except for the [effects or possible effects] of the matter(s) described in the Basis for Qualified Opinion section, the accompanying financial statements have been prepared, in all material respects, in accordance with [the applicable financial reporting framework]”

⁴³ Matters reflected in square brackets (e.g., []) are to be tailored accordingly

9.5.1.D. Adverse opinion Auditor's Report–Heading for opinion: "Adverse Opinion" Auditor's Report–Heading for Basis for Opinion: "Basis for Adverse Opinion"	"...the accompanying financial statements do not present fairly (or give a true and fair view of) [...] in accordance with [the applicable financial reporting framework]"	"...the accompanying financial statements have not been prepared, in all material respects, in accordance with [the applicable financial reporting framework]"
9.5.1.E. Disclaimer of opinion Auditor's Report–Heading for opinion: "Disclaimer of Opinion" Auditor's Report–Heading for Basis for Opinion: "Basis for Disclaimer of Opinion"	"[The auditor does] not express an opinion on the accompanying financial statements. Because of the significance of the matter(s) described in the Basis for Disclaimer of Opinion section, [the auditor has] not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements."	

Table C below sets out specific circumstances when the auditor's opinion is to be modified, and the types of opinions expressed in those circumstances based on the nature of the matter giving rise to the modification (see Table A). Table C is not an exhaustive list of all circumstances when the auditor's opinion is to be modified.

TABLE C Specific Circumstances When the Auditor's Opinion is to be Modified	Para Ref	Qualified	Adverse	Disclaimer
<i>Opening Balances</i>				
9.5.1.F. The auditor is unable to obtain sufficient appropriate audit evidence regarding the opening balances. ⁴⁴	4.6.4.	✓		✓
9.5.1.G. The auditor concludes, based on the audit evidence obtained, that the opening balances contain a misstatement that materially affects the current period's financial statements, and the effect of the misstatement is not	4.6.5.	✓	✓	

TABLE C Specific Circumstances When the Auditor's Opinion is to be Modified	Para Ref	Qualified	Adverse	Disclaimer
appropriately accounted for or not adequately presented or disclosed.				
9.5.1.H. The auditor concludes, based on the audit evidence obtained, that the current period's accounting policies are not consistently applied in relation to opening balances in accordance with the applicable financial reporting framework or a change in accounting policies is not appropriately accounted for or adequately presented or disclosed, in accordance with the financial reporting framework.	4.6.6.	✓	✓	
9.5.1.I. The prior period's financial statements included a modification that remains relevant and material to the current period's financial statements.	4.6.3.	✓	✓	✓
<i>Non-Compliance with Laws and Regulations</i>				
9.5.1.J. Sufficient information about suspected non-compliance cannot be obtained.	7.4.24.	✓		✓
9.5.1.K. The auditor concludes that the identified or suspected non-compliance has a material effect on the financial statements, and has not been adequately reflected in the financial statements.	7.4.25	✓	✓	
9.5.1.L. The auditor is precluded by management or those charged with governance from obtaining sufficient appropriate audit evidence to evaluate whether non-compliance that may be material to the financial statements has, or is likely to have, occurred.	7.4.25.	✓		✓
9.5.1.M. The auditor is unable to determine whether non-compliance has occurred because of limitations imposed by the circumstances rather than by management or those charged with governance.	7.4.25.	✓		✓

TABLE C Specific Circumstances When the Auditor's Opinion is to be Modified	Para Ref	Qualified	Adverse	Disclaimer
<i>External Confirmations</i>				
9.5.1.N. The auditor concludes that management's refusal to allow the auditor to send a confirmation request is unreasonable, or the auditor is unable to obtain relevant and reliable audit evidence from alternative audit procedures.	7.3.23.	✓		✓
<i>Inventory</i>				
9.5.1.O. If The auditor cannot perform alternative audit procedures to obtain sufficient appropriate audit evidence regarding the existence and condition of inventory, cannot be performed.	7.4.20.	✓		✓
<u>9.5.1.OO. If management refuses to give the auditor permission to communicate or meet with the entity's external legal counsel, or the entity's external legal counsel refuses to respond appropriately to the letter of inquiry, or is prohibited from responding; and the auditor is unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures.</u>	<u>7.4.23A</u>	<u>✓</u>		<u>✓</u>
<i>Going Concern</i>				
9.5.1.P. The financial statements have been prepared using the going concern basis of accounting but, in the auditor's judgment, management's use of the going concern basis of accounting in the preparation of the financial statements is inappropriate.	7.4.1. 8.5.7.		✓	
9.5.1.Q. Adequate disclosures are not made about a material uncertainty in the financial statements. 9.5.1.R. In this circumstance, the basis for qualified (or adverse) opinion section shall state that "a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going	7.4.5 8.5.8	✓	✓	

TABLE C Specific Circumstances When the Auditor's Opinion is to be Modified	Para Ref	Qualified	Adverse	Disclaimer
concern and that the financial statements do not adequately disclose this matter.”				
9.5.1.S. When evaluating management's assessment of the entity's ability to continue as a going concern, if the period is less than twelve months from the date of the financial statements, and management does not make or extend its assessment, leading to the auditor being unable to obtain sufficient appropriate audit evidence.	7.4.2.	✓		✓
<u>Subsequent Events</u>				
<u>9.5.1.SS. If facts become known to the auditor after the date of the auditor's report –but before the date the financial statements are issued, and if management does not amend the financial statements in circumstances where the auditor believes they need to be amended.</u>	<u>8.4.5B.</u>	✓	✓	✓
<i>Written Representations</i>				
9.5.1.T. The auditor concludes that there is sufficient doubt about the competence, integrity, ethical values, or diligence of management, such that the written representations required by this [draft] standard are not reliable.	8.6.5.	✓		✓
<u>9.5.1.TT. The auditor concludes that there is sufficient doubt about the integrity of management such that the written representations required by 8.6.1.(a)–(c) are not reliable.</u>	<u>8.6.5.</u>			✓
<u>9.5.1.U. When management does not provide one or more of the requested written representations.</u>	<u>8.6.6.</u>	✓		✓
9.5.1.UU. The auditor concludes that there is sufficient doubt about the integrity of management such that the written	8.6.6.			✓

representations required by this [draft] standard are not reliable; or <u>When</u> management does not provide the written representations required by paragraphs 8.6.1.(a)–(c).				
<i>Corresponding Figures</i>				
9.5.1.V. When corresponding figures are presented and the auditor's report on the prior period, as previously issued, included a qualified opinion, a disclaimer of opinion, or an adverse opinion and the matter which gave rise to the modification is unresolved. The Basis for Modification paragraph shall either: (a) refer to both the current period's figures and the corresponding figures in the description of the matter giving rise to the modification when the effects or possible effects of the matter on the current period's figures are material,; or (b) in other cases, explain that the audit opinion has been modified because of the effects or possible effects of the unresolved matter on the comparability of the current period's figures and the corresponding figures.	9.7.4	✓	✓	✓
<i>Other Items</i>				
9.5.1.W. If <u>If</u> the auditor is unable to obtain sufficient appropriate audit evidence.	8.5.6.	✓		✓
9.5.1.X. The financial statements prepared in accordance with the requirements of a fair presentation framework do not achieve fair presentation.	9.3.2.	✓	✓	
9.5.1.Y. If <u>If</u> the financial statements are prepared in accordance with a compliance framework and, in extremely rare circumstances, the auditor concludes, based on the audit evidence	9.3.3	✓	✓	✓

TABLE C Specific Circumstances When the Auditor's Opinion is to be Modified	Para Ref	Qualified	Adverse	Disclaimer
obtained, that such financial statements are misleading.				

Other Matters Relating to Modifications

9.5.2. If the auditor makes reference to the work of an auditor's expert in the auditor's report because such reference is relevant to an understanding of a modification to the auditor's opinion, the auditor shall indicate in the auditor's report that such reference does not reduce the auditor's responsibility for that opinion. 9.5.3. If there is a material misstatement of the financial statements that relates to:

- (a) Specific amounts in the financial statements (including quantitative disclosures), the auditor shall include in the Basis for Opinion section a description and quantification of the financial effects of the misstatement, unless impracticable. If it is not practicable to quantify the financial effects, the auditor shall so state in this section.
- (b) Qualitative disclosures, the auditor shall include in the Basis for Opinion section an explanation of how the disclosures are misstated.
- (c) The non-disclosure in the financial statements of information required to be disclosed, the auditor shall:
 - (i) Discuss the non-disclosure with those charged with governance;
 - (ii) Describe in the Basis for Opinion section the nature of the omitted information; and
 - (iii) Unless prohibited by law or regulation, include the omitted disclosures, provided it is practicable to do so and the auditor has obtained sufficient appropriate audit evidence about the omitted information.

9.5.3A. If the modification results from an inability to obtain sufficient appropriate audit evidence, the auditor shall include in the Basis for Opinion section the reasons for that inability.

9.5.4. When the auditor disclaims an opinion on the financial statements due to an inability to obtain sufficient appropriate audit evidence, the auditor shall amend the description of the auditor's responsibilities in the template in paragraph 9.4.1 to include only the following:

- (a) A statement that the auditor's responsibility is to conduct an audit of the entity's financial statements in accordance with the ~~draft~~ ISA for LCE and to issue an auditor's report;
- (b) A statement that because of the matter(s) described in the Basis for Disclaimer of Opinion section, the auditor was not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion on the financial statements; and
- (c) A statement that the auditor is independent of the entity in accordance with the relevant ethical requirements relating to the audit, and has fulfilled the auditor's other ethical responsibilities in accordance with these requirements.

9.5.4A. If the auditor has expressed an adverse opinion or disclaimed an opinion on the financial statements, the auditor shall describe in the Basis for Opinion section the reasons for any other matters of which the auditor is aware that would have required a modification to the opinion, and the effects thereof.

9.6. Other Paragraphs in the Auditor's Report

Emphasis of Matter paragraphs and Other Matter paragraphs in the auditor's report are used when the auditor considers it necessary to:

- ~~(a)~~ Draw users' attention to a matter or matters presented or disclosed in the financial statements that are of such importance that they are fundamental to users' understanding of the financial statements; or
- ~~(b)~~ Draw users' attention to any matter or matters other than those presented or disclosed in the financial statements that are relevant to users' understanding of the audit, the auditor's responsibilities or the auditor's report.

Emphasis of Matter Paragraphs

9.6.1. If the auditor considers it necessary to draw users' attention to a matter presented or disclosed in the financial statements that, in the auditor's professional judgment, is of such importance that it is fundamental to the users' understanding of the financial statements, and the auditor would not be required to modify the opinion, the auditor shall include an Emphasis of Matter paragraph in the auditor's report indicating that the auditor's report is not modified in respect of the matter emphasized.

Examples of where Emphasis of Matter paragraphs may be needed include:

- ~~(a)~~ When a financial reporting framework prescribed by law or regulation would be unacceptable but for the fact that it is prescribed by law or regulation.
- ~~(b)~~ When facts become known to the auditor after the date of the auditor's report and the auditor provides a new or amended auditor's report (i.e., subsequent events).

The inclusion of an Emphasis of Matter paragraph in the auditor's report does not affect the auditor's opinion. An Emphasis of Matter paragraph is not a substitute for:

- ~~(a)~~ A modified opinion when required by the circumstances of a specific audit engagement;
- ~~(b)~~ Disclosures in the financial statements that the applicable financial reporting framework requires management to make, or that are otherwise necessary to achieve fair presentation; or
- ~~(c)~~ Reporting when a material uncertainty exists relating to events or conditions that may cast significant doubt on an entity's ability to continue as a going concern.

Other Matter Paragraphs

The content of an Other Matter paragraph reflects clearly that such other matter is not required to be presented and disclosed in the financial statements. An Other Matter paragraph does not include information that the auditor is prohibited from providing by law, regulation or other professional

standards, for example, ethical standards for the confidentiality of information. An Other Matter paragraph also does not include information that is required to be provided by management.

9.6.2. If the auditor considers it necessary to communicate a matter other than those that are presented or disclosed in the financial statements that, in the auditor's professional judgment, is relevant to the users' understanding of the audit, the auditor's responsibilities or the auditor's report the auditor shall include an Other Matter paragraph in the auditor's report provided this is not prohibited by law or regulation.

9.6.3. [Moved to paragraph 9.7.2.A]

Content of Other Paragraphs in the Audit Report

9.6.4. When the auditor includes an Emphasis of Matter, Other Matter paragraph ~~or~~ a material uncertainty relating to going concern in the auditor's report, ~~or a section dealing with other information~~, the auditor shall include the paragraph or section according to Table D below:

Table D: Paragraph or Section	Location	Heading shall include	Content shall include
9.6.5. Emphasis of Matter paragraph	A separate section of the auditor's report	Appropriate heading that includes "Emphasis of Matter"	A clear reference to the matter being emphasized and to where relevant disclosures that fully describe the matter can be found in the financial statements. A reference only to information presented or disclosed in the financial statements. An indication that the auditor's opinion is not modified in respect of the matter emphasized.
9.6.6. Other Matter paragraph	A separate section of the auditor's report	Appropriate heading that includes "Other Matter"	As appropriate in the circumstances.
9.6.7. Material Uncertainty Related to Going Concern paragraph	A separate section of the auditor's report	"Material Uncertainty Relating to Going Concern"	Draw attention to the note in the financial statements that discloses the matters related to the material uncertainty. State that these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the entity's ability to continue as a going concern and that the auditor's opinion is not modified in respect of the matter.

9.6.8. When facts become known to the auditor after the financial statements have been issued and if management amends the financial statements, the auditor shall include in the new or amended auditor's report an Emphasis of Matter paragraph or Other Matter paragraph drawing users' attention to the reason for the amendment and referring to the earlier report provided by the auditor.

9.7. Comparative Information—Corresponding Figures and Comparative Financial Statements

9.7.1. The auditor shall determine whether the financial statements include the comparative information required by the applicable financial reporting framework and whether such information is appropriately classified. In doing so, the auditor shall evaluate whether:

- (a) The amounts and disclosures in the prior period agree with comparative information or have been restated; and
- (b) The accounting policies reflected in the comparative information are consistent with those applied in the current period or, where changes occurred, have been properly accounted for and adequately presented or disclosed.

9.7.2. If the auditor becomes aware of a possible material misstatement in the comparative information while performing the current period audit, the auditor shall perform such additional audit procedures as are necessary in the circumstances to obtain sufficient appropriate audit evidence to determine whether a material misstatement exists. If the prior period financial statements are amended, the auditor shall determine that the comparative information agrees with the amended financial statements.

9.7.2A. If the financial statements of the prior period were audited by a predecessor auditor and are presented as comparative financial statements, in addition to expressing an opinion on the current period's financial statements, the auditor shall state in an Other Matter paragraph:

- (a) That the financial statements of the prior period were audited by a predecessor auditor;
- (b) The type of opinion expressed by the predecessor auditor and, if the opinion was modified, the reasons therefore; and
- (c) The date of that report,

unless the predecessor auditor's report on the prior period's financial statements is reissued with the financial statements. **[Moved from paragraph 9.6.3]**

If the financial statements of the prior period were audited by a predecessor auditor and are presented as corresponding figures, the auditor may decide to include an Other Matter paragraph provided the auditor is not prohibited by law or regulation from referring to the predecessor auditor's report on the corresponding figures.

9.7.3. If the prior period financial statements were not audited, the auditor shall state in an Other Matter paragraph in the auditor's report that the corresponding figures or comparative financial statements are unaudited. Such a statement does not, however, relieve the auditor of the requirement to obtain sufficient appropriate audit evidence that the opening balances do not contain misstatements that materially affect the current period's financial statements.

Corresponding Figures

9.7.4. When corresponding figures are presented, the auditor's opinion shall not refer to the corresponding figures except in accordance with paragraph 9.7.3 or in the following circumstances:

- (a) If the auditor's report on the prior period, as previously issued, included a qualified opinion, a disclaimer of opinion, or an adverse opinion and the matter which gave rise to the modification is

unresolved, the auditor shall modify the auditor's opinion on the current period's financial statements.⁴⁵

- (b) If the auditor obtains audit evidence that a material misstatement exists in the prior period financial statements on which an unmodified opinion has been previously issued, and the corresponding figures have not been properly restated or appropriate disclosures have not been made, the auditor shall express a qualified opinion or an adverse opinion in the auditor's report on the current period financial statements, modified with respect to the corresponding figures included therein.

Comparative Financial Statements

9.7.5. When comparative financial statements are presented, the auditor's opinion shall refer to each period for which financial statements are presented and on which an audit opinion is expressed.

9.7.6. When reporting on prior period financial statements in connection with the current period's audit, if the auditor's opinion on such prior period financial statements differs from the opinion the auditor previously expressed, the auditor shall disclose the substantive reasons for the different opinion in an Other Matter paragraph.

9.8. Other Information

"Other information" is financial or non-financial information (other than the financial statements and the auditor's report thereon) included in an entity's annual report.

9.8.1. The auditor shall determine, through discussion with management, which document(s) comprises the annual report, and the entity's planned manner and timing of the issuance of such document(s).

9.8.2. The auditor shall read the other information, and:

- (a) Consider whether there is a material inconsistency between the other information and the financial statements; and
- (b) Consider whether there is a material inconsistency between the other information and the auditor's knowledge obtained in the audit.

9.8.3. As the basis for the considerations in paragraph 9.8.2.(a), the auditor shall, to evaluate their consistency, compare selected amounts or other items in the other information (that are intended to be the same as, to summarize, or to provide greater detail about, the amounts or other items in the financial statements) with such amounts or other items in the financial statements.

In evaluating the consistency of selected amounts or other items, the auditor is not required to compare all amounts or other items in the other information that are intended to be the same as, or summarize, or to provide greater details about, the amounts or other items within the financial statements, with such amounts or other items in the financial statements.

⁴⁵ For the effect on the auditor's report see Part 9, paragraph 9.5.1.V.

- 9.8.4. While reading the other information, the auditor shall also remain alert for indications that the remainder of the other information, which is unrelated to the financial statements or the auditor's knowledge obtained in the audit, appears to be materially misstated.
- 9.8.5. If the auditor identifies that a material inconsistency appears to exist (or becomes aware that the other information appears to be materially misstated), the auditor shall discuss the matter with management and, if necessary, perform other procedures to conclude whether:
- (a) A material misstatement of the other information exists;
 - (b) A material misstatement of the financial statements exists; or
 - (c) The auditor's understanding of the entity and its environment needs to be updated.
- 9.8.6. If the auditor concludes, based on the audit evidence obtained, that a material misstatement of the other information exists, the auditor shall request management to correct the other information. If management:
- (a) Agrees to make the correction, the auditor shall determine that the correction has been made; or
 - (b) Refuses to make the correction, the auditor shall communicate the matter with those charged with governance and request that the correction be made. If the correction is still not made, the auditor shall consider the implications for the auditor's report in accordance with Table E below or withdraw from the engagement where this is possible.
- 9.8.7. If the auditor obtained some or all of the other information at the date of the auditor's report, the auditor shall include an Other Information section in the auditor's report in accordance with Table E.
- 9.8.8. Unless required by law or regulation, when the auditor disclaims an opinion on the financial statements, the auditor's report shall not include an Other Information section.
- 9.8.9. The auditor shall document the procedures performed in relation to other information and the final version of the other information.

Table E: Paragraph or Section	Location	Heading shall include	Content shall include
9.8.10. Other Information Section	A separate section of the auditor's report	"Other Information" or other appropriate title	(a) A statement that management is responsible for the other information; (b) An identification of the other information, if any, obtained by the auditor prior to the date of the auditor's report; (c) A statement that the auditor's opinion does not cover the other information and, accordingly, that the auditor does not express an audit opinion or any form of assurance conclusion thereon;

			(d) A description of the auditor's responsibilities relating to reading, considering and reporting on other information as required by this [draft] ISA for LCE; and (e) When other information has been obtained prior to the date of the auditor's report, either: (i) A statement that the auditor has nothing to report; or (ii) If the auditor has concluded that there is an uncorrected material misstatement of the other information, a statement that describes the uncorrected material misstatement of the other information.
--	--	--	--

10. Audits of Group Financial Statements⁴⁶

Content of this Part

Part 10 sets out the special considerations that apply to an audit of group financial statements.

Scope of this Part

All parts of the ISA for LCE apply to an audit of group financial statements (a group audit). The requirements and guidance in this Part refer to, or expand on, the application of other parts of the ISA for LCE to a group audit.

10.1. Objective

10.1.1. The objective of the auditor is to identify and assess the risks of material misstatement of the group financial statements, whether due to fraud or error, and plan and perform further audit procedures to appropriately respond to those assessed risks.

10.2. Planning Activities

10.2.1. In applying Part 5, the auditor shall establish, and update as necessary, the scope, timing and direction of the group audit. In doing so, the auditor shall determine:

- (a) The components at which audit work will be performed; and
- (b) The resources needed to perform the group audit engagement.

Components

The determination of components at which to perform audit work is a matter of professional judgment. Matters that may influence the auditor's determination include, for example:

- *The nature of events or conditions that may give rise to risks of material misstatement at the assertion level of the group financial statements that are associated with a component, for example, newly formed or acquired entities or business units or entities or business units in which significant changes have taken place.*
- *The disaggregation of significant classes of transactions, account balances and disclosures in the group financial statements across components, considering the size and nature of assets, liabilities and transactions at the location or business unit relative to the group financial statements.*
- *Whether sufficient appropriate audit evidence is expected to be obtained for all significant classes of transactions, account balances and disclosures in the group financial statements from audit work planned on the financial information of identified components.*

⁴⁶ This Part is as presented in the Exposure Draft *Proposed Part 10, Audits of Group Financial Statements of the Proposed International Standard on Auditing for Audits of Financial Statements of Less Complex Entities (ISA for LCE)* and will not be discussed in June 2023.

- *The nature and extent of misstatements or control deficiencies identified at a component in prior period audits.*
- *The nature and extent of the commonality of controls across the group and whether, and if so, how, the group centralizes activities relevant to financial reporting.*

Based on the understanding of the group's organizational structure and information system, the auditor may determine that the financial information of certain entities or business units may be considered together for purposes of planning and performing audit procedures. For example, a group may have three legal entities with similar business characteristics, operating in the same geographical location, under the same management, and using a common system of internal control, including the information system. In these circumstances, the auditor may decide to treat these three legal entities as one component.

Resources

Part 3 requires the engagement partner to determine that sufficient and appropriate resources to perform the engagement are assigned or made available to the engagement team in a timely manner. The auditor's determination of the resources needed to perform the group audit are a matter of professional judgment and may include the understanding of the group, the components within the group at which audit work is to be performed and whether to perform work centrally, at components or a combination thereof.

- 10.2.2. If, after the acceptance or continuance of the group audit engagement, the engagement partner concludes that sufficient appropriate audit evidence cannot be obtained, the engagement partner shall consider the possible effects on the group audit.

10.3. Materiality

- 10.3.1. In applying Part 5, when classes of transactions, account balances or disclosures in the group financial statements are disaggregated across components, for purposes of planning and performing audit procedures, the auditor shall determine component performance materiality. To address aggregation risk, such amount shall be lower than group performance materiality.

The component performance materiality amount may be different for each component. Also, the component performance materiality amount for an individual component need not be an arithmetical portion of the group performance materiality and, consequently, the aggregate of component performance materiality amounts may exceed group performance materiality.

The ISA for LCE does not require component performance materiality to be determined for each class of transactions, account balance or disclosure for components at which audit procedures are performed. However, if, in the specific circumstances of the group, there is one or more particular classes of transactions, account balances or disclosures for which misstatements of lesser amounts than materiality for the group financial statements as a whole could reasonably be expected to influence the economic decisions of users taken on the basis of the group financial statements, Part 5 requires a determination of the materiality level or levels to be applied to those particular classes of transactions, account balances or disclosures. In these circumstances, the auditor may need to consider whether a component performance materiality lower than the amount may be appropriate for those particular classes of transactions, account balances or disclosures.

The determination of component performance materiality is not a simple mechanical calculation and involves the exercise of professional judgment. Factors the auditor may take into account in setting component performance materiality include the following:

- *The extent of disaggregation of the financial information across components (e.g., as the extent of disaggregation across components increases, a lower component performance materiality ordinarily would be appropriate to address aggregation risk). The relative significance of the component to the group may affect the extent of disaggregation (e.g., if a single component represents a large portion of the group, there likely may be less disaggregation across components).*
- *Expectations about the nature, frequency, and magnitude of misstatements in the component financial information, for example the nature and extent of misstatements identified at the component in prior audits.*

To address aggregation risk, paragraph 10.3.1. requires component performance materiality to be lower than group performance materiality. In some circumstances, however, component performance materiality may be set at an amount closer to group performance materiality because there is less aggregation risk, such as when the financial information for one component represents a substantial portion of the group financial statements.

10.4. Understanding the Group and Its Environment, the Applicable Financial Reporting Framework and the Group's System of Internal Control

10.4.1. In applying Part 6, the auditor shall obtain an understanding of:

- (a) The group's organizational structure and business model, including the locations in which the group has its operations or activities and the extent to which they are similar across the group.
- (b) The group's system of internal control, including:
 - (i) The consolidation process used by the group and consolidation adjustments;
 - (ii) The nature and extent of commonality of controls; and
 - (iii) How the group centralizes activities relevant to financial reporting.

10.5. Identifying and Assessing the Risks of Material Misstatement

10.5.1. In applying Part 6, based on the understanding obtained in paragraph 10.4.1. the auditor shall identify and assess the risks of material misstatement of the group financial statements, including with respect to the consolidation process.

In applying Part 6, the auditor is required to identify and assess the risks of material misstatement of the financial statements due to fraud, and to design and perform further audit procedures whose nature, timing and extent are responsive to the assessed risks of material misstatement due to fraud at the assertion level. Information used to identify the risks of material misstatement of the group financial statements due to fraud may include the following:

- *Whether there are particular components that are more susceptible to risks of material misstatement due to fraud.*

- *Whether any fraud risk factors or indicators of management bias exist in the consolidation process.*
- *How those charged with governance of the group monitor group management's processes for identifying and responding to the risks of fraud in the group, and the controls group management has established to mitigate these risks.*
- *Responses of those charged with governance of the group, and group management to the auditor's inquiry about whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group.*

10.6. Responding to the Assessed Risks of Material Misstatement

10.6.1. In applying Part 7, the auditor shall determine the components at which to perform further audit procedures and the nature, timing and extent of the work to be performed at those components.

In response to the assessed risks of material misstatement, the auditor may determine the following scope of work to be appropriate at a component:

- *Design and perform further audit procedures on the entire financial information of the component;*
- *Design and perform further audit procedures on one or more classes of transactions, account balances or disclosures; or*
- *Perform specific further audit procedures.*

Further audit procedures may be designed and performed centrally if the audit evidence to be obtained from performing further audit procedures on one or more significant classes of transactions, account balances or disclosures in the aggregate will respond to the assessed risks of material misstatement, for example, if the accounting records for the revenue transactions of the entire group are maintained centrally.

The auditor may determine that the financial information of components can be considered as a single population for the purpose of performing further audit procedures, for example, when transactions are considered to be homogeneous because they share the same characteristics, the related risks of material misstatement are the same, and controls are designed and operating in a consistent way. In such cases, group performance materiality often will be used for purposes of performing these procedures.

Consolidation Process

10.6.2. The auditor shall design and perform further audit procedures to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process. This shall include:

- (a) *Evaluating whether all entities and business units have been included in the group financial statements as required by the applicable financial reporting framework;*
- (b) *Evaluating the appropriateness, completeness and accuracy of consolidation adjustments and reclassifications;*
- (c) *Evaluating whether management's judgments made in the consolidation process give rise to*

indicators of possible management bias; and

- (d) Responding to assessed risks of material misstatement due to fraud arising from the consolidation process.

The consolidation process may require adjustments and reclassifications to amounts reported in the group financial statements that do not pass through the usual IT applications, and may not be subject to the same controls to which other financial information is subject. The auditor's evaluation of the appropriateness, completeness and accuracy of the adjustments and reclassifications may include:

- *Evaluating whether significant adjustments appropriately reflect the events and transactions underlying them;*
- *Determining whether those entities or business units whose financial information has been included in the group financial statements were appropriately included;*
- *Determining whether significant adjustments have been correctly calculated, processed and authorized by group management and, when applicable, by component management;*
- *Determining whether significant adjustments are properly supported and sufficiently documented; and*
- *Evaluating the reconciliation and elimination of intra-group transactions, unrealized profits, and intra-group account balances.*

10.7. Specific Communication Requirements

Communication with Group Management and Those Charged with Governance of the Group

10.7.1. If fraud has been identified by the auditor, or information indicates that a fraud may exist, the auditor shall communicate this on a timely basis to the appropriate level of group management in order to inform those with primary responsibility for the prevention and detection of fraud of matters relevant to their responsibilities.

10.7.2. The auditor shall communicate the following matters with those charged with governance:

- (a) An overview of the work to be performed at the components of the group.
- (b) Fraud or suspected fraud involving group management, component management, employees who have significant roles in the group's system of internal control or others when the fraud resulted in a material misstatement of the group financial statements.

10.8. Specific Documentation Requirements

10.8.1. In addition to the general documentation requirements (Part 2.5.) for an audit engagement, the auditor shall include in the audit documentation:

- (a) The basis for the auditor's determination of components for purposes of planning and performing the group audit.
- (b) The basis for the determination of component performance materiality.

APPENDIX 1

Glossary of Terms

See [Proposed Appendix 1 - Glossary of Terms⁴⁷](#) for a full list of definitions.

⁴⁷ [Proposed Appendix 1 will be presented to the Board in the September Board Meeting.](#)

APPENDIX 25

Illustrative Engagement Letter

The following is an [illustrative engagement letter example](#) of an audit engagement letter for an audit of general purpose financial statements prepared in accordance with [applicable financial reporting framework]. This letter is not authoritative but is intended only to be a guide that may be used in conjunction with the considerations outlined in the [\[draft\]](#) ISA for LCE. It will need to be varied according to individual requirements and circumstances. It is drafted to refer to the audit of financial statements for a single reporting period and would require adaptation if intended or expected to apply to recurring audits (see paragraph 4.5.2).

To the appropriate representative of management or those charged with governance of ABC Company:⁴⁸

[The objective and scope of the audit]

You⁴⁹ have requested that we audit the financial statements of ABC Company, which comprise the statement of financial position as at December 31, 20X1, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter.

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the International Standard on Auditing Financial Statements of Less Complex Entities (ISA for LCE) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

[The responsibilities of the auditor]

We will conduct our audit in accordance with the ISA for LCE. The ISA for LCE requires that we comply with ethical requirements. As part of an audit in accordance with the ISA for LCE, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

⁴⁸ The addressees and references in the letter would be those that are appropriate in the circumstances of the engagement, including the relevant jurisdiction

⁴⁹ Throughout this letter, references to "you," "we," "us," "management," "those charged with governance" and "auditor" would be used or amended as appropriate in the circumstances

- Understand internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. However, we will communicate to you in writing concerning any significant deficiencies in internal control relevant to the audit of the financial statements that we have identified during the audit.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Because of the inherent limitations of an audit, together with the inherent limitations of internal control, there is an unavoidable risk that some material misstatements may not be detected, even though the audit is properly planned and performed in accordance with the ISA for LCE.

[\[The responsibilities of management and identification of the applicable financial reporting framework\]⁵⁰](#)

Our audit will be conducted on the basis that [management, and where appropriate, those charged with governance]⁵¹ acknowledge and understand that they have responsibility:

- (a) For the preparation and fair presentation of the financial statements in accordance with [applicable financial reporting framework];⁵²
- (b) For such internal control as [management] determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; and
- (c) To provide us with:
 - (i) Access to all information of which [management] is aware that is relevant to the preparation of the financial statements such as records, documentation and other matters;
 - (ii) Additional information that we may request from [management] for the purpose of the audit; and

⁵⁰ [For purposes of this illustrative engagement letter it is assumed that the auditor has not determined that the law or regulation prescribes those responsibilities in appropriate terms; the descriptions in paragraph 4.3.1\(b\) of this standard are therefore used.](#)

⁵¹ Use terminology as appropriate in the circumstances.

⁵² Or, if appropriate, "For the preparation of financial statements that give a true and fair view in accordance with [applicable financial reporting framework]"

- (iii) Unrestricted access to persons within the entity from whom we determine it necessary to obtain audit evidence.

As part of our audit process, we will request from [management, and where appropriate, those charged with governance], written confirmation concerning representations made to us in connection with the audit. We look forward to full cooperation from your staff during our audit.

[Other relevant information]

[Insert other information, such as fee arrangements, billings and other specific terms, as appropriate.]

[Reporting]

[Insert appropriate reference to the expected form and content of the auditor's report including, if applicable, the reporting on other information.]

The form and content of our report may need to be amended in the light of our audit findings.

Please sign and return the attached copy of this letter to indicate your acknowledgement of, and agreement with, the arrangements for our audit of the financial statements including our respective responsibilities.

XYZ & Co.

Acknowledged and agreed on behalf of ABC Company by

Identifying and Assessing the Risks of Material Misstatement (Part 6)

Fraud Risk Factors

The fraud risk factors set out below are examples of factors that may be faced by auditors during an audit of less complex entities. Examples are separately presented for the two types of fraud—fraudulent financial reporting and misappropriation of assets.

The risk factors are further classified based on the three conditions generally present when material misstatements due to fraud occur: (a) incentives/pressures, (b) opportunities, and (c) attitudes/rationalizations. Although the risk factors cover a broad range of situations, they are only examples and, accordingly, the auditor may identify additional or different risk factors. Not all of these examples are relevant in all circumstances, and some may be of greater or lesser significance in entities of different sizes or with different ownership characteristics or circumstances. Also, the order of the examples risk factors provided is not intended to reflect their relative importance or frequency of occurrence.

Risk Factors Relating to Misstatements Arising from Fraudulent Financial Reporting

The following are examples of risk factors relating to misstatements arising from fraudulent financial reporting.

Incentives/Pressures

Financial stability or profitability is threatened by economic, industry, or entity operating conditions, such as (or as indicated by):

- Significant declines in customer demand or increasing business failures in the industry or overall economy.
- High degree of competition or market saturation, accompanied by declining margins.
- Operating losses causing the threat of bankruptcy or foreclosure.
- Recurring negative cash flows from operations or an inability to generate cash flows from operations.

Pressure exists for management to meet the requirements or expectations of third parties due to:

- Pressure to renew, or obtain additional, financing, or to meet debt repayment or debt covenant requirements and therefore to overstate performance or position in order to demonstrate profitability and long-term viability.
- Pressure to understate revenue in order to reduce tax liabilities.

Opportunities

Opportunities to engage in fraudulent financial reporting that can arise from the following:

- Related-party transactions not in the ordinary course of business or with related entities not audited or audited by another firm.
- The monitoring of management is not effective, as a result of the domination of management by a single person or small group (in a non owner-managed business) without compensating controls.
- Internal control components are deficient as a result of the following:

- Limited segregation of duties or anti-fraud controls (e.g., fraud hotlines, internal audit function.)
- Inadequate monitoring of controls.
- Accounting and information systems that are not effective, including situations involving significant deficiencies in internal control.

Attitudes/Rationalizations

- Poor communication, implementation, support, or enforcement of the entity's values or ethical standards by management, or the communication of inappropriate values or ethical standards.
- The owner-manager makes no distinction between personal and business transactions.
- Dispute between shareholders in a closely held entity.
- Recurring attempts by management or owners to justify marginal or inappropriate accounting on the basis of materiality or to help the company survive.
- The relationship between management and the current or predecessor auditor is strained by disputes, unreasonable demands on the auditor, restrictions on access to people or information, or domineering management behavior.

Risk Factors Arising from Misstatements Arising from Misappropriation of Assets

Some of the risk factors related to misstatements arising from fraudulent financial reporting may also be present when misstatements arising from misappropriation of assets occur, which often is a common fraud in less complex entities. For example, ineffective monitoring of management and other deficiencies in internal control may be present when misstatements due to either fraudulent financial reporting or misappropriation of assets exist. The following are examples of risk factors related to misstatements arising from misappropriation of assets.

Incentives/Pressures

- Personal financial obligations may create pressure on management or employees with access to cash or other assets susceptible to theft to misappropriate those assets.
- Adverse relationships between the entity and employees with access to cash or other assets susceptible to theft may motivate those employees to misappropriate those assets. For example:
- Known or anticipated future employee layoffs.
- Recent or anticipated changes to employee compensation or benefit plans.
- Promotions, compensation, or other rewards inconsistent with expectations.

Opportunities

Certain characteristics or circumstances may increase the susceptibility of assets to misappropriation:

- Large amounts of cash on hand or processed.
- Inventory items that are small in size, of high value, or in high demand.
- Fixed assets which are small in size, marketable, or lacking observable identification of ownership.

Inadequate internal control over assets may increase the susceptibility of misappropriation of those assets. For example, misappropriation of assets may occur because there is the following:

- Inadequate segregation of duties or independent checks.
- Inadequate system of authorization and approval of transactions (for example, in purchasing).
- Inadequate record keeping or physical safeguards over cash, inventory, or fixed assets.
- Lack of mandatory vacations for employees performing key control functions.
- Inadequate management understanding of information technology.

Attitudes/Rationalizations

- Disregard for the need for monitoring or reducing risks related to misappropriations of assets.
- Disregard for internal control by overriding existing controls or failing to take appropriate remedial action on known misappropriations, including petty theft.
- Behavior indicating displeasure or dissatisfaction with the entity or its treatment of the employee.

Assertions

~~Assertions are representations, explicit or otherwise, with respect to the recognition, measurement, presentation and disclosure of information in the financial statements which are inherent in management representing that the financial statements are prepared in accordance with the applicable financial reporting framework. Assertions are used by the auditor to consider the different types of potential misstatements that may occur when identifying, assessing and responding to the risks of material misstatement.~~

In identifying and assessing the risks of material misstatement, the auditor of less complex entities (LCEs) may use the categories of assertions as described below or may express them differently provided all aspects described below have been covered. The auditor may choose to combine the assertions about classes of transactions and events, and related disclosures, with the assertions about account balances, and related disclosures.

An auditor of an LCE may use the following assertions in considering the different types of potential misstatements that may occur. The assertions may fall into the following categories:

Assertions about classes of transactions and events, and related disclosures, for the period under audit:

- Occurrence—transactions and events that have been recorded or disclosed have occurred, and such transactions and events pertain to the entity.
- Completeness—all transactions and events that should have been recorded have been recorded, and all related disclosures that should have been included in the financial statements have been included.
- Accuracy—amounts and other data relating to recorded transactions and events have been recorded appropriately, and related disclosures have been appropriately measured and described.
- Cutoff—transactions and events have been recorded in the correct accounting period.
- Classification—transactions and events have been recorded in the proper accounts.
- Presentation—transactions and events are appropriately aggregated or disaggregated and clearly described, and related disclosures are relevant and understandable in the context of the requirements of the applicable financial reporting framework.

Assertions about account balances, and related disclosures, at the period end:

- Existence—assets, liabilities and equity interests exist.
- Rights and obligations—the entity holds or controls the rights to assets, and liabilities are the obligations of the entity.
- Completeness—all assets, liabilities and equity interests that should have been recorded have been recorded, and all related disclosures that should have been included in the financial statements have been included.
- Accuracy, valuation and allocation—assets, liabilities and equity interests have been included in the financial statements at appropriate amounts and any resulting valuation or allocation adjustments

have been appropriately recorded, and related disclosures have been appropriately measured and described.

- Classification—assets, liabilities and equity interests have been recorded in the proper accounts.
- Presentation—assets, liabilities and equity interests are appropriately aggregated or disaggregated and clearly described, and related disclosures are relevant and understandable in the context of the requirements of the applicable financial reporting framework.

The assertions described above, adapted as appropriate, may also be used by the auditor in considering the different types of misstatements that may occur in disclosures not directly related to recorded classes of transactions, events or account balances.

APPENDIX 6

Examples of Factors Influencing Sample Size for Tests of Controls and Test of Details

The following are factors that the auditor may consider when determining the sample size for tests of controls. These factors, which need to be considered together, assume the auditor does not modify the nature or timing of tests of controls or otherwise modify the approach to substantive procedures in response to assessed risks.

<u>Factor Influencing Sample Size for Tests of Controls</u>	<u>Effect on sample size</u>
<u>An increase in the extent to which the auditor's risk assessment takes into account plans to test the operating of effectiveness of controls</u>	<u>Increase</u>
<u>An increase in the tolerable rate of deviation</u>	<u>Decrease</u>
<u>An increase in the expected rate of deviation of the population to be tested</u>	<u>Increase</u>
<u>An increase in the auditor's desired level of assurance that the tolerable rate of deviation is not exceeded by the actual rate of deviation in the population</u>	<u>Increase</u>
<u>An increase in the number of sampling units in the population</u>	<u>Negligible effect</u>

The following are factors that the auditor may consider when determining the sample size for tests of details. These factors, which need to be considered together, assume the auditor does not modify the approach to tests of controls or otherwise modify the nature or timing of substantive procedures in response to the assessed risks.

<u>Factor Influencing Sample Size for Tests of Details</u>	<u>Effect on sample size</u>
<u>An increase in the auditor's assessment of the risk of material misstatement</u>	<u>Increase</u>
<u>An increase in the use of other substantive procedures directed at the same assertion</u>	<u>Decrease</u>
<u>An increase in the auditor's desired level of assurance that tolerable misstatement is not exceeded by actual misstatement in the population</u>	<u>Increase</u>
<u>An increase in tolerable misstatement</u>	<u>Decrease</u>
<u>An increase in the amount of misstatement the auditor expects to find in the population</u>	<u>Increase</u>
<u>Stratification of the population when appropriate</u>	<u>Decrease</u>

APPENDIX 76

Illustrative Representation Letter

The following illustrative letter includes written representations that are required by Part 8.6 of the ~~{draft}~~ ISA for LCE. It is assumed in this illustration that the requirement to obtain a written representation relating to going concern is not relevant; and that there are no exceptions to the requested written representations. If there were exceptions, the representations would need to be modified to reflect the exceptions.

(Entity Letterhead)

(To Auditor)

(Date)

This representation letter is provided in connection with your audit of the financial statements of ABC Company for the year ended December 31, 20XX for the purpose of expressing an opinion as to whether the financial statements are presented fairly, in all material respects, (or *give a true and fair view*) in accordance with [applicable financial reporting framework].

We confirm that:

Financial Statements

- We have fulfilled our responsibilities, as set out in the terms of the audit engagement dated [insert date], for the preparation of the financial statements in accordance with [applicable financial reporting framework]; in particular the financial statements are fairly presented (or give a true and fair view) in accordance therewith.
- The methods, the data, and the significant assumptions used in making accounting estimates, and their related disclosures are appropriate to achieve recognition, measurement or disclosure that is reasonable in the context of the applicable financial reporting framework.
- Related party relationships and transactions have been appropriately accounted for and disclosed in accordance with the requirements of [applicable financial reporting framework].
- All events subsequent to the date of the financial statements and for which [applicable financial reporting framework] require adjustment or disclosure have been adjusted or disclosed.
- The effects of uncorrected misstatements are immaterial, both individually and in the aggregate, to the financial statements as a whole. A list of the uncorrected misstatements is attached to the representation letter.
- Any actual or possible litigation and claims whose effects should be considered when preparing the financial statements are accounted for and disclosed in accordance with the applicable financial reporting framework.
- [Any other matters that the auditor may consider appropriate.]

Information Provided

- We have provided you with:
 - Access to all information of which we are aware that is relevant to the preparation of the financial statements, such as records, documentation and other matters;
 - Additional information that you have requested from us for the purpose of the audit; and
 - Unrestricted access to persons within the entity from whom you determined it necessary to obtain audit evidence.
- All transactions have been recorded in the accounting records and are reflected in the financial statements.
- We have disclosed to you the results of our assessment of the risk that the financial statements may be materially misstated as a result of fraud.
- We have disclosed to you all information in relation to fraud or suspected fraud that we are aware of and that affects the entity and involves:
 - Management;
 - Employees who have significant roles in internal control; or
 - Others where the fraud could have a material effect on the financial statements.
- We have disclosed to you all information in relation to allegations of fraud, or suspected fraud, affecting the entity's financial statements communicated by employees, former employees, analysts, regulators or others.
- We have disclosed to you all known instances of non-compliance or suspected non-compliance with law or regulation whose effects should be considered when preparing financial statements.
- We have disclosed to you all known actual or possible litigation and claims whose effects should be considered when preparing the financial statements.
- We have disclosed to you the identity of the entity's related parties and all the related party relationships and transactions of which we are aware.
- [Any other matters that the auditor may consider necessary.]
